21. MANAGEMENT'S PERCEPTION OF RISK FACTORS

Potential investors should consider carefully all the risk factors in this Disclosure Document for evaluating the Issuer and its business and the Debentures before making any investment decision relating to the Debentures. Unless the context requires otherwise, the risk factors described below apply to the Issuer only. If any one of the following stated risks actually occurs, the Issuer's business, financial conditions and results of operations could suffer and, therefore, the value of the Issuer's Debentures could decline. Unless specified or quantified in the relevant risk factors, the Issuer is not in a position to quantify the financial or other implications of any risk mentioned herein below

a) Early Termination for Extraordinary Reasons, Illegality and Force Majeure etc:

If the Issuer determines that, for reasons beyond its control, the performance of its obligations under the Debentures has become illegal or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Debentures for any reason, the Issuer may at its discretion and without obligation terminate early the Debentures. If the Issuer terminates early the Debentures, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Debenture an amount determined by the Calculation Agent/Issuer.

b) Interest Rate Risk:

Interest Rate Risk (Company Specific): Since EFIL is engaged in lending and financing activities, its business and income will largely be dependent on interest income from its operations. Interest rates are highly sensitive to many factors, including the monetary

policies of RBI, deregulation of the financial sector in India, domestic and International economic and political conditions, inflation and other factors beyond the control of EFIL. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility. There can be no assurance that significant interest rate movements will not have an effect on the results of its operations.

Interest Rate Risk on Bonds/ Government securities:

Bonds/ Government securities which are fixed return securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI, the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds/ Government securities are also influenced by the liquidity in the financial system and/or the open market operations (OMO) by RBI. Pressure on exchange rate of the rupee may also affect security prices. Such rise and fall in price of bonds/ government securities may influence valuations as and when such changes occur.

c) Changes or discontinuance of the Underlying:

Changes in the Underlying and factors which either affect or may affect the value of the Underlying, may affect the return on an investment in the Debentures. In case of the regulators or the authorized bodies discontinuing or restricting the use of the benchmark/underlying, the Issuer will be bound to take necessary action as may be prescribed by the regulators or the authorized body or as may be required by the law or as may be required to accommodate the situation.

d) Returns on Debentures are subject to Model Risk:

Returns on the Debentures are based on complex mathematical models involving multiple derivative exposures which may or may not be hedged and the actual behavior of the Underlying/ Reference Index selected for hedging may significantly differ from returns predicted by the mathematical models.

e) Repayment is subject to the credit risk of issuer

Potential investors should be aware that receipt of the principal amount, (i.e. the redemption amount) and any other amounts that maybe due in respect of the debentures is subject to the credit risk of the Issuer. Potential investors acknowledge the risk that the issuer may not be able to satisfy their obligations under the debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the issuer, the payment of sums due on the debentures may not be made or may be substantially reduced or delayed.

f) Increasing competition from banks, financial institutions and NBFCs

The successful implementation of Issuers growth plans depends on its ability to face the competition. The main competitors of the Issuer are NBFCs, financial institutions and banks. The Issuer does not have access to large quantities of low cost deposits because of which it may become less competitive. Many of its competitors have significantly greater financial, technical, marketing and other resources. Many of them also offer a wider range of services and financial products than the Issuer does and have greater brand recognition and a larger client base. As the Issuer ventures into offering newer products, it is likely to face additional competition from those who may be better capitalised, have longer operating history and better management. If the Issuer is unable to manage its business and compete effectively with current or future competitors it might impede its competitive position and profitability.

g) Downgrading in Credit Rating

For borrowings through NCDs the following Rating has been assigned –

BRICKWORK RATINGS INDIA PRIVATE LIMITED - (BWR PP-MLD AA-/Stable) (pronounced BWR Principal Protected-Market Linked Debenture Double A Minus (Outlook: Stable))

The Issuer cannot guarantee that this rating will not be downgraded. In the event of deterioration in the financial health of the

Issuer, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. Such a downgrade in the credit rating may lower the value of the Debentures and may also result in the Issuer having to withdraw this borrowing programme.

