SECTION II - RISK FACTORS

An investment in NCDs involves a certain degree of risk. You should carefully consider all the information contained in this Prospectus, including the risks and uncertainties described below, and the information provided in the sections titled "Our Business" on page 81 and "Financial Statements" on page F-1, before making an investment decision. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the NCDs. The following risk factors are determined on the basis of their materiality. In determining the materiality of risk factors, we have considered risks which may not be material individually but may be material when considered collectively, which may have a qualitative impact though not quantitative, which may not be material at present but may have a material impact in the future. Additional risks, which are currently unknown or now deemed immaterial, if materialise, may have a material adverse effect on our business, financial condition and results of operations in the future. The market prices of the NCDs could decline due to such risks and you may lose all or part of your investment including interest thereon.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. This Prospectus also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including events described below and elsewhere in this Prospectus. Unless otherwise stated, the financial information used in this section is derived from and should be read in conjunction with the Limited Review Financial Statements and the Reformatted Financial Statements.

Internal Risk Factors

1. Recent outbreak of the novel coronavirus could have a significant effect on our results of operations and could negatively impact our business, revenues, financial condition and result of operations.

An outbreak of a novel strain of coronavirus disease 19 ("**COVID-19**"), was recognised as a pandemic by the World Health Organization ("**WHO**"), on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as imposing country-wide lockdowns, restrictions on travel and business operations and advising or requiring individuals to limit their time outside of their homes. Temporary closures of businesses had been ordered and numerous other businesses have temporarily closed voluntarily. Further, individuals' ability to travel has been curtailed through mandated travel restrictions and may be further limited. Since May 2020 some of these measures have been lifted and partial travel has been permitted. Our Company is also unaware of when the nation-wide lockdown in India may be lifted.

The spread of COVID-19 may impact our Company's operations. The COVID-19 outbreak and the related preventive and protective actions had impacted our business through the temporary closure of all our branches. Pursuant to the government mandated lockdown we had to temporarily close all of our branch offices for approximately two months between March 2020 to May 2020. As a result, there was no customer traffic to our banches, which significantly reduced our sales and cash flows during the period. We continue to monitor developments closely as the COVID-19 pandemic develops. The impact of the COVID-19 pandemic on our business will depend on a range of factors which we are not able to accurately predict, including the duration, severity and scope of the pandemic, the geographies impacted, the impact of the pandemic on economic activity in India, and the nature and severity of measures adopted by governments. . Amongst various measures announced to mitigate the economic impact from the COVID -19, the Reserve Bank of India issued circulars dated March 27, 2020, April 17, 2020 and May 23, 2020 (the "**RBI circulars**") allowing lending institutions to offer a moratorium to customers on payment of instalments falling due between March 1, 2020 and August 31, 2020. Given that the COVID-19 and its impact remain a rapidly dynamic situation, the actual impact on our Company's loans and advances will depend on future developments, including, among other things, any new information concerning the severity of the COVID -19 and any action to contain its spread or mitigate its impact. While, our Company continue to monitor the developments of the COVID-19 situation closely, assess and respond proactively to minimize any adverse impacts on the financial position and operating results of our Company, it is possible that the Company's business, financial condition and results of operations could be adversely affected due to the COVID-19 pandemic. If the COVID-19 situation persists or worsens, it may adversely impact the Issuer's business and the financial condition.

2. We have been subject to an inspection by the RBI and any adverse action taken could affect our business

and operations.

As an NBFC, we are subject to periodic inspection by the RBI under Section 45N of the Reserve Bank of India Act, 1934 (the "**RBI Act**"), pursuant to which the RBI inspects our books of accounts and other records for the purpose of verifying the correctness or completeness of any statement, information or particulars furnished to the RBI. Any irregularities found during such investigations by such regulatory authorities could similarly, expose us to warnings, penalties and restrictions.

During the course of finalization of inspection, regulatory authorities share their findings and recommendations with us and give us an opportunity to provide justification and clarifications. Further, such regulatory authorities also seek certain clarifications and share their findings in the ordinary course of business. We have responded to observations made by such authorities and addressed them, however we cannot assure you that these authorities will not find any deficiencies in future inspections or otherwise/ the authorities will not make similar or other observations in the future. For instance, an inspection of our Company was conducted with reference to its financial position as on March 31, 2019, which was conducted during the period from September 16, 2019 to September 28, 2019 by RBI under Section 45N of the RBI Act. RBI has observed certain major supervisory concerns which inter alia include (i) divergence in the classification of NPAs and inadequate provision kept for rental loans and staff loan; (ii) Not fully complying with the income recognition and asset classification norms of RBI; (iii) non adherence of loan policy; (iv) mortgaged loans were extended without obtaining security; (v) sanctioned demand (business) loans for a period of 36 months, without recording any specific reasons, in contravention of Para (11)(2)(ii) of 'Master Direction – NBFC – NDSI' dated September 1, 2016; and (vi) the Company had obtained the membership from all the four credit information companies, but it was uploading the credit information only with CIBIL. Our Company *vide* its letter dated December 10, 2019 responded to RBI's observation and provided further compliances. Further, RBI *vide* its letter dated January 15, 2020 bearing reference number DoS(NBFC) (T) No/ 503/ 02.19.017/2019-20 directed our Company to submit further compliance along with documentary evidence in respect of its observations pursuant to the inspection. Our Company has *vide* its letter dated February 10, 2020 responded to RBI's observation and provided further compliance along with documentary evidence. Thereafter, RBI has provided further observation in response to our Company's reply filed on February 10, 2020 *vide* its letter dated February 27, 2020 stating that compliance on pending queries. Subsequently, RBI *vide* its letter dated March 05, 2020, advised our Company to open a separate escrow account for crediting the outstanding auction surplus amounts. RBI has provided further observation in response to our Company's reply filed on May 08, 2020 *vide* its letter dated May 21, 2020, advising to submit further compliance along with documentary evidence in respect of the pending observation. Subsequently, our Company *vide* it's letter dated June 18, 2020, responded to RBI's observation and provided further compliance. Thereafter, RBI provided further observation in response to our Company's reply *vide* its email dated July 02, 2020 stating that the compliance on the queries are pending. Our Company has replied *vide* letter dated March 21, 2014 to the RBI Letter amongst others submitting the requisite documents to RBI.

Further, the interest payable on the PDI outstanding was also classified by us as cumulative, which is not in accordance with the RBI Circular. Subsequently, our Company has dispensed with its liability pertaining to the accrued interests on the PDIs and have remitted the amount *vide* cheques to the respective investors. The RBI was also intimated of the said payment, *vide* a letter dated March 18, 2016. 4. ***We are subject to inspections by CDSL in our capacity as a depository participant and any adverse action taken by CDSL could affect our business and operations.***

As a depository participant, we are subject to periodic inspection by CDSL. For instance, CDSL conducted an inspection for the period between July 1, 2018 to June 30, 2019 and *vide* its inspection report dated July 23, 2019 observed certain discrepancies with respect to CKYC records and activation status of our Company's login credentials with FIU India and directed our Company to rectify the aforesaid discrepancies. 5. We are subject to restrictive covenants in certain short-term and long-term debt facilities provided to us by our lenders.

We have entered into agreements for availing financial facilities from various lenders. Certain covenants in these agreements require us to obtain approval / permission from our lenders in certain conditions. These conditions include, amongst others, implementation of any scheme of expansion / diversification / renovation / capital expenditure, formulation of any scheme of amalgamation or reconstruction, undertaking of guarantee obligation, any change in our capital structure. In the event of default or the breach of certain covenants, our lenders have the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business.

For further details in this regard, including approvals obtained from our lenders for this Issue, please refer chapter "*Financial Indebtedness*" on page 123.

6. Our ability to access capital also depends on our credit ratings. Any downgrade in our credit ratings would increase borrowing costs and constrain our access to capital and lending markets and, thus, would negatively affect our net interest margin and our business.

The NCDs proposed to be issued under this Issue for an amount of up to ₹35,000 lakhs was also assigned with 'BWR BBB+/ Stable' rating. Ratings reflect a rating agency's opinion of our financial strength, operating performance, strategic position, and ability to meet our obligations. Any, downgrade of our credit ratings would increase borrowing costs and constrain our access to debt and bank lending markets and, thus, would adversely affect our business. In addition, downgrading of our credit ratings could increase the possibility of additional terms and conditions being added to any new or replacement financing arrangements. For details regarding ratings received by our Company, please refer to "*Our Business - Our Borrowings and Credit Ratings*" on page 97.

7. Our Company, two of our Promoter Directors and one of our Group Companies are subject to certain legal proceedings and any adverse decision in such proceedings may have a material adverse effect on our business, financial condition and results of operations.

Our Company, two of our Promoter Directors and one of our Group Companies are subject to certain legal proceedings including civil suits, consumer litigations, tax litigations, trademark infringement suits etc. We incur substantial cost in defending these proceedings before a court of law. Moreover, we are unable to assure you that our Company, our Promoter Directors or our Group Company shall be successful in any or all of these actions. In the event we or our Promoter Directors suffer any adverse order, it may have an adverse impact on our reputation, business and results of operations. We cannot assure you that an adverse order by any statutory or governmental authority will not have a negative impact on our profit and financial condition. For further details of the legal proceedings that we are subject to, please refer to the chapter titled "*Outstanding Litigations*" beginning on page 200.

8. Most of the supporting documents in connection with the biographies of the directors included in the section "Our Management" of this Prospectus are unavailable.

Certain documents supporting the information included in this Prospectus with respect to previous work experience of the directors, disclosed in the sections titled "*Our Management*" on page 92 may not be available. Accordingly, reliance has been placed on declarations and undertakings furnished by such director to us and the Lead Managers to disclose details of their previous work experience in this Prospectus. We and the Lead Managers have been unable to independently verify these details prior to inclusion in this Prospectus. Further, there can be no assurances that our Director will be able to trace the relevant documents pertaining to their previous work experience in future, or at all.

9. Some of our Group Companies are enabled by their respective memorandums of association to undertake activities similar to the activities conducted by our Company which may be potential source of conflict of interest for us and which may have an adverse effect on our operations.

Our Promoter Directors are the sole shareholders and directors on the board of our Group Company, Kosamattam Nidhi Limited ("**KNL**"), which was incorporated on May 21, 2018 pursuant to a certificate of incorporation issued by the RoC, and can be expected to devote some of their time and resources to these

Group Companies. There can be no assurance that our Promoter Directors' role in KNL will not present any conflicts of interest or potential conflicts of interest.

Further, KNL has been registered as a 'nidhi company' in accordance with Section 406 of the Companies Act, 2013 and shall undertake the business of lending to its members. There are no non-compete agreements/arrangements between our Company and KNL. The memorandum of association of KNL entitles it to undertake and carry out businesses activities that are similar or related to our business. There can be no assurance that KNL will not provide comparable services, expand their presence or acquire interests in competing ventures in the locations in which we operate. As a result, a conflict of interest may occur between our business and the business of KNL, which could have an adverse effect on our operations.

10. Our Company was unable to trace certain secretarial records, including records pertaining to the allotment of Equity Shares acquired by our past shareholders prior to August 2004.

We have been unable to locate the copies of certain of our secretarial records, i.e. prescribed forms filed by us with the Registrar of Companies, including, among others, in respect of the allotment of Equity Shares from incorporation until August 2004. While we believe that these forms were duly filed on a timely basis, we have not been able to obtain copies of these documents, including from the Registrar of Companies. We cannot assure you that we will not be subject to any adverse action by a competent regulatory authority in this regard.

11. A major part of our branch network is concentrated in southern India and we derive majority of our revenue from southern India. Any breakdown of services in these areas could have a material and adverse effect on our results of operations and financial conditions.

We derive majority of our revenue from our 934 branches situated in southern India out of 960 of our total branches as on February 28, 2021. As a result, we are exposed to risks including any change in policies relating to these states, any localised social unrest, any natural disaster and any event or development which could make business in such states less economically beneficial. Any such risk, if materialises, could have a material adverse effect on the business, financial position and results of operations of our Company. For further details of our branch network within India, please refer to the chapter titled "*Our Business - Branch Network*" on page 92.

12. Our business is capital intensive and any disruption or restrictions in raising financial resources could have a material adverse effect on our liquidity and financial condition.

Our liquidity and ongoing profitability is largely dependent upon our timely access to and the costs associated in raising resources. Our funding requirements historically have been met from a combination of borrowings such as working capital limits from banks and issuance of secured and unsecured redeemable non-convertible debentures on private placement basis and public issues of secured and unsecured redeemable non-convertible debentures. Thus, our business depends and will continue to depend on our ability to access diversified low-cost funding sources.

Our ability to raise funds on acceptable terms and at competitive rates continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, developments in the international markets affecting the Indian economy, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition.

