CREDIT RATING

“CRISIL PP-MLD AAr/Stable” (pronounced “CRISIL PP-MLD double A r rating with stable outlook”) by CRISIL Limited for Rs. 500 Crores Long Term Principal Protected Market Linked Debenture issue. Instruments with this rating are considered to have high degree of safety regarding timely servicing of financial obligations. Such instruments carry very low credit risk. A prefix of ‘PP-MLD’ indicates that the instrument is a principal-protected market linked debenture. The terms of such instruments indicate that while the issuer promises to pay back the face value/principal of the instrument, the coupon rates of these instruments will not be fixed, and could be linked to one or more external variables such as commodity prices, equity share prices, indices, or foreign exchange rates. The ‘r’ suffix indicates that payments on the rated instrument have significant risks other than credit risk. The terms of the instrument specify that the payments to investors will not be fixed, and could be linked to one or more external variables such as commodity prices, equity indices, or foreign exchange rates. This could result in variability in returns because of adverse movement in value of the external variables, and/or possible material loss of principal on early redemption of the instrument. The risk of such adverse movement in price/ value is not addressed by the rating. CRISIL reserves the right to suspend, withdraw, or revise the rating/ outlook assigned at any time, on the basis of new information, or unavailability of information or other circumstances which CRISIL believes may have impact on the rating.

The details of Valuation Agent and the website link of the Valuation Agent where the Valuations shall be available will be communicated by the Issuer to the Debenture holder. Such communication shall form part of this Disclosure Document. The Valuation Agent will publish the valuation on its website at least once every calendar week. The valuation of the Debentures shall be available at <https://www.edelweissfin.com/web/edelweiss/investor-relation/valuations-of-structured-products-ncds> and on the website of the Valuation Agency within 7 Working Days from Deemed Date of Allotment. However, as a matter of a good practice, Company may

examine transactions/clients that may fall under “suspicious transactions” category as defined under Prevention of Money Laundering Act, 2002 and seek further information from the clients.

18. MANAGEMENT’S PERCEPTION OF RISK FACTORS

Potential investors should consider carefully all the risk factors in this Disclosure Document for evaluating the Issuer and its business and the Debentures before making any investment decision relating to the Debentures. Unless the context requires otherwise, the risk factors described below apply to the Issuer only. If any one of the following stated risks actually occurs, the Issuer’s business, financial conditions and results of operations could suffer and, therefore, the value of the Issuer’s Debentures could decline.

Unless specified or quantified in the relevant risk factors, the Issuer is not in a position to quantify the financial or other implications of any risk mentioned herein below:

a) Early Termination for Extraordinary Reasons, Illegality and Force Majeure :

If the Issuer determines that, for reasons beyond its control, the performance of its obligations under the Debentures has become illegal or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Debentures for any reason, the Issuer may at its discretion and without obligation terminate early the Debentures. If the Issuer terminates early the Debentures, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Debenture an amount determined by the Calculation Agent/Issuer.

b) Interest Rate Risk:

Interest Rate Risk (Company specific): Since EFPL is engaged in lending and financing activities, its business and income will largely be dependent on interest income from its operations. Interest rates are highly sensitive to many factors, including the monetary policies of RBI, deregulation of the financial sector in India, domestic and International economic and political conditions, inflation and other factors beyond the control of EFPL. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility. There can be no assurance that significant interest rate movements will not have an effect on the results of its operations.

Interest Rate Risk on Bonds/ Government securities:

Bonds/ Government securities which are fixed return securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI, the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds/ Government securities are also influenced by the liquidity in the financial system and/or the open market operations (OMO) by RBI. Pressure on exchange rate of the rupee may also affect security prices. Such rise and fall in price of bonds/ government securities may influence valuations as and when such changes occur.

c) Changes or discontinuance of the Underlying:

Changes in the Underlying and factors which either affect or may affect the value of the Underlying, may affect the return on an investment in the Debentures. In case of the regulators or the authorized bodies discontinuing or restricting the use of the benchmark/underlying, the Issuer will be bound to take necessary action as may be

prescribed by the regulators or the authorized body or as may be required by the law or as may be required to accommodate the situation

d) Credit Risk:

Any lending and investment activity by the Issuer is exposed to credit risk arising from repayment default by borrowers and other counterparties. The Issuer has a systematic credit evaluation process to monitor the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluate the changes and developments in sectors in which it has substantial exposure and to take timely appropriate remedial actions. The Issuer also undertakes periodic reviews of its entire asset portfolio with a view to determine the portfolio valuation identify potential areas of action and devise appropriate strategies thereon. Despite these efforts, there can be no assurance that repayment default will not occur and in such circumstances may have an effect on its results of operations. The principal amount is subject to the credit risk of the Issuer whereby the investor may or may not recover all or part of the funds in case of default by the Issuer.

e) Returns on Debentures are subject to Model Risk:

Returns on the Debentures are based on complex mathematical models involving multiple derivative exposures which may or may not be hedged and the actual behavior of the Underlying Reference Index selected for hedging may significantly differ from returns predicted by the mathematical models.

f) Increasing competition from banks, financial institutions and NBFCs

The successful implementation of Issuers growth plans depends on its ability to face the competition. The main competitors of the Issuer are NBFCs, financial institutions and banks. The Issuer does not have access to large quantities of low cost deposits because of which it may become less competitive. Many of its competitors have significantly greater financial, technical, marketing and other resources. Many of them also offer a wider range of services and financial products than the Issuer does and have greater brand recognition and a larger client base. As the Issuer ventures into offering newer products, it is likely to face additional competition from those who may be better capitalised, have longer operating history and better management. If the Issuer is unable to manage its business and compete effectively with current or future competitors it might impede its competitive position and profitability.

g) Downgrading in Credit Rating

For long term borrowings through NCDs the following Rating has been assigned –

CRISIL - “CRISIL PP-MLD AAr/Stable” (pronounced “CRISIL PP-MLD double A r rating with stable outlook”)

The Issuer cannot guarantee that this rating will not be downgraded. In the event of deterioration in the financial health of the Issuer, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. Such a downgrade in the credit rating may lower the value of the Debentures and may also result in the Issuer having to withdraw this borrowing programme.

h) Security may be insufficient to redeem debentures

In the event that the company is unable to meet its payment and other obligations towards investors under the terms of the debentures, the Debenture Trustee may enforce the security as per the terms of security documents, and other related documents. The Debenture Holder(s)' recovery in relation to the debentures will be subject to (a) the market value of such secured property, (b) finding willing buyer for the security at a price sufficient to repay debenture holder(s)' amounts outstanding under the debentures. The value realized from the enforcement of the security may be insufficient to redeem the debentures.

i) Repayment is subject to the credit risk of issuer

Potential investors should be aware that receipt of the principal amount, (i.e. the redemption amount) and any other amounts that maybe due in respect of the debentures is subject to the credit risk of the Issuer. Potential investors acknowledge the risk that the issuer may not be able to satisfy their obligations under the debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the issuer, the payment of sums due on the debentures may not be made or may be substantially reduced or delayed.

EXTERNAL RISK FACTORS

a) The Debentures may be illiquid

The Company intends to list the Debentures on the WDM segment of the BSE. The Company cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange(s) and that there would be any market for the Debenture(s). It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

b) A slowdown in economic growth in India

A slowdown in the Indian economy / GDP may adversely affect Company's business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general down trend in the economy. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact the Company's ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available.

c) Material changes in regulations to which the Company is subject

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently NBFCs not accepting public deposits are exempt from many provisions. In addition, the Company is generally subject to changes in Indian law, as well as to changes in regulations and policies and accounting principles. The RBI also requires the Company to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including the provisioning for NPAs or capital adequacy requirements could adversely affect the profitability of the Company or its future financial performance by requiring a restructuring of its activities, increasing costs or otherwise. The Company is subject to certain statutory, regulatory, exposure and prudential norms and this may limit the flexibility of the Company's loans, investments and other products.

d) Conditions in the Indian Debt market may affect the coupon on the Debentures.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. The Central and State Governments are the issuers of the local currency debt. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since these securities carry minimal risks, they may command lower yields.

The performance may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies

e) Conditions in the Indian Equity market may affect the coupon on the Debentures.

Applicable to Index Linked product:

The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected, thereby affecting the indices.

The security forming part of the Index must be domiciled in India and shall be available for futures trading on the NSE. The pre-defined universe of securities is segregated into 6 distinct buckets (equity allocation) and 1 optional bucket (cash allocation) (both identified upfront). Within the buckets, the securities are categorized as Category A security, Category B security. The selection criteria of the securities forming part of the Index are as follows:

- Each bucket has a minimum weight of 10% and a maximum weight of 30% in the Index.
- Each Category A security has a maximum weight of 8.00% in the Index.