h) Security may be insufficient to redeem debentures

In the event that the company is unable to meet its payment and other obligations towards investors under the terms of the debentures, the Debenture Trustee may enforce the security as per the terms of security documents, and other related documents. The Debenture Holder(s)' recovery in relation to the debentures will be subject to (a) the market value of such secured property, (b) finding willing buyer for the security at a price sufficient to repay debenture holder(s)' amounts outstanding under the debentures. The value realized from the enforcement of the security may be insufficient to redeem the debentures.

i) Credit Risk

Any lending and investment activity by the Issuer is exposed to credit risk arising from repayment default by borrowers and other counter parties. The Issuer has a systematic credit evaluation process to monitor the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluate the changes and developments in sectors in which it has substantial exposure and to take timely appropriate remedial actions. The Issuer also undertakes periodic reviews of its entire asset portfolio with a view to determine the portfolio valuation identify potential areas of action and devise appropriate strategies thereon. Despite these efforts, there can be no assurance that repayment default will not occur and in such circumstances may have an effect on its results of operations. The principal amount is subject to the credit risk of the Issuer whereby the investor may or may not recover all or part of the funds in case of default by the Issuer.

22. EVENTS FOR EARLY REDEMPTION:

Issuer Tax Change Event means that, on or after the Deemed Date of Allotment of the Debentures, the imposition of any withholding or deduction on any payments in respect of the Debentures by or on behalf of the Issuer if such with holding or deduction is required by law.

Change in Law means that, on or after the Deemed Date of Allotment of the Debentures (A) due to the adoption of or any change in any applicable law or regulation (including, without limitation, any tax law), or (B) due to the promulgation of or any change in the interpretation by any court, tribunal or regulatory authority with competent jurisdiction of any applicable law or regulation (including any action taken by a taxing authority), the Issuer determines in its sole discretion that (X) it has become illegal for the Issuer to hold, acquire or dispose of the Underlying Security/Units/hedge positions relating to the Debentures, or (Y) the Issuer will incur a materially increased (as compared with the circumstances existing on the Deemed Date of Allotment) cost in relation to the performance of the Issuer's obligations under the Debentures (including, without limitation, due to any increase in tax liability, decrease in tax benefit or other adverse effect on the tax position of the Issuer).

Hedging Disruption means that the Issuer or any of its Affiliates or its Holding Company is unable, after using commercially reasonable efforts, to either (A) acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction(s) or asset(s) it deems necessary to hedge the Underlying price risk (or any other relevant price risk including, but not limited to, the currency risk) of issuing and performing its obligations with respect to the Debentures, or (B) freely realize, recover, receive, repatriate, remit or transfer the proceeds of hedge positions or the Debentures.

Reference Index Modification Event

means any material change in composition of index or the mutual fund scheme/ method of computation of index as determined by the calculation agent or calculation of NAV of the relevant scheme by the mutual fund, which leads to substantially increased cost of hedging/ Hedging Disruption.

Regulatory Events for Investor

Subject to regulatory requirements of applicable regulatory authorities, upon the occurrence of any one of the following events, the Company shall be entitled but not obliged to redeem the Debentures in the hands of the concerned investor:

- 1) The representations/declarations of the investor being untrue or misleading when made or later found to be untrue during the tenure of his investment;
- 2) Legal action/proceedings being initiated to suspend the investor's license by any regulatory authority or its name being struck off in the records of the Ministry of Company Affairs;
- 3) Any regulatory order passed against investor debarring investor from investments in stock market directly or indirectly etc.
- 4) Proceedings for insolvency / bankruptcy or winding up being instituted against the investor;
- 5) Company having reason to believe that any of the aforesaid events is likely to occur imminently.
- 6) Any regulatory change which makes the holding of Debentures by investor illegal or void.

23. EXTERNAL RISK FACTORS

a) The Debentures may be illiquid

The Company intends to list the Debentures on the WDM segment of the BSE. The Company cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange(s) and that there would be any market for the Debenture(s). It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

b) A slowdown in economic growth in India

A slowdown in the Indian economy / GDP may adversely affect Company's business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general down trend in the economy. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact the Company's ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available.

c) Conditions in the Indian Debt market may affect the coupon on the Debentures.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. The Central and State Governments are the issuers of the local currency debt. The

Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since these securities carry minimal risks, they may command lower yields. The performance may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems. The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies.

d) Conditions in the Indian Equity market may affect the coupon on the Debentures.

Applicable to Index Linked product:

The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected, thereby affecting the indices.