The crisis in the global credit market that began in mid-2007 destabilised the then prevailing lending model by banks and financial institutions. The capital and lending markets were highly volatile and access to liquidity had been significantly reduced. In addition, it became more difficult to renew loans and facilities as many potential lenders and counterparties also faced liquidity and capital concerns as a result of the stress in the financial markets. If any event of similar nature and magnitude occurs again in the future, it may result in increased borrowing costs and difficulty in accessing debt in a cost-effective manner. Moreover, we are a NBFC-ND-SI, and do not have access to public deposits.

The RBI has issued guidelines *vide* notification no. DBOD.BP.BC.No. 106/21.04.172/2011-12 on May 18, 2012 whereby it has instructed banks to (i) reduce their regulatory exposure on a single NBFC having gold loans to the extent of 50.00% or more of its financial assets from 10.00% to 7.50% of their capital funds; and (ii) have an internal sub-limit as decided by the boards of the respective banks on their aggregate exposure to

all such NBFCs having gold loans to the extent of 50% or more of their financial assets, taken together, which sub-limit should be within the internal limits fixed by banks for their aggregate exposure to all NBFCs taken together.

The RBI *vide* its circular RBI/2014-15/475 DNBS (PD) CC No.021/03.10.001/2014-15 dated February 20, 2015 issued certain guidelines with respect to raising money through private placement by NBFCs in the form of non-convertible debentures. These guidelines include restrictions on the minimum subscription amount for a single investor at ₹20,000, the issuance of private placement of NCDs shall be in two separate categories, those with a maximum subscription of less than ₹1 crore and those with a minimum subscription of ₹1 crore and above, the restriction of number of investors in an issue to 200 investors for a maximum subscription of less than ₹1 crore which shall be fully secured, there is no limit on the number of subscribers in respect of issuances with a minimum subscription of ₹1 crore and above while the option to create security in favour of subscribers will be with the issuers and such unsecured debentures shall not be treated as public deposits, restriction on NBFCs for issuing debentures only for deployment of funds on its own balance sheet and not to facilitate resource requests of group entities/parent company/associates, prohibition on providing loan against its own debentures, etc. This has resulted in limiting our Company's ability to raise fresh debentures on private placement basis.

A significant portion of our debt matures each year. Out of the total amount of our outstanding NCDs, ₹ 2,22,560.00 lakhs, issued by our Company as of December 31, 2020, NCDs amounting to ₹ 19,231.17 lakhs will mature on or before March 31, 2021. In order to retire these instruments, we either will need to refinance this debt, which could be difficult in the event of volatility in the credit markets, or raise equity capital or generate sufficient cash to retire the debt.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. As a NBFC, we also face certain restrictions on our ability to raise money from international markets, which may further constrain our ability to raise funds at attractive rates. Any disruption in our primary funding sources at competitive costs would have a material adverse effect on our liquidity and financial condition.

13. Our financial performance is primarily dependent on interest rate risk. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our company.

Our results of operations are substantially dependent upon the level of our Net Interest Margins. Income from operations is the largest component of our total income, and constituted 99.11%, 99.32%, 96.92% and 97.82% for the six months period ended on September 30, 2020 and for the Financial Years ended March 31, 2020, March 31, 2019 and March 31, 2018, respectively. Interest rates are sensitive to many factors beyond our control, including the RBI's monetary policies, domestic and international economic and political conditions and other factors.

Over the last several years, the Government of India has substantially deregulated the financial sector. As a result, interest rates are now primarily determined by the market, which has increased the interest rate risk exposure of all banks and financial intermediaries in India, including us.

Our policy is to attempt to balance the proportion of our interest earning assets, which bear fixed interest rates, with interest bearing liabilities. A significant portion of our liabilities, such as our NCDs carry fixed rates of interest. Moreover, we do not hedge our exposure to interest rate changes. We cannot assure you that we can adequately manage our interest rate risk in the future or can effectively balance the proportion of our fixed rate loan assets and liabilities. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways. Thus, our results of operations could be affected by changes in interest rates and the timing of any re-pricing of our liabilities compared with the re-pricing of our assets.

In a rising interest rate environment, if the yield on our interest earning assets does not increase at the same time or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not decline at the same time or to the same extent as the yield on our interest earning assets, our net interest income and net interest margin would be adversely affected.

14. We have had negative net cash flows from our operating, investing and financing activities in the recent

fiscal years. Any negative cash flows in the future may adversely affect our results of operations and financial condition.

We have had negative net cash flows from our operating, investing and financing activities in the last three fiscal years, the details of which are summarised below:

(in ₹ lakhs)

Particulars	Fiscal 2020	Fiscal 2019	Fiscal 2018
Net cash generated from/ (used in) operating activities	(8,628.70)	25,056.36	24,671.36
Net cash generated from/ (used in) investing activities	(1,666.66)	(2,016.76)	(6,409.18)
Net cash generated from/ (used in) financing activities	(1,908.56)	(20,156.14)	(16,065.31)

Any negative cash flows in the future may adversely affect our results of operations and financial condition. For further details, please see the sections titled "*Financial Statements*" on page F-1.

15. We face increasing competition in our business which may result in declining interest margins. If we are unable to compete successfully, our market share may also decline.

Our principal business is providing Gold Loan to customers in India secured by gold jewellery. Historically, the Gold Loan industry in India has been largely unorganised and dominated by local jewellery pawn shops and money lenders, with little involvement from public sector or private sector banks. Gold Loan financing was availed predominantly by lower income group customers with limited or no access to other forms of credit, however, such income group has gained increased access to capital through organised and unorganised money lenders, which has increased our exposure to competition. The demand for Gold Loans has also increased due to relatively lower and affordable interest rates, increased need for urgent borrowing or bridge financing requirements, the need for liquidity for assets held in gold and increased awareness and acceptance of Gold Loan financing.

All of these factors have resulted in increased competition from other lenders in the Gold Loan industry, including commercial banks and other NBFCs, who also have access to funding from customers' savings and current deposits. We are reliant on higher cost loans and debentures for our funding requirements, which may reduce our margins compared to competitors. Our ability to compete effectively will depend, to some extent, on our ability to raise low cost funding in the future. If we are unable to compete effectively with other participants in the Gold Loan industry, our business, financial condition and results of operations may be adversely affected. Furthermore, as a result of increased competition in the Gold Loan industry, Gold Loans are becoming increasingly standardised. Variable interest rates, variable payment terms and waiver of processing fees are also becoming increasingly common.

In our microfinance business, we face competition from other NBFCs, microfinance companies as well as both commercial and small finance banks. In addition, the RBI has set out guidelines applicable to microfinance institutions which restrict the number of microfinance institutions that can extend loans to the same borrower and also limit the maximum amount of loan that can be extended. The presence of microfinance institutions in India is not uniform and certain regions have a concentration of a large number of microfinance institutions while there are regions which have very few and even no microfinance institution presence. In any particular region, the level of competition depends on the number of microfinance institutions that operate in such area. In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest.

Our ability to compete effectively will depend, to an extent, on our ability to raise low-cost funding in the future as well as our ability to maintain or decrease our operating expenses by increasing operational efficiencies and managing credit costs. As a result of increased competition in the various sectors we operate in, products in our industry have become increasingly standardised and variable interest rate and payment terms and lower processing fees are becoming increasingly common across our products. There can be no assurance that we will be able to effectively address these or other finance industry trends or compete effectively with new and existing commercial banks, NBFCs, payment banks, other small finance banks and other financial intermediaries that operate across our various financing products.

In addition, the government has issued schemes such as Pradhan Mantri Jan-Dhan Yojana to ensure access to

financial services in an affordable manner. Further, public sector banks as well as existing private sector banks, have an extensive customer and depositor base, larger branch networks, and in case of public sector banks, Government support for capital augmentation, due to which they may enjoy corresponding economies of scale and greater access to low-cost capital, and accordingly, we may not be able to compete with them. An inability to effectively address such competition may adversely affect our market share, business prospects, results of operations and financial condition.

16. Volatility in the market price of gold may adversely affect our financial condition, cash flows and results of operations.

We extend loans secured mostly by household gold jewellery. A sustained decrease in the market price of gold could cause a corresponding decrease in new Gold Loans in our loan portfolio and, as a result, our interest income. In addition, customers may not repay their loans and the gold jewellery securing the loans may have decreased significantly in value, resulting in losses which we may not be able to support. The impact on our financial position and results of operations of a hypothetical decrease in gold values cannot be reasonably estimated because the market and competitive response to changes in gold values is not pre-determinable.

17. We may not be able to realise the full value of our pledged gold, which exposes us to potential loss.

We may not be able to realise the full value of our pledged gold, due to, among other things, defects in the quality of gold or wastage that may occur when melting gold jewellery into gold bars. We have in place an extensive internal policy on determining the quality of gold prior to disbursement of the Gold Loan. However, we cannot assure you that the methods followed by us are fool proof and the impurity levels in the gold can be accurately assessed.

In the case of a default, we may auction the pledged gold in accordance with our auction policy. We cannot assure you that we will be able to auction such pledged gold jewellery at prices sufficient to cover the amounts under default. Moreover, there may be delays associated with the auction process or other processes undertaken by us to recover the amount due to us. Any such failure to recover the expected value of pledged gold could expose us to a potential loss and which could adversely affect our financial condition and results of operations.

18. We may not be able to successfully sustain our growth strategy. Inability to effectively manage our growth and related issues could materially and adversely affect our business and impact our future financial performance.

Our income from operations increased from ₹34,191.10 lakhs in the Financial Year ended March 31, 2016 to ₹49,923.42 lakhs in the Financial Year ended March 31, 2020 thereby achieving compounded annual growth rate ("**CAGR**") of 9.92%. In this same period, the loan book increased from ₹1,47,240.42 lakhs for the Financial Year ended March 31, 2016 to ₹2,97,247.02 lakhs for the Financial Year ended March 31, 2020 at a CAGR of 19.20%.

Our growth strategy includes growing our loan book, expanding network of branches and expanding the range of products and services. We cannot assure you that we will be able to execute our growth strategy successfully or continue to achieve or grow at the levels of revenue earned in recent years, or that we will be able to expand further our loan book. Furthermore, there may not be sufficient demand for our services or they may not generate sufficient revenues relative to the costs associated with offering such services. Even if we were able to introduce new services successfully, there can be no assurance that we will be able to achieve our intended return on such investments.

Further principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. It also includes undertaking permission from various authorities, including RBI and various regulatory compliances. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure.

19. If we are not able to control the level of non-performing assets in our portfolio, the overall quality of our

loan portfolio may deteriorate and our results of operations may be adversely affected.

We may not be successful in our efforts to improve collections and/or enforce the security interest on the gold collateral on existing as well as future non-performing assets. Moreover, as our loan portfolio increases, we may experience greater defaults in principal and/or interest repayments. Thus, if we are not able to control our level of non-performing assets, the overall quality of our loan portfolio may deteriorate and our results of operations may be adversely affected. Our gross NPAs as of six months period ended September 30, 2020 and as of March 31, 2020, March 31, 2019 and March 31, 2018, were ₹4,411.48 lakhs, ₹4,330.32 lakhs, ₹4,840.32 lakhs and ₹2,201.43 lakhs, respectively.

The RBI Master Directions prescribe the provisioning required in respect of our outstanding loan portfolio. Should the overall credit quality of our loan portfolio deteriorate, the current level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets. Furthermore, although we believe that our total provision will be adequate to cover all known losses in our asset portfolio, our current provisions may not be adequate when compared to the loan portfolios of other financial institutions. Moreover, there also can be no assurance that there will be no further deterioration in our provisioning coverage as a percentage of gross non-performing assets or otherwise, or that the percentage of non-performing assets that we will be able to recover will be similar to our past experience of recoveries of non-performing assets. In the event of any further increase in our non-performing asset portfolio, there could be an even greater, adverse impact on our results of operations.

20. Our ability to lend against the collateral of gold jewellery has been restricted on account of guidelines issued by RBI, which may have a negative impact on our business and results of operation.

RBI *vide* the Master Directions has stipulated all NBFCs to maintain a loan to value (LTV) ratio not exceeding 75% for loans granted against the collateral of gold jewellery and further prohibits lending against bullion/primary gold and gold coins. This notification will limit our ability to provide loan on the collateral of gold jewellery and thereby putting us at a disadvantage vis-à-vis unregulated money lenders offering similar products. Further, RBI in the Master Directions, has mandated NBFCs primarily engaged in lending against gold jewellery (such loans comprising 50% or more of their financial assets) to maintain a minimum Tier 1 capital of 12%. Such restrictions imposed by RBI may erode our margins, impact our growth and business prospects.

RBI in the Master Directions further tightened the norms for lending against the security of gold ornaments by pegging the maximum lendable value (LTV) to 30 day moving average closing price of 22 carat gold quoted by India Bullion and Jewellers Association Limited (formerly known as Bombay Bullion Association Limited). Any such future restrictions by RBI could have a negative impact on our business and results of operation.

21. We are subject to certain restrictive covenants in our loan documents, which may restrict our operations and ability to grow and may adversely affect our business.

