**ANNEXURE 3B**  
**RISK FACTORS**

**Internal Risk Factors**

**(a) Debenture Redemption Reserve**

No debenture redemption reserve is being created for the present issue of NCDs.

Per Rule 18(7) of the Companies (Share Capital and Debentures) Regulations, 2018, issued by the vide G.S.R 265(E) dated March 31, 2018, NBFCs registered with the RBI under Section 45-IA of the RBI (Amendment) Act, 1997, need not create a debenture redemption reserve for an issue of privately placed debentures.

**(b) Credit Risk**

The Company carries the risk of default by borrowers and other counter-parties.

Any lending and investment activity is exposed to credit risk arising from the risk of repayment default by the borrowers and counter-parties. The Company has institutionalized a systematic credit evaluation process monitoring the performance of its asset portfolio on a regular and continual basis to detect any material development, and also constantly evaluates the changes and developments in sectors to which it has substantial exposure. The Company also undertakes a periodic review of its entire asset portfolio with a view to determine the portfolio valuation, identify potential areas of action and devise appropriate strategies thereon. In addition, the Company follows a conservative provisioning and write-off policy, which is in line with what is prescribed by the RBI.

**(c) Contingent Liabilities**

Company's contingent liabilities could adversely affect its financial condition.

**(d) NPAs**

*Akshita Agarwal*

*[Signature]*

If the level of NPAs in the Company's portfolio were to increase, its business would suffer. The Company believes that its overall financial profile, capitalization levels and risk management systems provide significant risk mitigation.

**(e) Interest Rate Risk**

The Company's business is also dependent on interest income from its operations.

The Company is exposed to interest rate risk principally as a result of lending to customers at interest rates and in amounts and for periods, which may differ from its funding sources (bank borrowings and debt offerings). The Company seeks to match its interest rate positions to minimise interest rate risk. Despite these efforts, there can be no assurance that significant interest rate movements will not have an effect on its results of operations. Interest rates are highly sensitive to many factors beyond its control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility.

**(f) Access to Capital Markets and Commercial Borrowings**

The Company's growth will depend on its continued ability to access funds at competitive rates.

With the growth of its business, the Company is increasingly reliant on funding from the debt capital markets and commercial borrowings. The market for such funds is competitive and its ability to obtain funds at competitive rates will depend on various factors including its ability to maintain its credit ratings. While its borrowing costs have been competitive in the past due to its credit rating and the quality of its asset portfolio, if the Company was unable to access funds at an effective cost that is comparable to or lower than its competitors, the Company may not be able to offer competitive interest rates for its loans. This may adversely impact its business and its future financial performance. The value of its collateral may decrease or the Company may experience delays in enforcing its collateral when its customers default on their obligations to us, which may result in failure to recover the expected value of collateral and adversely affect its financial performance.

**(g) Operational and Systems Risk**

The Company is faced with operational and systems risks, which may arise as a result of various factors viz. like improper authorisations, inappropriate documentation, failure in maintenance of proper security policies, frauds, inadequate training and employee errors. Further, there can also be a strike, lock-out, an obligation of the Company becoming illegal or impossible in whole or in part, or any breakdown, failure or malfunction beyond the control of the Company of any telecommunication or computer system including, without limitation, unavailability of any communication system, systems

outages breakdowns, breach or virus in the processes or payment and delivery mechanism, security risk in terms of handling information technology related products which involve risks like computer hacking, unauthorised access to computer data and storage devices, computer crashes, data loss, breach of confidentiality, network security, etc.

**(h) Credit Risk of Company**

While the repayment of sums due at maturity is provided by the Company, investors should be aware that receipt of any coupon payment and principal amount at maturity on the Debentures is subject to the credit risk of the Company. Investors assume the risk that the Company will not be able to satisfy their obligations under the Debentures and the investor may or may not recover all or part of the principal amount in case of default by the Company. Any stated credit rating of the Company reflects the independent opinion of the referenced rating agency as to the creditworthiness of the rated entity but is not a guarantee of credit quality of the Company. Any downgrading of the credit ratings of the Company or its parent or affiliates, by any rating agency could result in a reduction in the value of the Debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Company, the payment of sums due on the Debentures may be substantially reduced or delayed.