Spread of COVID19 and the consequent nationwide lockdown to impact the Issuer's operations and financial condition

The rapid outbreak of the COVID19 pandemic has severely impacted the physical and financial health of the people across the globe. To prevent the contagion in the country, a 21 day nationwide lockdown was announced by the Government of India on March 24, 2020 which was further extended to 30 October 2020 across the country. While the national lockdown has been relaxed, each State government has set out extension of the lockdown but the relaxations (outside containment zones) have been permitted to a certain extent, subject to receipt of requisite approvals as may be required. As a result, the economic fallout from the spread of the COVID 19 virus may impact the Issuer's business prospects, financial condition, result of operations and credit risk. While, the Issuer will monitor the developments of the COVID19 situation closely, assess and respond proactively to minimize any adverse impacts on the financial position and operating results of the Issuer, it is possible that the Issuer's business, financial condition and results of operations could be adversely affected due to the COVID19 pandemic. There can be no assurance that this lockdown will not be extended further on one or more occasions either locations specific or countrywide. Further, even in cases where the lockdown is relaxed or proposed to be relaxed, it is likely that partial lockdown will continue for longer in red COVID 19 zones in India. We are uncertain about when such partial or complete lockdown will be lifted across India and the world. If the COVID 19 situation persists or worsens, it may adversely impact the Issuer's financial condition. The COVID19 virus pandemic is adversely affecting, and is expected to continue to adversely affect, some of our operations, business, liquidity and cashflows. However, the extent of negative financial impact cannot be reasonably estimated at this time but a sustained economic slowdown may significantly affect our business, financial condition, liquidity, cashflows and results of operations and the same will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the COVID19 virus and the actions to contain the COVID19 virus or treat its impact, among others. Consequently, there may be a negative effect on the Company's ability to service the obligations in relation to the Debentures.

f) No affiliation with issuers/publishers of underlying assets:

The Issuer or its subsidiaries may presently or from time to time engage in business with any issuer of the underlying shares, or any specified entity, including entering into loans with, or making equity investments in, such issuer of the underlying shares, or specified entity, or its affiliates or subsidiaries or providing investment advisory services to the issuer of the underlying shares, or specified entity, including merger and acquisition advisory services. Moreover, the Issuer does not have the ability to control or predict the actions of the issuer of the underlying shares, index publisher, or specified entity, including any actions, or reconstitution of index components, of the type that would require an adjustment of the payout to the investor at maturity. The issuer of the underlying shares, index publisher, or specified entity, for any issuance of Debentures is not involved in the offering of the Debentures in any way or has any obligation to consider the Debenture Holder's interest as an owner of the Debentures in taking any corporate actions that might affect the value of the Debentures. None of the money a Debenture Holder pays for the Debentures will go to the issuer of the underlying shares, or specified entity, for such Debentures.

g) Volatility Risk:

The equity markets and Derivative markets are volatile and the value of Securities, Derivative contracts and other instruments correlated with the equity markets may fluctuate dramatically from day to day. This volatility may cause the value of investment in

the Scheme to decrease.

h) Risks Associated with Equity Investments:

The equity markets and Derivative markets are volatile and the value of Securities, Derivative contracts and other instruments correlated with the equity markets may fluctuate dramatically from day to day. This volatility may cause the value of investment in the Scheme to decrease.

i) Investment in the Debentures which are linked to shares is not the same as investing directly in the shares :

An investment in the Debentures which are linked to shares is not an investment directly in the shares themselves. An investment in the Debentures entitles the holder to certain cash payments calculated by reference to the shares to which the Debentures are linked.

The Debenture Holder will have no beneficial interest in the shares or basket of shares constituting the index to which the Debentures are linked and accordingly will not have voting rights in those shares.

The Debenture Holders will not have the right to receive the underlying shares or basket of shares and thus will not be able to dispose of some but not all of such shares at any point in time. Subject to the applicable conditions of the Debentures, the Debenture Holder may have no right to receive dividends or other distributions. The Debentures will not represent a claim against the company of any shares, and, in the event of any loss, a Debenture Holder will not have recourse under the Debentures against such companies, or against any securities issued by such companies.

Similarly, the Debenture Holders will not have the right to receive the stocks underlying the Debentures at any point in time.