There are restrictive covenants in the agreements we have entered into with our lender. These restrictive covenants require us to seek the prior permission of these banks/financial institutions for various activities, including, amongst others, to declare dividend, for any change in the management/constitution, takeovers/mergers etc. or any expansion, new project/investment/acquiring assets under lease/enter into borrowing arrangements, to undertake any new project, or diversification, modernisation, amend or modify its Memorandum and Articles of Association/Bye Laws/Trust Deeds etc. For details of these restrictive covenants, see the chapter titled "*Financial Indebtedness*" beginning on page 123.

22. We are subjected to supervision and regulation by the RBI as a systemically important NBFC, and changes in RBI's regulations governing us could adversely affect our business.

We are subject to the RBI's guidelines on financial regulation of NBFCs, including capital adequacy, exposure and other prudential norms. The RBI also regulates the credit flow by banks to NBFCs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to NBFCs. The RBI's regulations of NBFCs could change in the future which may require us to restructure our activities, incur additional cost or could otherwise adversely affect our business and our financial performance. Through the Master Directions, RBI has amended the regulatory framework governing NBFCs to address concerns pertaining to risks, regulatory gaps and arbitrage arising from differential regulations and

aims to harmonise and simplify regulations to facilitate a smoother compliance culture among NBFCs.

As a systemically important non-deposit taking NBFC, our Company is required to maintain a capital adequacy ratio of at least 15.0% of our aggregate risk-weighted assets of our balance sheet (on-balance sheet and of risk adjusted value of off balance sheet items) on an ongoing basis. Our Company's capital adequacy ratio was 17.87% as of March 31, 2020. If we continue to grow our Total Credit Exposure and asset base, we will be required to raise additional capital in order to continue to meet applicable capital adequacy ratios with respect to our business. There can be no assurance that we will be able to raise adequate additional capital in the future on terms favourable to us or at all, which could result in non-compliance with applicable capital adequacy ratios and may adversely affect the growth of our business. Further, our Tier I capital comprising of 12.86% as of March 31, 2020. If we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to continue to meet applicable capital adequacy ratios and Tier I capital requirements with respect to our business of Gold Loans. There can be no assurance that we will be able to maintain adequate capital adequacy ratio or Tier I capital by raising additional capital in the future on terms favourable to us, or at all. Failure to maintain adequate capital adequacy ratio or Tier I capital may adversely affect the growth of our business.

Moreover, under the amendment, the threshold for defining systemic significance for NBFCs-ND has been revised in the light of the overall increase in the growth of the NBFC sector. NBFCs-ND-SI will henceforth be those NBFCs-ND which have asset size of ₹50,000 lakhs and above as per the last audited balance sheet. Moreover, as per the requirements of the Master Directions, all NBFCs-ND with assets of ₹50,000 lakhs and above, irrespective of whether they have accessed public funds or not, shall comply with prudential requirements as applicable to NBFCs-ND-SI. We cannot assure you that the Master Directions and its applicability to us will not have a material and adverse effect on our future financial conditions and results of operations.

Even though the RBI, has not provided for any restriction on interest rates that can be charged by non-deposit taking NBFCs, there can be no assurance that the RBI and/or the Government will not implement regulations or policies, including policies or regulations or legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that could have an adverse effect on non-deposit taking NBFCs. In addition, there can be no assurance that any changes in the laws and regulations relative to the Indian financial services industry will not adversely impact our business.

23. We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. These provisioning requirements may require us to reserve lower amounts than the provisioning requirements applicable to financial institutions and banks in other countries. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI *vide* the Master Directions provides for the regulatory framework governing NBFCs pertaining to provision for standard assets. The requirement to make a provision for standard assets has been set out in a phased manner over a period of three years, i.e., 0.40% by the end of March 31, 2018, 0.40% by the end of March 31, 2019 and 0.40% by the end of March 31, 2020.

There are multiple factors that affect the level of NPAs in our Company. Prominent among them are fall in value of gold, increase in the LTV ratio for gold loan etc.

The level of our provisions may not be adequate to cover further increases in the amount of our nonperforming assets or a decrease in the value of the underlying gold collateral. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, or if we are required to increase our provisions, this could have an adverse effect on our financial condition, liquidity and results of operations and may require us to raise additional capital.

24. Microfinance loans are unsecured and are susceptible to certain operational and credit risks which may result in increased levels of NPAs.

As of September 30, 2020 and March 31, 2020, our microfinance AUM were ₹273.47 lakhs and ₹273.85 lakhs, representing 0.08% and 0.09% of our aggregate AUM as of such date. Our microfinance customers

typically belong to the economically weaker sections and are diverse in nature, which include customers involved in income generating business activities, with limited sources of income, savings and credit records, and are therefore unable to provide us with any collateral or security for their loans. Such customers are at times unable to or may not provide us with accurate information about themselves which is required by us in connection with loans. Further, in case of emergencies like death of the borrower or the borrower's nominee, our microfinance borrowers are given a holiday period from payment of instalment on the outstanding borrowings which is later settled against payment received from the insurance companies.

In our microfinance business, we rely on non-traditional guarantee mechanisms rather than any tangible assets as security collateral. Our microfinance business involves a joint liability mechanism whereby borrowers form a joint liability group and provide guarantees for loans obtained by each member of such group. There can however be no assurance that such joint liability arrangements will ensure repayment by the other members of the joint liability group in the event of default by any one of them. Such joint liability arrangements are likely to fail if there is no meaningful personal relationship or bond among members of such group, if inadequate risk management procedures have been employed to verify the group members and their ability to repay such loans, or as a result of adverse external factors such as natural calamities and forced migration.

As a result, our micro finance customers potentially present a higher risk of loss in case of a credit default compared to that of customers in other asset-backed financing products. In addition, repayment of microfinance loans are susceptible to various political and social risks, including any adverse publicity relating to the microfinance sector accessing capital markets, public criticism of the microfinance sector, the introduction of a stringent regulatory regime, and/or religious beliefs relating to loans and interest payments, which adversely affect repayment by our customers and may have a material and adverse effect on our business prospects and future financial performance.

There can be no assurance that we will be able to maintain our current levels of NPAs. In addition, it is difficult to accurately predict credit losses, and there can be no assurance that our monitoring and risk management procedures will succeed in effectively predicting such losses or that our loan loss reserves will be sufficient to cover any such actual losses. As a result of the uncertain financial and social circumstances of our microfinance customers and the higher risks associated with lending to such customers, we may experience increased levels of NPAs and we may be required to make related provisions and write-offs that could have a material and adverse effect on our business prospects and financial performance.

25. Our microfinance business involves transactions with relatively high-risk borrowers that typically do not have access to formal banking channels, and high levels of customer defaults could adversely affect our business, results of operations and financial condition.

Our microfinance business involves lending money to smaller, relatively low-income entrepreneurs and individuals who have limited access or no access to formal banking channels, and therefore may not have any credit history and as a result we are more vulnerable to customer default risks including default or delay in repayment of principal or interest on our loans.

Some of our customers, especially the first-time borrowers, may not have any documented credit history, may have limited formal education, and are able to furnish very limited information for us to be able to assess their creditworthiness accurately. Consequently, we may not have past data on the customer's borrowing behaviour. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of any fraudulent misrepresentation on the part of our customers. It is therefore difficult to carry out credit risk analysis on our clients. Although we believe that our risk management controls are stringently applied and are sufficient, there can be no assurance that they will continue to be sufficient or that additional risk management strategies for our customers will not be required.

Further, our customers may default on their obligations as a result of various factors including bankruptcy, lack of liquidity and / or failure of the business or commercial venture in relation to which such borrowings were sanctioned. Although our microfinance business operates through a system of joint liability, we may still be exposed to defaults in payment, which we may not be able to recover in full. If our borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

26. Our ability to borrow from various banks may be restricted on account of guidelines issued by the RBI, imposing restrictions on banks in relation to their exposure to NBFCs. Any limitation on our ability to borrow from such banks may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

Under RBI Master Circular DBR.BP.BC.No.5/21.04.172/2015-16 on bank finance to NBFCs issued on July 1, 2015, the exposure (both lending and investment, including off balance sheet exposures) of a bank to a single NBFC engaged in lending against collateral of gold jewellery (i.e. such loans comprising 50% or more of its financial assets) should not exceed 7.5%, of its capital funds. Banks may, however, assume exposures on a single NBFC up to 12.5%, of their capital funds, provided the exposure in excess of 7.5% is on account of funds on-lent by the NBFC to the infrastructure sector. Further, banks may also consider fixing internal limits for their aggregate exposure to all NBFCs put together and should include internal sub-limit to all NBFCs providing Gold Loans (i.e. such loans comprising 50% or more of their financial assets), including us. This limits the exposure that banks may have on NBFCs such as us, which may restrict our ability to borrow from such banks and may increase our cost of borrowing, which could adversely impact our growth, business and financial condition.

27. Our Gold Loans are due within 12 months of disbursement, and a failure to disburse new loans may result in a reduction of our loan portfolio and a corresponding decrease in our interest income.

The Gold Loans we offer are due within a period of upto 12 months of disbursement. The relatively short-term nature of our loans means that we are not assured of long-term interest income streams compared to businesses that offer loans with longer terms. In addition, our existing customers may not obtain new loans from us upon maturity of their existing loans, particularly if competition increases. The short-term nature of our loan products and the potential instability of our interest income could materially and adversely affect our results of operations and financial position.

28. Inaccurate appraisal of gold by our personnel may adversely affect our gold loan business and financial condition.

The accurate appraisal of pledged gold is a significant factor in the successful operation of our business and such appraisal requires a skilled and reliable workforce. Inaccurate appraisal of gold by our workforce may result in gold being overvalued and pledged for a loan that is higher in value than the gold's actual value, which could adversely affect our reputation and business. Further, we are subject to the risk that our gold appraisers may engage in fraud regarding their estimation of the value of pledged gold. Any such inaccuracies or fraud in relation to our appraisal of gold may adversely affect our reputation, business and financial condition.

29. Exchange rate fluctuations may adversely affect our results of operations.

We provide foreign exchange services to our customers. Accordingly, we are exposed to risks associated with foreign exchange fluctuation. Any adverse fluctuation in foreign exchange rates could affect our results of operations.

30. Our branches are vulnerable to theft and burglary. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer and this may result in adverse effect on our financial condition and results of operations.

Storage of pledged gold jewellery as part of our business entails the risk of theft/burglary and resulting loss to our reputation and business. The short tenure of the loans advanced by us and our practice of processing loan repayments within short timelines require us to store pledged gold on our premises at all points in time. With regard to cases of theft/burglaries, we may not be able to recover the entire amount of the loss suffered and may receive only a partial payment of the insurance claim. While we are insured against the risk of burglary arising from our business, such insurance may not be sufficient to fully cover the losses we suffer. Further, the actual recovery of the insured amount from the insurer requires the undertaking of certain procedures, and any delay in recovery could adversely affect our reputation and results of operation.

31. The insurance coverage taken by us may not be adequate to protect against certain business risks. This may adversely affect our financial condition and result of operations.

Operating and managing a Gold Loan business involves many risks that may adversely affect our operations and the availability of insurance is therefore important to our operations. We believe that our insurance coverage is adequate to cover us. However, to the extent that any uninsured risks materialise or if it fails to effectively cover any risks, we could be exposed to substantial costs and losses that would adversely affect our financial condition. In addition, we cannot be certain that the coverage will be available in sufficient amounts to cover one or more large claims or that our insurers will not disclaim coverage as to any particular claim or claims. Occurrence of any such situation could adversely affect our financial condition and results of operations.

32. Our entire customer base comprises individual borrowers, who generally are more likely to be affected by declining economic conditions than larger corporate borrowers.

A majority of our customer base belongs to the low to medium income group. Furthermore, unlike many developed economies, a nationwide credit bureau has only recently become operational in India, so there is less financial information available about individuals, particularly our focus customer segment of the low to medium income group. It is therefore difficult to carry out precise credit risk analyses on our customers. While we follow certain procedures to evaluate the credit profile of our customers before we sanction a loan, we generally rely on the quality of the pledged gold rather than on a stringent analysis of the credit profile of our customers. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to maintain sufficient credit assessment policies, particularly for individual borrowers, could adversely affect our loan portfolio, which could in turn have an adverse effect on our financial condition, cash flows and results of operations.

33. We strive to attract, retain and motivate key employees, and our failure to do so could adversely affect our business. Failure to hire key executives or employees could have a significant impact on our operations.

While we strive to attract, train, motivate and retain highly skilled employees, especially branch managers and gold assessment technical personnel, any inability on our part to hire additional personnel or retain existing qualified personnel may impair our ability to expand our business could lead to a decline of our revenue. Hiring and retaining qualified and skilled managers and sales representatives are critical to our future, and competition for experienced employees in the gold loan industry is intense. In addition, we may not be able to hire and retain enough skilled and experienced employees to replace those who leave, or may not be able to re-deploy and retain our employees to keep pace with continuing changes in technology, evolving standards and changing customer preferences. The failure to hire key executives or employees or the loss of executives and key employees could have a significant impact on our operations.