**(i) Potential Conflicts of Interest**

Investors should ensure that they understand and accept the identities of the parties and the roles they play in relation to the Debentures, as disclosed in this Offer Document.

The Company and its affiliates have no obligation to disclose such information or activities; provided that the Company will make every good faith effort not to take advantage of any price-sensitive information. By purchasing or holding any Debentures, the Debenture Holder acknowledges that the Company, its affiliates and their respective officers and respective directors may engage in any such activities without regard to the Offer Document or the effect that such activities may directly or indirectly have on the Debentures and the Debenture Holder irrevocably waives any claim that it may have in respect thereof.

**External Risk Factors**

**a. Material changes in regulations to which the Company is subject could cause the Company's business to suffer**

Private Placement Offer Letter PAS-4  
Clix Capital Services Private Limited-Non-Convertible Debentures

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently, NBFCs not accepting public deposits are exempt from most such provisions. In addition, the Company is subject generally to changes in Indian law, as well as to changes in government regulations and policies and accounting principles. The RBI also requires the Company to make provisions in respect of NPAs. The provision made is equal to or higher than that prescribed under the prudential norms. Any changes in the regulatory framework affecting NBFCs, including the provisioning for NPAs or capital adequacy requirements, could adversely affect the profitability of the Company or its future financial performance, by requiring a restructuring of its activities, increasing costs or otherwise.

In addition, the Company is subject generally to changes in Indian law as well as to changes in government regulations and policies and accounting principles.

**b. Risk of competition in lending and resource raising could cause the Company's business to suffer**

Despite increasing competition, the Company has already established a strong presence in the securities market. Currently, the business operations of the Company mainly focus on investment activities, etc. The Company may also engage in providing credit in all forms in various markets. The management believes that the Company's brand equity, reach and strategic alliances along with its resource base would provide the necessary strength to perform well in a competitive market.

**c. A slowdown in economic growth in India could cause the Company's business to suffer**

The Company's performance and the quality and growth of its assets are necessarily dependent on the health of the overall Indian economy. A slowdown in the Indian economy could adversely affect its business, including its ability to grow its asset portfolio, the quality of its assets and its ability to implement its strategy. India's economy could be adversely affected by a general rise in interest rates or various other factors affecting the growth of industrial, manufacturing and services sector or general down trend in the economy.

**d. Political instability or changes in the government could delay further liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact the Company's financial results and prospects**

Since 1991, successive Indian governments have pursued policies of economic liberalization. The role of the central and state governments in the Indian economy as producers, consumers and regulators has remained significant. The leadership of India has changed a number of times since 1991. The current central government, which came to power in May 2014, is led by the Bharatiya Janata Party in coalition with several political parties. Although the current government has announced policies and taken initiatives that support the economic liberalization policies that have been pursued

by previous governments, the rate of economic liberalization may be affected by the coalition nature of the government. If there was to be any slowdown in the economic liberalisation, or a reversal of steps already taken, it could have an adverse effect on the Company's business. Financial difficulties and other problems in certain financial institutions in India could cause the Company's business to suffer. The Company is exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties, trends and problems faced by certain Indian financial institutions. The problems faced by individual Indian financial institutions and any instability in, or difficulties faced by, the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect the Company's business, its future financial performance and business prospects.

**e. Terrorist and other acts of violence or war involving India and other countries could adversely affect the financial markets and the Company's business**

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, adverse social, economic and political events in India could have a negative impact on the Company. Such incidents could also create a perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on the Company's business.

**f. Market Risk (Product Demand) and Force Majeure Events**

The Company is in the business of providing of financial services. The overall demand for the Company's products is linked to the macroeconomic parameters like GDP growth, capital markets and liquidity. Any adverse movement on these factors will have an adverse impact on the business of the Company. The performance may also be affected by political and economic developments and natural disasters like earthquakes, flood, drought, act of God, etc. These factors may affect the capital markets as well as reliability of the Company's assets. Interest rate volatility exposes the Company to market risks arising out of maturity rate/ interest rate mismatches, which may have an impact on its financial results.

**g. Legality of Purchase**

A prospective investor into the Debentures will be responsible for the lawfulness of the acquisition of the Debentures, whether under the laws of the jurisdiction of its incorporation or the jurisdiction in which it operates or for compliance by that prospective investor with any law, regulation or regulatory policy applicable to it.

**h. Taxation**