Any increase or decrease in Index weights due to change in underlying futures prices is acceptable even if they breach the above minimum/maximum weights.

At all points of time, the overall exposure through securities (including the Optional bucket) in the Index will add up to 100%.

Index Reconstitution:

The Index will be an actively/dynamically managed portfolio of securities by the Index Administrator. The Index Administrator has the flexibility to switch securities in the Index and substitute them with any other security / securities from the pre-defined universe of securities subject to selection criteria as defined above.

Intimation of such changes needs to be made by the Index Administrator before 12 noon on the day of change to IISL. Any intimation received post the cut-off time of 12 noon can be rejected by IISL at its sole discretion.

Security wise criteria at the time of reconstitution to be handled by Index Administrator –

- (ii) If the Index Administrator chooses to exit from a security / group of securities from a specific bucket with current bucket weight greater than the minimum weight of 10%, then the security/securities being replaced can be from any of the buckets subject to bucket weight still remaining at least 10%.
- (iii) If at the time of Index reconstitution, the current weight of any specific bucket is more than 30% in the Index, then the security/securities can be replaced within the same bucket wherein the overall bucket weight does not exceed the previous day weight

Security wise criteria at the time of reconstitution to be handled by Index Administrator -

- (i) If at the time of Index reconstitution, the current weight of any Category A security is more than 8.00% in the Index, then there cannot be any further allocation to the said Category A security. However, it can continue with such higher weight and there is no requirement of rebalancing the same.
- (ii) If at the time of Index reconstitution, the current weight of any Category B security is more than 5.00% in the Index, and then there cannot be any further allocation to the said Category B security. However, it can continue with such higher weight and there is no requirement of rebalancing the same.

Index Maintenance –

Maintaining the ASK High Conviction Index by IISL includes daily end-of-day computation, weights at security and bucket level, and completing the adjustments for additions and deletions of securities after considering index costs, effect of corporate actions on the underlying security viz. bonus, stock splits, etc. Corporate actions such as splits, rights offerings, and share changes are applied on the ex-date of underlying security.

For certain special corporate actions like demerger, merger etc. where the futures contract of the underlying security is not available for trading after the corporate action date (effective date) (as intimated by NSE) or where the futures contract is mandatorily settled to give effect of the corporate action announced by the Company (effective date) (as intimated by NSE), the Index Administrator should intimate IISL at least 1 working day prior to such effective date to substitute such security with any other security / securities from the pre-defined universe of securities subject to selection criteria as defined above. This is also applicable in conditions where the underlying security forming part of the Index is moving out of the equity derivatives segment. All such securities will be also moving out of the pre-defined universe of securities identified by the Index Administrator.

For all other corporate actions as defined in: https://www.nseindia.com/products/content/derivatives/equities/adjust_in_case_corp.htm, adjustment to index values may need to be considered similar to those applied to derivatives contracts listed on the NSE.

If the portfolio shared by ASKIM is not in line with Agreed Methodology in terms of weights based on current day close price, then the previous day portfolio will be valid and index will be calculated based on old portfolio at END OF DAY. The same observation will be shared with ASKIM at END OF DAY.

Index Calculation Methodology –

The methodology / inputs for daily calculation of the ASK High Conviction Index will be as under:

- Base Value of the Index will be 1,000 on day 1
- Total cost charged to Index :
 - o Index management charge – (2.50% p.a. * 1.18) charged daily (calculated as $((2.50\% * 1.18) / 365)$ on the Index Value
 - o Transaction cost – $(0.20\% * 1.18)$ (Not applied on base date).
- Daily accrual rate on Optional bucket is 3.50%/365
- Calculation of Portfolio Value (PV) :
 - o Closing price of Near-month futures contract of the underlying security (please note that on the futures expiry dates the settlement price of the underlying security will be considered) (A)
 - o No. of units (after adjusting for the daily index management charge and transaction cost except for base date) as arrived basis the weights assigned by the Index Administrator to each security (B)

No. of units for each Index constituent will also be adjusted downwards to the extent of 6 bps (absolute) on the next working day after the expiry of the futures & options contract.

In case of any weight assigned to the Optional Bucket, the number of units will be increased to the extent of the daily accrual rate as defined above

- o Portfolio Value = A x B
- Calculation of Net Return (t) :
 - o $PV_t^A / PV_{t-1} - 1$
- Index Value (t) : Index Value (t-1) * (1+ Net Return (t))

^ This is after considering the portfolio adjustment required for the total costs as described above.