34. We are subject to the risk of fraud by our employees and customers. Our lending operations involve significant amounts of cash collection which may be susceptible to loss or misappropriation or fraud by our employees. Specifically, employees operating in remote areas may be susceptible to criminal elements which may adversely affect our business, operations and ability to recruit and retain employees

We are exposed to the risk of fraud and other misconduct by employees and customers. While we carefully recruit all of our employees and screen all our employees who are responsible for disbursement of Gold Loans and custody of gold, there could be instances of fraud with respect to Gold Loans and cash related misappropriation by our employees. We are required to report cases of internal fraud to the RBI, which may take appropriate action. We have also filed police complaints alleging fraud and misappropriation of gold by our employees in the past. We cannot guarantee you that such acts of fraud will not be committed in the future, and any such occurrence of fraud would adversely affect our reputation, business and results of operations.

Our lending and collection operations involve handling of significant amounts of cash, including collections of instalment repayments in cash which is the norm in the finance industry. Large amounts of cash collection expose us to the risk of loss, fraud, misappropriation or unauthorised transactions by our employees responsible for dealing with such cash collections. While we obtain insurance, coverage including fidelity coverage and coverage for cash in safes and in transit, and undertake various measures to detect and prevent any unauthorised transactions, fraud or misappropriation by our employees, these measures may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our business operations and financial condition. In addition, we may be subject to regulatory or other proceedings in connection with any such unauthorised transaction, fraud or misappropriation by our agents or employees, which could

adversely affect our goodwill, business prospects and future financial performance.

Further, our employees operating in remote areas may be particularly susceptible to criminal elements as they are involved in cash collection and transportation due to lack of local banking facilities. In the event of any such adverse incident our ability to continue our operations in such areas will be adversely affected and our employee recruitment and retention efforts may be affected, thereby affecting our expansion plans. In addition, if we determine that certain areas of India pose a significantly higher risk of crime or political strife and instability, our ability to operate in such areas will be adversely affected.

35. We are subject to the risk of unknowingly receiving stolen goods as collateral from customers which may result in loss of collateral for the loan disbursed

We have in place a policy in place to satisfy ownership of the gold jewellery and have taken adequate steps to ensure that the KYC guidelines stipulated by RBI are followed and due diligence of the customer is undertaken prior to the disbursement of loans. However, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse is generally available to our Company in the event of such seizure, except the recovery of the loss from the customer. Any seizure of the gold ornaments by the authorities shall result in us losing the collateral for the loan disbursed and could adversely affect our business and results of operations.

36. System failures or inadequacy and security breaches in computer systems may adversely affect our operations and result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Through our information technology systems, we manage our operations, market to our target customers, and monitor and control risks. We are dependent upon the IT software for effective monitoring & management, and any failure in our IT systems or loss of connectivity or any loss of data arising from such failure can impact our business and results of operations.

37. We have entered into, and will continue to enter into, related party transactions.

We have entered into transactions with several related parties, including our Promoters Directors and Group Companies. We cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. Furthermore, it is likely that we will enter into related party transactions in the future. The transactions we have entered into and any future transactions with our related parties could potentially involve conflicts of interest. For details in relation to transactions with related parties as per Accounting Standard 18 issued under the Companies Accounting Standard Rules entered into by us, see "*Financial Information - Transactions with Related Parties*" beginning on page F-1.

38. Our internal procedures, on which we rely for obtaining information on our customers and loan collateral, may be deficient and result in business losses.

We rely on our internal procedures for obtaining information relating to our customers and the loan collateral provided. In the event of lapses or deficiencies in our procedures or in their implementation, we may be subject to business or operational risk. For example, in the event that we unknowingly receive stolen goods as collateral from a customer, the goods can be seized by authorities. Once seized by the authorities, gold items will be stored in court storage facilities without a surety arrangement. No recourse will generally be available to our Company in the event of such seizure, except the recovery of the loss from the customer.

39. Our inability to open new branches at correct locations may adversely affect our business.

Our business is dependent on our ability to service and support our customers from proximate locations and thereby giving our customers easy access to our services. Further, it is vital for us to be present in key locations for sourcing business as we depend on these branches to earn revenue. Thus, any inability on our part to open new branches at correct locations may adversely affect our business and results of operations.

40. Our inability to obtain, renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business, financial condition and results

of operations.

NBFCs in India are subject to strict regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as a NBFC with the RBI, we are required to maintain certain statutory and regulatory permits and approvals for our business. In the future, we will be required to renew such permits and approvals and obtain new permits and approvals for any proposed operations. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Failure on our part to renew, maintain or obtain the required permits or approvals may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and results of operations.

In addition, our branches are required to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. Some of our branches have not applied for such registration while other branches still have applications for registration pending. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

41. All our branch premises, except four branches are acquired on lease. Any termination of arrangements for lease of our branches or our failure to renew the same in a favourable, timely manner, could adversely affect our business and results of operations.

As on February 28, 2021, we had a total of 960 branches in 8 states and 1 union territory. Except four branches which are owned by us, the remaining are located on leased premises. If any of the owners of these premises does not renew an agreement under which we occupy the premises, attempts to evict us or seeks to renew an agreement on terms and conditions non-acceptable to us, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

42. We have ventured into new business areas and the sustainability, effective management and failure of growth strategy could adversely affect our business and result of operations.

We have entered new businesses as part of our growth strategy. For example, we have received a corporate insurance agency license from IRDA under the Insurance Act, 1938 for acting as a corporate agent for the Life Insurance Corporation of India, which will enable us to market their life insurance plans. Additionally, we have also entered into corporate agency agreements with SBI Life Insurance Limited, to act as a corporate agent for soliciting or procuring insurance business. Further, our Company entered into corporate agency agreement with HDFC Life Insurance Company Limited on September 14, 2019 for providing corporate agent services including soliciting, procuring and marketing of HDFC life insurance products. In furtherance to these objectives our Company had obtained a certificate of registration from the IRDA, dated March 30, 2016 to commence/carry business in the capacity of a Corporate Agent (Composite) under the Insurance Regulatory and Development Authority Act, 1999.

Our Company has also started microfinancing activities. Additionally, our Company owns a parcel of agricultural land in Kattappana village, Udumpanchola Taluk, Idukki district, admeasuring 108.74 acres, through which our Company undertakes agricultural activity of cultivating cardamom. Our Company, on the basis of the definitive agreements entered into for installation of four windmill units at Ramakkalmedu, Idukki district of Kerala has completed the commissioning of the project and the windmills at Ramakkalmedu, Thookkupalam in Idukki District have become operational. Our Company has also submitted a tariff petition with the energy commission for fixing the tariff rate.

Our Company has also entered into agreements for its money transfer business with EBIX Money Express Private Limited ("**EBIX**") to act in the capacity of a sub representative to offer money transfer services. Our Company also holds a FFMC license and carries on money changing activities through its branches authorised by RBI. As on February 28, 2021, we had one head office and 61 authorised branches. Our currency operations include sale and purchase of foreign exchange at different authorised branches.

We have little or no operating experience with such businesses, and you should consider the risks and difficulties we may encounter by entering into new lines of business. New businesses may require significant

capital investments and commitments of time from our senior management, and there often is little or no prospect of earnings in a new business for several years. Moreover, there is no assurance any new business we develop or enter will commence in accordance with our timelines, if at all, which could result in additional costs and time commitments from our senior management. There also can be no assurance that our management will be able to develop the skills necessary to successfully manage these new business areas. Our inability to effectively manage any of the above issues could materially and adversely affect our business and impact our future financial performance.

43. Our contingent liabilities have not been provided for in our financial statements which, if materialize, may impact our financial condition.

As at March 31, 2020, our financial statements disclosed and reflected the following contingent liabilities:

Particulars	**₹in lakhs**
Service tax demand for the period from September 10, 2004 to September 30, 2008	78.03
Service tax demand for the period from October 1, 2008 to June 30, 2012	1,776.53
Service tax demand for the period from October 1, 2008 to November 30, 2012	275.91
Service tax demand for the period from July 1, 2012 to March 31, 2014	2,147.76
Service tax demand for the period from April 1, 2015 to March 31, 2016	1.45
Income tax demand for the period 2011-2012	(249.27)
Income tax demand for the period 2014-2015	75.03
Income tax demand for the period 2015-2016	642.65
Income tax demand for the period 2016-2017	1,272.74
Kerala Value Added Tax demand for the period 2014-15	83.36
Total contingent liabilities	**6,104.20**

If at any time we are compelled to pay all or a material proportion of these contingent liabilities, it would have a material and adverse effect on our business, future financial performance and results of operations.

44. We rely significantly on our management team, our Key Managerial Personnel and our ability to attract and retain talent. Loss of any member from our management team or that of our Key Managerial Personnel may adversely affect our business and results of operation.

We rely significantly on our core management team which oversees the operations, strategy and growth of our businesses. Our Key Managerial Personnel have been integral to our development. Our success is largely dependent on our management team which ensures the implementation of our strategy. If one or more members of our management team are unable or unwilling to continue in their present positions, they may be difficult to replace, and our business and results of operation may be adversely affected.

RISKS PERTAINING TO THIS ISSUE

45. Changes in interest rates may affect the price of our NCDs which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

46. The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.

We intend to use the proceeds of the Issue, after meeting the expenditures of and related to the Issue, for the purpose of onward lending and for repayment of interest and principal of existing loans and also for general corporate purposes. For further details, see "*Objects of the Issue*" at page 65. The fund requirement and deployment is based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. The utilization details of the proceeds of the Issue shall be adequately disclosed as per applicable law.

Further, as per the provisions of the SEBI Debt Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

47. The liquidity for the NCDs in the secondary market is very low and it may remain so in the future and the price of the Bonds may be volatile.

The Issue will be a new public issue of NCDs for our Company and the liquidity in NCDs at present is very low in the secondary market. Although an application has been made to list the NCDs on BSE, there can be no assurance that liquidity for the NCDs will improve, and if liquidity for the NCDs were to improve, there is no obligation on us to maintain the secondary market. The liquidity and market prices of the NCDs can be expected to vary with changes in market and economic conditions, our financial condition and prospects and other factors that generally influence market price of NCDs. Such fluctuations may significantly affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs.

48. You may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs. Failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose the holders to a potential loss.

Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors, including, *inter-alia* our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Although our Company will create appropriate security in favour of the Debenture Trustee for the NCD Holders on the assets adequate to ensure minimum 100.00% asset cover for the NCDs, which shall be free from any encumbrances, the realisable value of the assets charged as security, when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss.

49. There can be no assurance that the NCDs issued pursuant to this Issue will be listed on the Stock Exchange in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE for reasons unforeseen. If permission to deal in and for an official quotation of the NCDs is not granted by BSE, our Company will forthwith repay, without interest, all monies received from the Applicants in accordance with prevailing law in this context, and pursuant to this Prospectus.

50. There may be no active market for the NCDs on the retail debt market/capital market segment of the BSE. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors inter alia including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market price of our Equity Shares, (iii) the market for listed debt securities, (iv) general economic conditions, and, (v) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

51. Our Company may raise further borrowings and charge its assets after receipt of necessary consents from its existing lenders. In such a scenario, the Debenture Holders holding the Secured NCDs will rank pari passu with other secured creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation

Our Company may, subject to receipt of all necessary consents from its existing lenders and the Debenture Trustee to the Issue, raise further borrowings and charge its assets. Our Company is free to decide the nature of security that may be provided for future borrowings. In such a scenario, the Debenture Holders holding the Secured NCDs will rank *pari passu* with other creditors and to that extent, may reduce the amounts recoverable by the Debenture Holders upon our Company's bankruptcy, winding up or liquidation.

52. In the event of liquidation or bankcruptcy, the new bankruptcy code in India may affect our Company's right to recover loans from its borrowers.

The Insolvency and Bankruptcy Code, 2016 ("**Bankruptcy Code**") was notified on August 5, 2016. The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Any decision of the committee of creditors must be taken by a vote of not less than 66% of the voting share of all financial creditors. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it. In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor's assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured credits. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company's ability to recover our loans from the borrowers and enforcement of our Company's rights will be subject to the Bankruptcy Code.

Further, the GoI *vide* notification dated March 24, 2020 ("Notification") has amended section 4 of the Bankruptcy Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, GoI has increased the minimum amount of default under the insolvency matters from ₹1,00,000 to ₹1,00,00,000. Therefore the ability of our Company to initiate insolvency proceedings against the defaulters where the amount of default in an insolvency matter is less the ₹1,00,00,000 may impact the recovery of outstanding loans and profitability of our Company

53. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the NBFC and Gold Loan industries contained in this Prospectus.

While facts and other statistics in this Prospectus relating to India, the Indian economy as well as the Gold Loan industry have been based on various publications and reports from agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials, particularly since there is limited publicly available information specific to the Gold Loan industry. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics, the same have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "*Industry Overview*" beginning on page 69. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

EXTERNAL RISK FACTORS

54. Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks, NBFCs and HFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders' funds and the market price of our NCDs.

55. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business

Terrorist attacks and other acts of violence or war may negatively affect our business and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, any deterioration in relations between India and its neighbouring countries might result in investor concern about stability in the region, which could adversely affect our business.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our NCDs.

56. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their impact on the Indian economy. Further, prolonged spells of below normal rainfall or other natural calamities could have a negative impact on the Indian economy thereby, adversely affecting our business. For example, we were impacted by the floods in Kerala in Fiscal 2019 as a result of which we had to temporarily close some of our branches in Kerala which resulted in a decline in our cash flows and revenues during that period. As a result, any present or future outbreak of natural calamities could have a material adverse effect on our business and the market price of the NCDs.

57. Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, the interest rates and other commercial terms at which such additional financing is available. India's sovereign rating decreased from Baa2 with a "negative" outlook to Baa3 with a "negative" outlook by Moody's and from BBB with a "stable" outlook to BBB with a "negative" outlook (Fitch) in June 2020; and from BBB "stable" to BBB "negative" in May 2020. Any further adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact on our business and financial performance, our ability to raise financing for onward lending and the price of our NCDs.

58. Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.

There is no assurance that the liberalisation policies of the government will continue in the future. Protests against privatisation could slow down the pace of liberalisation and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the government may change at a later date. The pace of economic liberalisation could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India and thereby affect our

Company's business.

Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalisation policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced polices and taken initiatives that support continued economic liberalisation.

The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

OVERVIEW OF THE INDIAN ECONOMY

GDP: Staring at the worst recession in decades

The Covid-19 pandemic, which originated in Wuhan, China in December 2019, has shaken the world. And India is no exception. To combat this pandemic, the country went into a phase-wise lockdown in March end.

The pandemic sharply slowed the Indian economy in the first quarter of fiscal 2021, but the huge economic costs that it extracted forced the economy to open up and get back on its feet in the second quarter. India's third quarter GDP growth data print for fiscal 2021 came in at 0.4% on-year -- better than -7.5% in the second quarter and -23.9% in the first quarter. We expect India's real GDP for the current fiscal to contract 7.7%. Also, given the recent growth momentum and budgetary support to growth, we expect the GDP to grow by 11% in fiscal 2022. A weak base, softer interest rates, control over Covid-19 spread, vaccination, and better global growth prospects will fuel growth.

In the past 69 years, India has seen recessions only thrice according to available data: in 1958, 1966 and 1980. The reason was similar each time – a monsoon shock hitting agriculture, then a sizable part of the economy. The recession staring at us today is different. Two factors have been supportive: The agriculture sector which recorded 3.4% growth on-year, and exports. Since imports fell much sharper than exports, net trade was less of a drag on the economy compared to the past.

Macroeconomic outlook

Macro variable	FY19	FY20	FY21P	Rationale for outlook
GDP (%, y-o-y)	6.1	4.2	-9.0	While the second half of the fiscal looking better than the first for all states, the degree of improvement will be shaped by the nature of second wave and economic structure. The agriculture and manufacturing dominated states, in general, is expected to perform better vis-à-vis services dominated ones. This has lent a positive bias to our full-year call of -9%.
CPI inflation (%, y-o-y)	3.4	4.8	6.4	Headline inflation continues to surprise on the upside. Food inflation remains in double digits. Core infrastructure sector continued to contract, though at a lesser pace, faster pick-up in electricity and coal production provided support.
10-year G-sec yield (%, March-end)	7.5	6.2	6.2	The increased scale of unconventional measures, coupled with its commitment to stay accommodative at least in this fiscal will keep demand of G-secs robust amid a large borrowing programme. Easy monetary policies in other major economies and low crude prices will also support domestic yields.
CAD/GDP (%)	2.1	0.9	-1.2	While exports face risks from declining global growth, imports are likely to decline even more sharply on account of the crash in oil prices, besides the weak domestic demand

Government initiatives to address liquidity issues and concerns at the bottom of the pyramid

- To reduce the pandemic impact, the government announced a slew of measures aimed at restarting the economy. The government unveiled a Rs 20.9 lakh crore relief package under the Atmanirbhar Bharat Abhiyan. The five pillars of the package are economy, infrastructure, system, vibrant demography and demand

- For addressing the near-term issues, apart from direct-benefit transfers and additional spending through MNREGA, the government has mobilised transfers to micro, small and medium enterprises (MSMEs), agriculture and affordable-housing sectors

- Of all the various stimulus offered, the policy has been focused mainly towards providing liquidity support to

NBFCs, housing finance companies (HFCs) and MFIs, in addition to the Targeted Long-Term Repo Operation (TLTRO) 2.0 window. This includes:

- Special liquidity scheme up to Rs 30,000 crore for NBFCs, HFCs and MFIs. This scheme is fully guaranteed by the central government, and primary and secondary market transactions in investment-grade debt paper of NBFCs, HFCs and MFIs are eligible. Banks' participation in TLTRO 2.0, which was focused on NBFCs, remained limited because of higher credit risk perception on mid-sized and small non-banks. Now the 100% government guarantee is expected to improve fund availability with NBFCs

- The Partial Credit Guarantee Scheme of Rs 45,000 crore for NBFCs, rated AA and below, including unrated paper are eligible. Within this, the first 20% of the loss will be borne by the Government of India. This will provide liquidity relief to small and mid-sized non-banks that were facing liquidity issues

- ON-Tap TLTRO: RBI has introduced on-tap TLTRO to provide liquidity to banks as and when required. Available till March 2021, on tap TLTRO of Rs 1 lakh crore with a tenure of 3 years focusses on improving liquidity in sectors critical for economic revival. Therefore, banks now have the flexibility to borrow based on their needs, avoiding excess liquidity and increased interest costs. The RBI has also permitted banks to repay (before maturity) the money availed of in earlier TLTROs. This action will also help banks reduce their extra liquidity (which was not deployed) and thus reduce their interest costs. Also, this scheme was linked to the central government's Emergency Credit Line Guarantee Scheme 2.0 (ECLGS 2.0), which targets 26 stressed sectors identified by the Kamath Committee

The stimulus also focuses on providing support to MSMEs to keep them afloat, the most significant of which was the Rs 3 lakh crore emergency line of credit from banks and NBFCs, up to 20% of the entire credit outstanding as on February 29, 2020. This would clearly provide the much-needed liquidity to MSMEs, which are known to face severe working capital crunch during downturns. CRISIL's analysis of 13,000 companies over a five-year period indicates that the working-capital cycle of MSMEs can stretch by 15-20% during downturns compared with normal years. This stimulus will spur credit growth for both banks and non-banks this fiscal and contain delinquency in the segment, which would have otherwise increased.

STRUCTURAL ADVANTAGES TO LOG FASTER ECONOMIC GROWTH OVER THE LONG TERM

India has the second-largest population

As per Census 2011, India's population was about 1.2 billion, comprising nearly 246 million households. The population increased by more than 181 million during 2001-2011 and is expected increased to 1.45 billion by 2025.

Favorable demographics

Currently, India is also one of the nations with the highest young population, with a median age of 28 years. About 90% of Indians are aged below 60. CRISIL Research estimates that 63% of this demographic are aged between 15 and 59 years. CRISIL Research expects that the existence of a large share of working population, coupled with rapid urbanisation and rising affluence, will propel the growth of the Indian financial services sector.

Rise in urbanisation

Urbanisation is a big growth driver for India, as it leads to faster infrastructure development, job creation, development of modern consumer services and the city's ability to mobilise savings. The share of urban population in total population has been consistently rising over years, and is expected to rise from 31% in 2011 to 35% by 2021, spurring more demand.

Urban consumption in India has shown signs of an improvement and, given India's favourable demographics coupled with rising disposable incomes, the trend is likely to continue and drive economic growth for the country.

Faster growth in demand for financial products from semi-urban and rural areas

With the increasing financial literacy, mobile penetration, awareness and the Prime Minister's Jan Dhan Yojana bank accounts (the scheme is aimed at bringing the unbanked under the formal banking system), there has been a rise in the participation of individuals from non-metro cities. CRISIL Research expects technology to progressively reduce the cost of reaching out to smaller markets.

NON-BANKING FINANCIAL INSTITUTIONS

Structure of non-banking financial institutions in India

Indian financial system includes banks and non-bank financial institutions. Though the banking system remains dominant in financial services, non-banking financial institutions have grown in importance by carving a niche for themselves in the under-penetrated regions and unbanked segments.

NBFCs: an important part of the credit system

Financing needs in India have risen in sync with the notable growth recorded by the economy over the past decade. Non-banking financial companies (NBFCs) have played a major role in meeting this need, complementing banks and other financial institutions.

NBFCs help fill gaps in the availability of financial services with respect to products as well as customer and geographic segments. A strong linkage at the grassroots level makes them a critical cog in the financial machine. They cater to the unbanked masses in rural and semi-urban reaches and lend to the informal sector and people without credit histories, thereby enabling the government and regulators to realise the mission of financial inclusion. As of March 2020, they accounted for around ~23% of the overall systemic credit.

Classification of NBFCs

NBFCs have been classified on the basis of kind of liabilities they access, types of activities they pursue and their perceived systemic importance.

Liabilities-based classification

NBFCs are classified on the basis of liabilities into two broad categories: (a) deposit-taking; and (b) non-deposit taking. Deposit-taking NBFCs (NBFC – D) are subject to the requirements of stricter capital adequacy, liquid-

assets maintenance and exposure norms.

Further, in 2015, non-deposit taking NBFCs with an asset size of Rs 5 billion and above were labelled as 'systemically important non-deposit taking NBFCs' (NBFC – ND – SI), and separate prudential regulations were made applicable to them.

Note: Figures in brackets represent number of entities registered with RBI as of January, 2021.

REVIEW OF THE GOLD LOAN SEGMENT

Gold loan NBFCs to outshine others

Gold has always been a valued commodity, particularly in India. Due to its high value, people take loans with gold ornaments as collateral. Until about a decade ago, most of such lending activities used to take place in the unorganised sector through money lenders. However, the scenario has changed with the entry of organised players. The gold financing sector in India is undergoing a considerable transformation in many aspects, from a gradual shift to the organised and formal sector to digitalisation and the emergence of online products. Also, with financial institutions increasing their geographic scope and market penetration, a significant chunk of the population that historically relied on the unorganised sector is slowly shifting to lenders within the organised sector.

Gold loans are typically of small ticket size, short duration, convenient and provide instant credit. The unrestrained growth in the NBFCs' gold-loan offtake was derailed by tighter regulatory environment between fiscals 2012 and 2014, and they lost considerable ground to banks and the unorganised sector. However, in the long term, the intervention strengthened the sector's ability to withstand price risk, improve customer service and standardise processes related to security valuation. It compelled NBFCs to reconsider their strategies. The loan-to-value (LTV) ratio was also reduced, thereby de-risking the business. There was focus on regular, monthly collection of interest,

to preserve the lending margin against the backdrop of volatile gold prices.

The enhanced gold prices and its wide geographical presence will help NBFCs to consolidate the market by capturing new-to-market customers. The NBFCs have developed competitive strength in faster loan processing, accurate gold valuations, safekeeping and auctioning. The sheer convenience of a loan proposition against such a liquid asset acts a lucrative collateral for this loan type.

Impact of Covid-19 on gold loan financing in India

Demand for gold loans increased amid the Covid-19 pandemic as households and small businesses preferred to pledge gold to meet their financing needs rather than selling it outright. The higher gold loan demand is mainly due to the surge in gold price, liquidity crunch amid the Covid-19-driven lockdown, and lenders turning risk averse and becoming hesitant towards unsecured loans. With this, CRISIL expects overall gold loan book to grow 12-13% y-o-y during fiscal 2021. Growth was flat in the first quarter of this fiscal because of low disbursements in April and May amid the country-wide lockdown. It started picking up from July as the lockdown got lifted and economy started reopening. Demand has been majorly from existing customers, who chose to re-pledge their existing stock to avail of additional funding.

Between fiscals 2015 and 2020, the gold loan industry's AUM logged ~8% CAGR to Rs 3.2 trillion because of sharper focus of players on diversifying their regional presence, strong growth in non-southern regions, a 6.2% rise in gold price and a decline in lead time for disbursing gold loans. In fiscal 2021, the AUM will continue to grow though at a moderate rate compared with the previous year.

Growth in gold loan AUMs (banks and non-banks)

NBFCs, which have grown at a steady rate of 12% between 2015 and 2020, are expected to grow 15-18% in fiscal 2021 and 19% thereafter, propelled primarily by the rise in gold price and stocks of gold pledged. NBFCs are expected to perform better than the overall industry, mainly due to its lower turnaround time (TAT), seamless disbursement process, flexible foreclosure options, and higher adoption of online processes.

NBFCs to shimmer with 15-18% growth in fiscal 2021

Non-traditional regions will contribute to growth, aided by players' marketing efforts. Their ability to leverage technology and improve their online gold disbursements will also be helpful.

Higher gold price driving loan growth

Gold price has risen over 20% amid the pandemic. It remains high due to the disruption in economic activities, geopolitical uncertainties, and global slump in economic growth, which have led investors away from risky assets and increased the safe-haven appeal of gold. Gold is considered a hedge against inflation and a safe investment during political or economic turmoil. The increase in gold price enables borrowers to get higher amount as loan on their collateral.