In the case of Debentures relating to shares, no issuer of such shares will have participated in the preparation of the Disclosure Document or in establishing the terms of the Debentures and the Company will not make any investigation or enquiry in connection with such offering with respect to the information concerning any such Company contained in the Disclosure Document or in the documents from which such information was extracted. Consequently, there can be no assurance that all events occurring prior to the relevant Deemed Date of Allotment (including events that would affect the accuracy or completeness of the publicly available documents described in this paragraph that would affect the trading price of the share will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the Company of such share could affect the trading price of the share and therefore the trading price of the Debentures.

Moreover, the Company has no ability to control or predict any actions of the issuer of such shares, including any corporate actions of the type or redemption that would require the Company to adjust the payment to the Debenture Holders upon exercise of the Debentures. The issuer of such shares is not involved in the offering of the Debentures in any way and has no obligation to consider a Debenture Holder's interest in a Debenture in taking any corporate actions that might affect the value of the Debentures.

j) Material changes in regulations to which the Company is subject

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently NBFCs not accepting public deposits are exempt from many provisions. In addition, the Company is generally subject to changes in Indian law, as well as to changes in regulations and policies and accounting principles. The RBI also requires the Company to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including the provisioning for NPAs or capital adequacy requirements could adversely affect the profitability of the Company or its future financial performance by requiring a restructuring of its activities, increasing costs or otherwise. The Company is subject to certain statutory, regulatory, exposure and prudential norms and this may limit the flexibility of the Company's loans, investments and other products.

FOR UNDERLYING G-SEC PRICE AS MENTIONED IN THE SUMMARY TERM SHEET

Disclaimer for underlying G-Sec Price as mentioned in the Summary Term Sheet

1. Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. The Central and State Governments are the issuers of the local currency debt. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since these securities carry minimal risks, they may command lower yields. The performance may be affected by Page 51 Edelweiss Finance & Investments Limited For Private Circulation Only changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems

2. The return on an investment in the Debentures (which are linked with G-secs) may differ from the return an investor might earn on a direct investment in the security over a similar period.

3. The terms of the instrument specify that the payments to investors will not be fixed, and will be linked to an external variable i.e. closing clean price of underlying as specified in the summary term sheet, as published by Financial Benchmarks India Private Limited on www.fbil.org.in. This could result in variability in payments - because of adverse movement in value of the external variable. The risk of such adverse movement in price / value is not addressed by any rating.

4. An investment in the Debentures involves multiple risks and such investment should only be made after assessing the direction, timing and magnitude of potential future changes in the value of the underlying G-Sec price specified in the summary term sheet ("underlying G-Sec price").

5. The Issuer does not represent or warranties or ensures of accuracy or completeness, timeliness, reliability, fitness for a particular purpose or merchantability of any part of the underlying G-Sec price.

6. In no event shall the company be liable for any loss, cost or damage arising out of or related to the access or use of any part of the underlying G-Sec price.

7. Notwithstanding anything herein contained the Issuer shall not bear responsibility or liability for any losses arising out of any delay in or interruptions of performance of the underlying G-Sec Price or the Issuer's obligations under this Disclosure Document due to any Force Majeure Event, act of God, act of governmental authority, act of the public enemy or due to war, the outbreak or escalation of hostilities, riot, fire, flood, civil commotion, insurrection, labour difficulty (including, without limitation, any strike, or other work stoppage or slow down), severe or adverse weather conditions, communications line failure, or other similar cause beyond the reasonable control of the Issuer.

8. The Issuer accepts no responsibility for the accurate extraction, reproduction and summary of any information relating to underlying G-Sec price. No further or other responsibility in respect of such information is accepted by the Issuer. Purchasers of the Debentures should ensure that they understand the nature of the Debentures and the extent of their exposure to risk and that they consider the suitability of the Debentures as an investment in the light of their own circumstances and financial condition. The performance of the underlying G-sec price will therefore affect the nature and value of the investment return on the Debentures. Also a relatively small movement in the value of the underlying G-sec price can result in a disproportionately large movement in the price of the Debentures. Purchasers should conduct their own investigations and, in deciding whether or not to purchase Debentures, purchasers of the Debentures should form their own views of the merits of an investment related to the underlying G-sec price as based on such investigations and not in reliance on any information given in this Disclosure Document.
