Risk Factors

The Issuer believes that the following factors may affect its ability to fulfil its obligations in relation to the Debentures. These risks may include, among others, business aspects, equity market, bond market, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Prospective investors should carefully consider all the information in this Document, including the risks and uncertainties described below, before making an investment in the Debentures. As the Issuer has grown into one of the most diversified non-bank in the country, it is susceptible to some internal and external risk which are inherent in the lending business. All of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

- Adverse outcome in various legal, regulatory and other proceedings from time to time, which may have a material adverse effect. In the ordinary course of business, the Issuer, its subsidiaries, promoters, directors, officers, employees and other related parties are involved from time to time in legal and regulatory proceedings of varied nature. There may be several instances where the claim against us is not ascertainable, individually or in the aggregate. An adverse determination in any matter or in several matters collectively, may have a material adverse effect, including pursuant to consequential claims.
- Risks relating to the Debentures and the Issue: The trading price of the Debentures will be subject to interest rate risk. The Debentures carry a fixed rate of interest. Securities where a fixed rate of interest is offered are subject to price risk. The prices of such securities are inversely proportionate to changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall, and, when interest rates drop, prices of such securities increase. The extent of price fluctuation is a function of the existing interest, days to maturity and the increase or decrease in prevailing interest rates. Any increase in interest rates may negatively affect the price of the Debentures.
- In case of electronic book mechanism, the eligible investors/ bidders and the other participants (in its capacity as Electronic Book Provider) should be in compliance with the SEBI circular no., CIR/IMD/DF1/48/2016 dated April 21, 2016, SEBI FAQs issued on electronic book mechanism for issuance of debt securities on private placement basis.
- The Issuer reserves the right to reject a bid placed for the Debentures for any reason as it deems fit.
- An active trading market may not develop for the Debentures: The Debentures are new securities for which there is no existing trading market. It is not possible to predict if and to what extent a secondary market may develop, or at what price the Debentures will be sold or purchased in the secondary market or whether such market will be liquid or illiquid. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to redemption.