Apart from increasing gold prices, the other factors contributing to the overall gold loan AUM are:

a) Increasing share of Online gold loans are transforming gold loan market

Digital Gold Loans products offer the feature of loan sanction within few hours through the online process. These loans can be accessed through mobile applications, online platform, prepaid card etc. KYC, registration and disbursements are all possible through online platform. Though these loans require borrowers to personally deliver

gold collateral at the nearest branch, some NBFC lenders have started providing doorstep delivery wherein verification of the gold ornaments as well as gold collection will be done at the customer's residence. These are managed through a central application that is simultaneously accessed by all branches for each and every transaction.

Impact of COVID-19

COVID-19 was recognized as a pandemic by the World Health Organization on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India have taken preventive or protective actions, such as imposing country-wide lockdowns, restrictions on domestic and international travel and business operations and advising or requiring individuals to limit their time outside of their homes. The steps taken to counter the effects of the pandemic have resulted in a period of economic downturn and business disruption in India. The impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

Because of a government mandated lockdown in India we have had to temporarily close all of our offices in India, and all of our corporate and branch/ regional office operations transitioned to a remote working environment. Despite this, our business and operations have continued to run effectively in the remote working environment. Further, we have not availed any moratorium from the banks however, in case of mortgage loans we have given moratorium to our microfinance customers. Though our business has been affected during the initial days of lockdown, we have not faced any liquidity issues.

The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers and partners. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled.

Also, see "*Risk Factors - Recent outbreak of the novel coronavirus could have a significant effect on our results of operations and could negatively impact our business, revenues, financial condition and result of operations*" on page 17.

Our Strengths

We are part of the Kosamattam Group which has a long operating history and a large customer base.

We are part of the Kosamattam Group, which was originally founded by Nasrani Varkey and one of the leading business financial services group in South India. Over the years, we have been successful in expanding our customer base. Our total number of Gold Loan customers grew from 4,10,867 as of March 31, 2018, to 4,25,716 as of March 31, 2019 and to 4,31,588 as of March 31, 2020 and to 4,32,409 as of December 31, 2020. We attribute our growth, in part, to our market penetration, particularly in areas less served by organised lending institutions and the efficient and streamlined procedural formalities which our customers need to complete in order to complete a loan transaction with us, which makes us a preferred medium of financier for our customers. We also attribute our growth to customer loyalty which in turn leads to repeat business. We believe that we are known for the quality of service we have provided to our customers over the years and for our consistent approach to developing long-term relationships with our customers, based on our local knowledge and experience amongst other things.

Branch network across rural and semi-urban areas in South India

We believe that the scale of our operational network provides us with a competitive advantage. As of Febraury 28, 2021, our Company's operations included 960 branch offices spread across 8 states and 1 union territory. We commenced our operations in rural areas and small towns and have followed an approach of targeting geographies with low credit penetration. We have expanded our branch network by opening 10 branch offices in Delhi, 8 branch offices in Gujarat and 8 branch offices in Maharashtra. Our customers are typically retail customers, businessmen, vendors, traders, farmers, salaried individuals and families, who for reasons of convenience, accessibility or necessity, avail of our credit facilities by pledging their gold jewellery with us. Our understanding of the local characteristics of markets has allowed us to address the unique needs of our customers and enabled us

to penetrate deeper into such markets.

Over the years, we have focused on customers in such markets that offer us significant growth opportunities and customer loyalty. We believe that with such a large network specifically with semi-urban areas, we were able to penetrate and cater to our customers across various cities and towns in south India especially in semi-urban locations. Having such a network enables us to service and support our existing customers from proximate locations which gives our customers easy access to our services and enables us to reach new customers especially potential rural customers. We believe we can leverage on this existing network for further expansion and for fulfilling our customer requirements.

Organised and efficient IT Infrastructure

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. All our branches are computerised. We believe that through our existing information technology systems, we are able to effectively, manage our operations, market to our target customers, and monitor and control risks. We believe that this system has improved customer service by reducing transaction time and has allowed us to comply with regulatory record-keeping and reporting requirements. Further, in order to manage our expanding operations as well as our increased customer base, we have entered into an arrangement for the development of software for our product offerings and other allied functions. Accordingly, the new software was introduced for operational efficiency.

Additionally, our Company has entered into an agreement dated September 15, 2016, with PayU Payments Private Limited ("**PayU**"), a payment gateway, with a view to provide our customers with a convenient option of online payments through the internet or through the interactive voice responsive ('IVR') system provided by PayU, using credit/debit cards, net banking and various other modes of payment options.

Effective risk management system including appraisal, internal audit and inspections.

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management system is to measure and monitor the various risks we are subject to and to implement policies and procedures to address such risks. We have an internal audit system which consists of audit and inspection, for risk assessment and internal controls. The audit system comprises of accounts audit and gold appraisal. In accordance with our internal audit policy, all of our branches are subject to surprise gold audit every month and accounts audit once in very four months. A majority of our customers are borrowers who have been referred to us by existing or former customers and our branches act as a single point of contact for them. The personnel at our branches are responsible for sourcing loans, carrying out preliminary checks on the credit worthiness of a prospective customer, providing assistance in documentation, disbursing loans and in monitoring repayments and collections. We have implemented an analytics platform with a pre-defined approval matrix, which expedites the processing of loan applications. Further the staff is strictly advised to make the acid test, sound test etc., at the time of making the pledge for checking whether the ornament is of acceptable quality or not.

Experienced management team and skilled personnel

Our Board, Promoters and senior management is composed of experienced professional, and management professionals. We believe that we have a strong senior management team to lead us, a majority of whose members have been with us for over 5 years. Our management team comprises of our Promoter Director, Mathew K. Cherian, who has over 40 years of experience in finance business. The management team possesses the required skill, expertise and vision to continue and to expand the business of our Company. Our management team has an in-depth understanding of the gold loan business and under their direction and guidance our Company has grown organically. We believe that the long-standing industry experience of our Promoters and our management team provides us with an understanding of the needs and behavior of the client's particularly in rural and semi-urban areas and issues specific to the gold financing industry in India. We believe that this expertise gives us a competitive advantage in the gold loan industry and has helped us in maintaining our resilience through industry cycles.

Our Strategy

Our business strategy is designed to capitalise on our competitive strengths and enhance our position in the Gold Loan industry. Key elements of our strategy include:

Expansion of business activity by opening new branches in rural and semi urban areas to tap potential market for gold loans

We intend to continue to grow our loan portfolio by expanding our branch network by opening new branches. A good reach to customers is very important in our business. Increased revenue, profitability and visibility are the factors that drive the branch network. Currently, we are present in key locations which are predominantly in South India for sourcing business. Our strategy for branch expansion includes further strengthening our presence in south Indian states by providing higher accessibility to customers as well as leveraging our expertise and presence in southern India. At the core of our branch expansion strategy, we expect to penetrate new markets and expand our customer base in rural and semi-urban markets where a large portion of the population has limited access to credit either because they do not meet the eligibility requirements of banks or financial institutions, or because credit is not available in a timely manner at reasonable rates of interest, or at all. We plan to continue to focus on low and middle income self employed customers and increase the market share of our existing products in the rural and semi-urban markets of India. A large segment of India's rural and semiurban population is comprising customers without any credit history and we believe that such customer segment offers us significant growth opportunities and customer loyalty. A typical Gold Loan customer expects high loan-to-value ratios, rapid and accurate appraisals, easy access, quick approval and disbursement and safekeeping of their pledged gold jewellery. We believe that we meet these criteria when compared to other unregulated money lenders, and thus our focus is to expand our Gold Loan business.

Expansion of business into metros and select Tier 1 cities across India

In addition to our continuing focus on rural and semi-urban markets in the states that we are present, we are also focusing on opening branches in metros and select Tier 1 cities where we believe our business has high growth potential. We carefully assess the market, location and proximity to target customers when selecting branch sites to ensure that our branches are set up close to our target customers. We believe specialised teams focused on specific customer segments into metros and select Tier 1 cities across India will enable us to increase the productivity of our distribution channels, meet specific customer segments and increase quality of customer experience. This will also help us to increase our customer base and increase our profitability. We believe our customers appreciate this convenience and it enables us to reach new customers.

Increase visibility of Kosamattam Brand to attract new customers

Our brand is key to the growth of our business. We started focusing on brand building exercise in 2013. Our logo was re-designed and the tag- line '*Trust grows with time'* was introduced. We believe that we have built a recognisable brand in the rural and semi-urban markets of India, particularly in the southern states of Kerala, Tamil Nadu and Karnataka. We believe that having a strong recognizable brand is a key attribute in our business, which helps us attract and retain customers, increases customer confidence and influences their investment decisions. We intend to continue to undertake initiatives to increase the strength and recall of our *'Kosamattam'* brand to attract new customers. We seek to build our brand by engaging with existing and potential customers' through customer literacy programs, sponsor popular events in the regions we operate and advertise in newspapers, hoardings, television, radio and in other advertising media.

Diversifying into new business initiatives by leveraging our branch network and customer base.

Gold loan as on September 30, 2020 accounted for 97.97% of total loans portfolio of our Company. To reduce the risk of revenue volatility and with a view to expand our fee based income, we are in the process of diversifying our business to venture into the business of generators and distributors of electricity by using wind and/or other renewable energy. Further, we have received a certificate of registration dated May 28, 2014 from SEBI to become a depository participant. Also, we have ventured into the microfinancing business, by providing small ticket unsecured loans to our customers. Our Company intends to capitalise the large branch network to offer the additional products and services.

We also intend to cross-sell products to our existing customers and develop long-term relationships with them. We also intend to increase our fee income through the distribution of third party life, general and health insurance products.

Minimise concentration risk by diversifying the product portfolio and expanding our customer base.

We intend to further improve the diversity of our product portfolio to cater to the various financial needs of our

customers and increase the share of income derived from sale of financial products and services.

Beyond our existing Gold Loan product, we intend to leverage our brand and office network, develop complementary business lines and become the preferred provider of financial products – 'a one-stop shop for customers' financial needs. We have recently forayed into SME financing and mortgage loans.

Our diverse revenue stream will reduce our dependence on any particular product line thus enabling us to spread and mitigate our risk exposure to any particular industry, business, geography or customer segment. Offering a wide range of products helps us to attract more customers thereby increasing our scale of operations.

We expect that complementary business lines will allow us to offer new products to existing customers while attracting new customers as well. We expect that our knowledge of local markets will allow us to diversify into products desired by our customers, differentiating us from our competitors.

Further strengthen our risk management, loan appraisal and technology systems

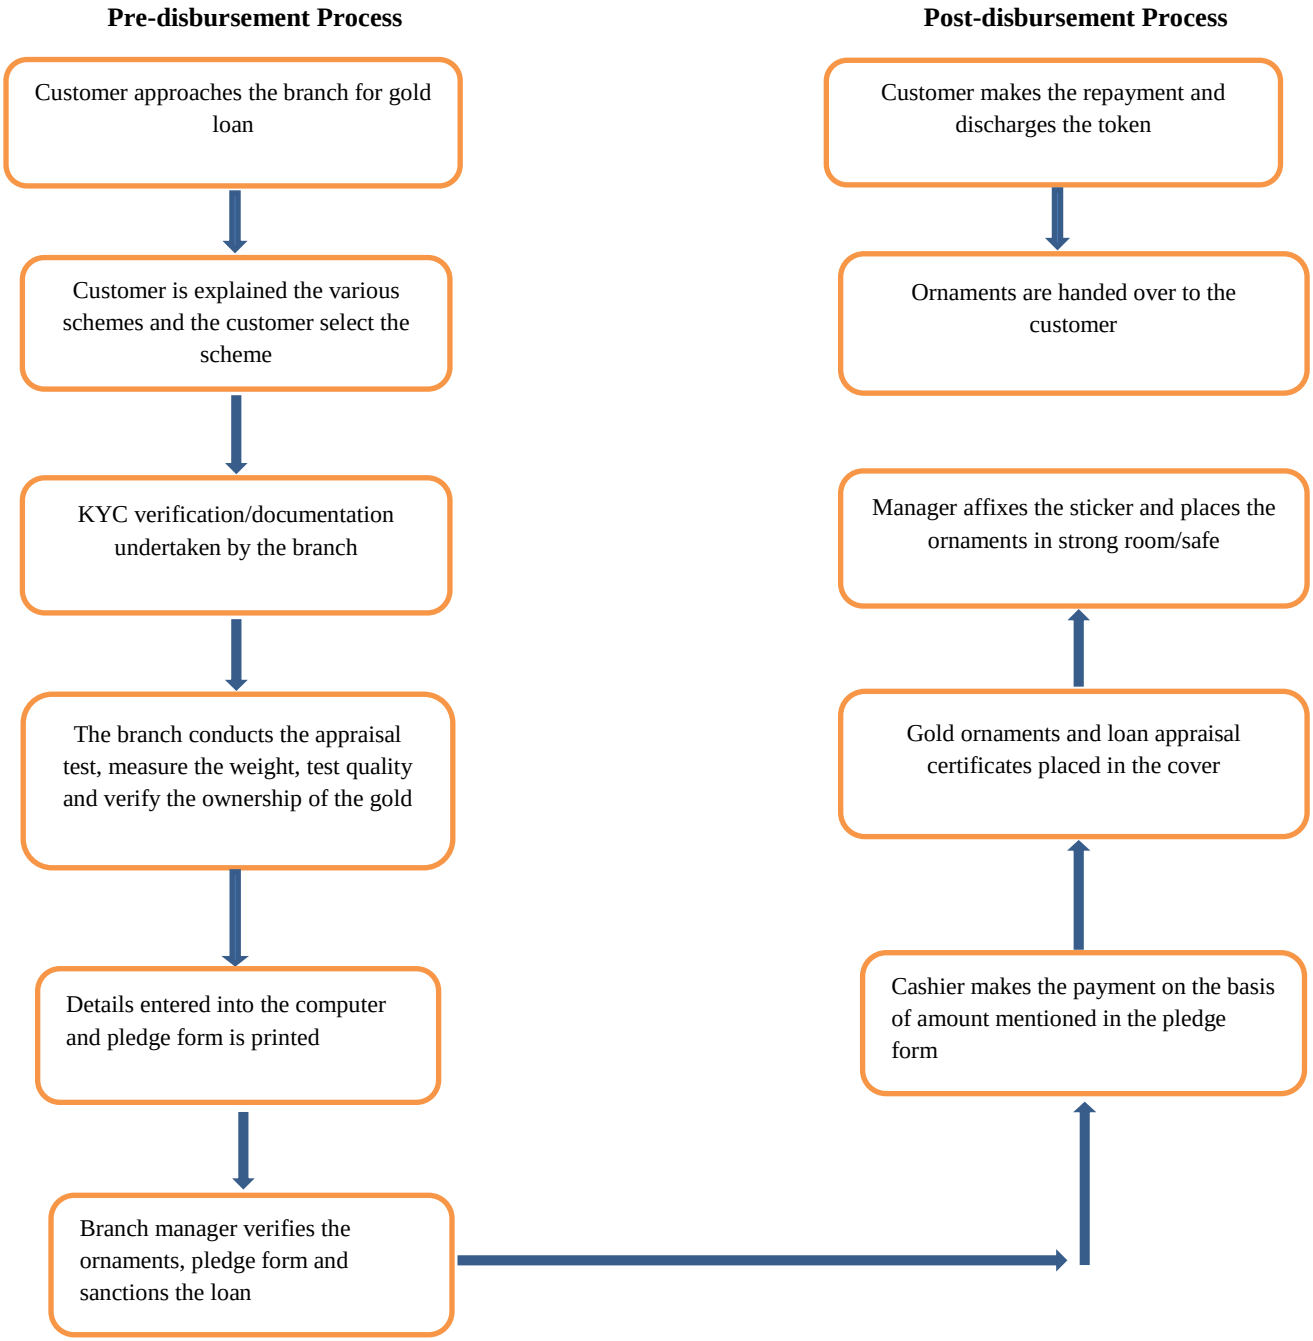
We believe risk management is a crucial element for further expansion of our Gold Loan business. We therefore continously focus on improving our integrated risk management framework with processes for identifying, measuring, monitoring, reporting and mitigating key risks, including credit risk, appraisal risk, custodial risk, market risk and operational risk. We plan to continue to adapt our risk management procedures, to take account of trends we have identified. We believe that prudent risk management policies and development of tailored credit procedures will allow us to expand our Gold Loan financing business without significantly increasing our non-performing assets. Since we plan to expand our geographic reach as well as our scale of operations, we intend to further develop and strengthen our technology platform to support our growth and improve the quality of our services. We are focused on improving our comprehensive knowledge base and customer profile and support systems, which in turn will assist us in the expansion of our business.

We continue to focus on developing and strengthening our IT capabilities to support our growth and improve the quality of our services. We believe that improving our technology infrastructure will allow us to respond to challenges on a real-time basis and improve our risks management capabilities. We also intend to develop data-driven insights to understand our target customers' propensity towards certain financial products. We anticipate using such information to conduct targeted marketing efforts allowing us to improve the availability of our products and consequently the quality of our services and credit portfolio.

GOLD LOAN BUSINESS

Our lending business is primarily Gold Loans, which are typically loans against pledge of gold jewellery. As of September 30, 2020, we had approximately 5,98,999 loan accounts, representing an aggregate principal balance of ₹ 2,66,931.41 lakhs. For the six months period ended September 30, 2020 and for the financial years ended March 31, 2020, March 31, 2019 and March 31, 2018, our Gold Loan portfolio yield representing interest income on gold loans as a percentage of average outstanding of Gold Loans, for the same period were 19.01%, 19.43%, 20.56% and 20.97%, respectively, per annum. For the six months period ended September 30, 2020 and for the financial years ended March 31, 2020, March 31, 2019 and March 31, 2018, income from interest earned on our Gold Loans constituted 93.50%, 93.72%, 91.44% and 92.12%, of our total income for the respective years. We offer variety of Gold Loan schemes to our customers to suit their individual needs. The schemes differ in relation to the amount advanced per gram of gold, interest rate chargeable and amount of loan.

Gold Loan disbursement process



The principal form of security that we accept is household gold jewellery. We do not accept bullion, gold biscuits, gold bars, new mass-produced gold jewellery or medallions. While these restrictions narrow the pool of assets that may be provided to us as security, we believe that it provides us with the following key advantages:

a. It filters out spurious jewellery that may be pledged by jewellers and goldsmiths. We find that household, used jewellery is less likely to be spurious or fake.

b. The emotional value attached by each household to the pledged jewellery acts as a strong incentive for timely repayment of loans and revoking the pledge.

c. As we only accept the pledge of household jewellery, the value of the pledged gold is typically only as much as the worth of gold that is owned by an average Indian household. This prevents our exposure to large sized loans where the chances of default and subsequent losses are high.

The amount that we finance against the pledged gold jewellery is typically based on a fixed rate per gram of gold content in the jewellery. We value the gold jewellery brought by customers based on our corporate policies and guidelines. As per the policy, we grant gold loans on 22 Carat gold ornaments. However, in case the jewels that are being pledged are less than 22 carats, the branches are required to convert the carat of gold jewels to the equivalent of 22 carats. Under no-circumstances are gold ornaments below 19 carats accepted by our Company. The rates per gram is fixed by us on weekly intervals. The actual loan amount varies according to the type of jewellery pledged. While jewellery can be appraised based on a variety of factors, such as total weight, weight of gold content, production cost, style, brand and value of any gemstones, we appraise the gold jewellery solely based on its gold content. Our Gold Loans are, therefore, generally well collateralised because the actual value of the gold jewellery is higher than our appraised value of the gold jewellery when the loan is disbursed. The amount we lend against an item and the total value of the pledged gold we hold fluctuates according to the market price of gold. An increase in the price of gold will not automatically result in an increase in the value of our Gold Loan portfolio unless the rate per gram is revised by our Corporate Office. It only results in a favourable movement in the value of the security, pledged with us. Similarly, since adequate margins are built in at the time of the loan disbursement and owing to the short tenure of these loans, on average, a decrease in the price of gold generally has little impact on our interest income. However, a sustained decrease in the market price of gold could cause a decrease in the growth rate of Gold Loans in our loan portfolio.

At present our Gold Loans have a maximum tenure of upto 12 months, however, customers may redeem the loan at any time prior to the full tenure. As per the current policy of our Company, interest is to be paid in accordance with the scheme. In the event that a loan is not repaid on time and after providing due notice to the customer, the unredeemed pledged gold is disposed of, on behalf of the customer in satisfaction of the principal and interest charges in accordance with the applicable RBI guidelines. Any surplus arising out of the disposal of the pledged gold is refunded to the customer or is appropriated towards any other liability by the borrower. In the event that the recoverable amount is more than the realisable value of the pledged gold, the customer remains liable for the shortfall.

The processes involved in approving and disbursing a Gold Loan are divided into three phases:

- Pre-disbursement;
- Post disbursement; and
- Release of the pledge.

Pre-disbursement process

Gold Loan appraisal of a customer involves the following steps

(a) Customer identification

Gold Loans are sanctioned only to genuine borrowers. Before sanctioning the Gold Loan, the branch manager should take all precautions to ensure that the applicant, pledging the ornaments, is the owner of those ornaments and that the borrower is genuine. The branch manager should obtain ID proof and photograph of the borrower and assign a branch KYC ID No. and should also make reasonable enquiry about the residence, job, personal details, ownership of the ornaments etc. and make a note in the pledge form. We also undertake a field verification to authenticate the genuineness of the borrower in case of high value Gold Loans.

(b) KYC Documentation

The borrower should produce government issued valid photo id, with an address which is within the designated area of the branch, as a necessary proof for KYC documentation. While processing the application, the branch ensures that the correct postal address of the borrower is entered in the computer such as name, door number, street name, name of post office, place, PIN code and the nearest land mark. Also, the borrower's telephone number is obtained. The branch also calls on the number furnished by the borrower every month, and reminds the borrower to remit the requisite interest, so that branch can know the telephone number is operational. Further if the telephone number of the borrower is not operational then the branch immediately contacts the borrower personally and obtains his new telephone number.

(c) Security appraisal

The branch manager/joint custodian and the branch staff shall appraise the gold ornaments thoroughly. Stone

weight should be deducted correctly in consultation with the branch manager and staff. Low purity and spurious items should be detected and not to be accepted as pledge. Appraisal is to be done by all members at the branch and the ornament shall be accepted only if all the branch staff approve. Neither the branch manager nor the joint custodian or any staff has the authority to accept a pledge on the basis of his/her own assessment of the ornaments. It is strictly a group task and all the branch staff are equally responsible in the process. After pledging gold ornaments, the same should be packed immediately. The manager and joint custodian should sign across the packet and affix the branch sticker on the cover and keep it in the safe. The safe is to be locked by all the custodians together.

(d) Documentation

For each pledge of the gold, branch appraisal certificate, application for personal loan, customer's token etc., are adequately documented and all the details pertaining to the gold, including the weight and items pledged are to be mentioned.

Post-disbursement process

The period/tenure for a Gold Loans is maximum upto 12 months. Timely interest collection and closing of accounts within the specified period is vital for the successful and smooth functioning of gold loan companies like that of ours. To ensure this, the branches regularly follow up with their gold loan customers through notices served at three months (ordinary notice), six-months (registered notice), and nine months (registered notice with acknowledgement due) as well as personal contacts directly and over the phone.

Branch security and safety measures: Electronic Security System

Branches are normally equipped with security devices (alarms) which automatically alert the branch manager, regional manager as well as the nearest police station in the event of any theft attempts. The gold pledged as security is insured with an insurance company. Our Company makes periodic analysis and revises the insurance policy as per the value/quantity of the gold.

Release of pledge

Once a loan is fully repaid, the pledged gold jewellery is returned to the customer. The customer must be present personally along with the gold loan token, at the branch where the pledge was originally made. The branch will verify the person with the photo taken at the time of pledge and confirm that there is no foul play and the amount to be paid is informed to the customer from the software and clarifies doubts if any on the amount demanded. The customer pays the amount at the cash counter and the ornaments are taken out of the safe and handed over to the customer after confirming them with the list of ornaments mentioned in the token and gold loan application form.

Customer Evaluation, Credit Appraisal and Disbursement

Our Credit Policies

All loans are sanctioned under the credit policy approved by our Board of Directors. Emphasis is applied on demonstrated past and future assessment of income, repayment capacity and credit history prior to approving any loan. Our Company undertakes periodic update of credit policies based on portfolio performance, product profitability and market and economic development.

Loan Origination

Our Company sources all potential customers through our branches and trained sourcing teams.

Evaluation

Our Company undertakes various credit control checks and field investigations on a prospective customer which, *inter-alia*, includes an internal data de-duplication check, CIBIL database check, fraud verification, asset verification and valuation, trade credit reference checks and other legal and technical verification procedures. After having completed our internal verification procedures all documents submitted by the prospective customer are checked and verified as required and any discrepancies and/or gaps in such documentation are highlighted and sent to the prospective customer for corrections, explanations and resubmissions as required.

Our Company conducts various diligence procedures in connection with the collateral/security for such loans which include review and verification of the relevant ownership documents and obtain title reports as applicable. Reports from these checks along with detailed analysis of financial statements, tax challans, bank statements and other documents put together constitute the credit file for all customers. These files are at length reviewed by the credit managers for evaluation using credit evaluation tool. Based on the document review the credit managers conduct personal discussions with the customers at their workplace. The discussion is intended to gather information about the business model of the customer, his positioning in the value chain, dependence of suppliers and/or customers and to ascertain any business risks like export dependence, raw-material supplies, etc. which might adversely impact the business cash flows and hence diminish repayment capacity. Further, additional business documents like stock registers and books of accounts are reviewed during such visits. Based on the all the information gathered, and assessment of customer's business risks, debt servicing ability and collateral risks, the credit manager puts the transaction proposal to appropriate approving committee in the hierarchy for decision.

Credit Appraisal

Approval and Disbursement Process

Once the credit history, credentials, information and documents have been submitted by the prospective customer and verified to our satisfaction, the applications are approved at the appropriate credit approval level.

There are four progressive levels of approvals which a proposal can be put to which are based on loan product, loam amount and identified risks. All proposals require minimum of two approvals and up to four approvals for larger ticker size loans. With due sanctioning of the loan, we execute agreements in connection with the loan and creation of security in relation thereto, if any, with the customer. Margin money and other charges, if any, are collected prior to loan disbursements. The disbursing officer retains evidence of the applicant's acceptance of the terms and conditions of the loan as part of the loan documentation.

Prior to the loan disbursement, our concerned officer ensures that a Know Your Customer, ("**KYC**"), checklist is completed by the applicant. The concerned officer verifies such information provided and includes the records in the relevant loan file. The officer is also required to ensure that the contents of the loan documents are explained in detail to the customer either in English or in the local language of the customer. The customer is provided with a copy of the loan documents executed by him. Further although our customers have the option of making payments by cash or cheque, we may require the applicant to submit post-dated cheques covering an initial period prior to any loan disbursement.

Loan administration and monitoring

The customer (and guarantor, if any) execute(s) the security creation documents and the loan agreement setting out the terms of the loan. A loan repayment schedule is attached as a schedule to the loan agreement, which

generally sets out periodical repayment terms. Repayments are made in periodical instalments. Loans disbursed are recovered from the customer in accordance with the loan terms and conditions agreed with the customer. We track loan repayment schedules of our customers on a monthly basis, based on the outstanding tenure of the loans, the number of instalments due and defaults committed, if any. This data is analysed based on the loans disbursed and location of the customer. All recovery of amounts due on loans is managed internally by us. We ensure complete focus on all stages of the collections process. We monitor the completeness of documentation, creation of security etc. through regular visits to the business outlets by our regional as well as head office executives and internal auditors. All customer accounts are reviewed on a regular basis.

Our Company believes that close monitoring of debt servicing efficiency enables us to maintain high recovery ratios and maintain satisfactory asset quality.

MICROFINANCE

Our microfinance operations entail providing micro credit lending to our customers who are predominantly located in rural and semi-urban areas of our targeted geographies in India and the purpose of loans sanctioned to them is mainly for utilisation in small businesses or for other income generating activities but not for personal consumption. Primarily, we utilise a village centred, group lending model to provide unsecured loans to our members. This model relies on a form of 'social collateral' and ensures credit discipline through peer support within the group. This model presupposes our members being prudent in conducting their financial affairs and prompt in repaying their outstanding borrowings. As a deterrent, any instance of failure to make timely loan repayments by an individual borrower prevents the other members in the group from making any further borrowings from us, in the future. Therefore, the KFLs tend to employ peer support to encourage the delinquent borrower to make timely repayments or often repay on behalf of a defaulting borrower, effectively providing an informal joint guarantee on the sanctioned loan.

PORTFOLIO MANAGEMENT, COLLECTION AND RECOVERY PROCESSES

Our Company manages the portfolio management and collection processes in-house. We have on-roll collection personnel across branches to ensure timely collection of dues. As part of our collection process we have tele-calling through which calls to all customers are made before the due-dates. In-case of non-payment the team initiates collection calling for dues. We utilise our branch personnel for collection of payment. Further, for effective recovery management, all early delinquent customers are management by a dedicated team which undertakes methodical customer visits for recovery of dues. In cases where customers are unable to make payments and move to higher delinquency levels, a specified team of collection officers including branch managers, regional managers and other such officials are deployed who manage deep delinquent accounts. In addition to customer visits, this team utilises available legal tools for attachment of properties, for re-payment of dues and legal arbitration proceedings.

INSURANCE AGENCY

With a view to expand our regular fee and commission based income, we finalised a corporate agency agreement with the Life Insurance Corporation of India for marketing their life insurance plans, as a corporate agent, with effect from April 23, 2015. Risk Management

Risk management forms an integral part of our business as we are exposed to various risks relating to the Gold Loan business. The objective of our risk management systems is to measure and monitor the various risks, we are subject to and to implement policies and procedures to address such risks suitably. We intend to continue to improve our operating processes and risk management systems which will further enhance our ability to manage the risks inherent to our business.

Asset and Liability Management ("ALM")

Our business operations require steady flow of working capital and hence managing the day to day liquidity becomes a critical function. The ALM, amongst other functions, is concerned with risk management, providing a comprehensive as well as a dynamic framework for measuring, monitoring and managing liquidity and interest rate risk. The ALM function also alters the asset-liability portfolio in order to manage risks. The ALM also monitors interest rate sensitivity in our portfolio and takes pre-emptive steps to mitigate any potential liquidity and interest rate risks.

Credit Risk

Credit risk is the possibility of loss due to the failure of any counterparty abiding by the terms and conditions of any financial contract with us. We aim to reduce the aforesaid credit risk through a rigorous loan approval and collateral appraisal process, as well as a strong NPA monitoring and collection strategy. This risk is diminished because the gold jewellery used as collateral for our loans can be readily liquidated, and there is only a remote possibility of recovering less than the amounts due to us in light of the 25 % margin retained on the value of the gold jewellery collateral. However, a sustained decrease in the market price of gold can cause a decrease in the size of our loan portfolio and our interest income.

Operational Risk

Operational risk is broadly defined as the risk of direct or indirect loss due to the failure of systems, people or processes, or due to certain other external events. We have instituted a series of checks and balances, including an operating manual, and both internal and external audit reviews. Although we disburse loans in a relatively short period of time, we have clearly defined appraisal methods as well as KYC compliance procedures in place to mitigate operational risks. Any loss on account of failure by employees to comply with defined appraisal

mechanism is recovered out of their variable incentive. We also have detailed guidelines on movement and security measures of cash or gold. We are in the process of introducing centralised software which automates inter branch transactions, enabling branches to be monitored centrally and thus reducing the risk of un-reconciled entries. In addition, we are in the process of installing surveillance cameras across our various branches, and subscribe to insurance to cover employee theft or fraud and burglary. Our internal audit department and our centralised monitoring systems assist in the management of operational risk.

Financial Risk

Our business is cash intensive and requires substantial funds, on an ongoing basis to finance the gold loan portfolio and to grow it. Any disruption in the funding sources might have an adverse effect on our liquidity and financial condition. Our Company is proactively pursuing a system of identifying and accessing newer and cheaper sources of funds, to finance the loan book and to grow the business. Our Asset Liability Committee meets regularly and reviews the liquidity position of our Company and ensures availability of sufficient funding in advance.

Market Risk

Market risk refers to potential losses arising from the movement in market values of interest rates in our business. The objective of market risk management is to avoid excessive exposure of our earnings to loss. The majority of our borrowings, and all the loans we make, are at fixed rates of interest. Thus, presently, our interest rate risk is minimal.

Our Risk Management Policy

In order to address the risks that are inherent to our business, we have developed a risk management architecture that includes a risk management committee, internal audit department, vigilance department and a risk management department. Our Risk Management Committee, which is led by one of our Directors, oversees our risk management policies, which help us to identify, measure, monitor and mitigate the various risks that we face in our businesses.

Internal Audit Department

Our internal audit department assists in the management of operational risk using our centralised monitoring systems. Separate divisions of our internal audit department are in place to handle the audit of the departments of the corporate office and those of the branch offices. The audits of our branches are divided into two categories: (i) Audit and (ii) Inspection. Branch audit is carried out quarterly with the focus on the verification of documents, accounts, performance and compliance. In addition, an incremental high value loan check is carried out by regional managers as part of their periodical branch inspection.

Vigilance Department

We have an internal vigilance department for undertaking surprise inspections of high/medium risk branches and other branches or on the basis of any report or detection of serious deviations or irregularities. The vigilance undertakes the responsibility of visiting branches to oversee the implementation of risk mitigation initiatives and improvements in customer service.

Risk Management Audit

Our branch auditors also carry out a system driven risk audit on certain identified key risk parameters. These are keyed into the system and alerts are sent to branch controllers and top management in case the risk weight given under a specific parameter goes beyond the prefixed tolerance levels. In all such cases, the concerned branches are inspected by the branch controllers or top management personnel depending on the severity of risk and immediate remedial actions are initiated.

ALM Organisation

The Asset - Liability Committee (ALCO) is responsible for ensuring adherence to the limits set by the Board as well as for deciding the business strategy of our Company (on the assets and liabilities sides) in line with our Company's budget and decided risk management objectives.

The business and risk management strategy of our Company will ensure that our Company operates within the

limits/parameters set by the Board. The business issues that an ALCO would consider, inter alia, includes product pricing, desired maturity profile and mix of the incremental assets and liabilities, prevailing interest rates offered by other peer NBFCs for the similar services/product, etc. In addition to monitoring the risk levels of our Company, the ALCO reviews the results of and progress in implementation of the decisions made in the previous meetings. The ALCO would also articulate the current interest rate view of our Company and base its decisions for future business strategy on this view.

The frequency of holding ALCO meetings will be quarterly.

Liquidity Risk Management

Our ALCO measures not only the liquidity position of our Company on an ongoing basis but also examines how liquidity requirements are likely to evolve under different assumptions. Experience shows that assets commonly considered as liquid, like Government securities and other money market instruments, could also become illiquid when the market and players are unidirectional. Therefore, liquidity has to be tracked through maturity or cash flow mismatches. For measuring and managing net funding requirements, the use of a maturity ladder and calculation of cumulative surplus or deficit of funds at selected maturity dates is adopted as a standard tool. The format of the **Statement of Structural Liquidity** as prescribed by RBI may be used for this purpose.

The Maturity Profile based on ALM – II could be used for measuring the future cash flows of company in different time buckets. The time buckets may be distributed as under:

(i) 1 day to 7 days
(ii) 8 days to 14 days
(iii) 15 days to 1 month
(iv) Over one month and up to 2 months
(v) Over 2 months and up to 3 months
(vi) Over 3 months and up to 6 months
(vii) Over 6 months and up to 1 year
(viii) Over 1 year and up to 3 years
(ix) Over 3 years and up to 5 years
(x) Over 5 years

The Statement of Structural Liquidity shall be prepared by placing all cash inflows and outflows in the maturity ladder according to the expected timing of cash flows. A maturing liability will be a cash outflow while a maturing asset will be a cash inflow. While determining the likely cash inflows/outflows, company will have to make a number of assumptions according to their asset - liability profiles. While determining the tolerance levels, the company may take into account all relevant factors based on their asset-liability base, nature of business, future strategy, etc.

In order to enable the company to monitor their short-term liquidity on a dynamic basis over a time horizon spanning from 1 day to 6 months, company will estimate their short-term liquidity profiles on the basis of business projections and other commitments for planning purposes. An indicative format ALM – I issued by RBI for estimating 'Short-term Dynamic Liquidity' will be used for the said purpose.

Interest Rate Risk (IRR)

The operational flexibility given to NBFCs in pricing most of the assets and liabilities imply the need for the financial system to hedge the Interest Rate Risk. Interest Rate Risk is the risk where changes in market interest rates might adversely affect an NBFC's financial condition. The changes in interest rates affect our Company. The immediate impact of changes in interest rates is on our Company's earnings (i.e. reported profits) by changing its Net Interest Income (NII). As such our Company is into funding of loans which are always fixed rate loans. The company manages risk on NII by pricing its loan products to customers at a rate which covers Interest Rate Risk. The risk from the earnings perspective can be measured as changes in the NII or Net Interest Margin (NIM). Measurement of such risk is done at the time of deciding rates to be offered to customers. Once interest rate risk is measured by the ALCO, lending rates are finalised. RBI has prescribed ALM – III for the purpose of Interest Rate Risk Monitoring and our Company may use the same for the purpose of measurement and monitoring of interest rate risk.

Non-performing Assets (NPA)

The RBI Master Directions require that every non-deposit taking NBFC shall, after taking into account the degree of well-defined credit weaknesses and extent of dependence on collateral security for realisation, classify its lease/hire purchase assets, loans and advances and any other forms of credit into the following classes:

ii. Sub-standard assets;

iii. Doubtful assets; and

iv. Loss assets.

Further, the class of assets referred to above shall not be upgraded merely as a result of rescheduling, unless it satisfies the conditions required for an upgrade. Currently, we are required to maintain a minimum capital ratio consisting of Tier I and Tier II capital which shall not be less than 15% of its aggregate risk weighted assets on balance sheet and of risk adjusted value of off-balance sheet items. Additionally, we are required to transfer up to 20% of our annual profit to a reserve fund and make provisions for NPAs. We have satisfied the minimum capital adequacy ratios prescribed by the RBI for the financial year ended March 31, 2020.

Technology

We use information technology as a strategic tool for our business operations to improve our overall productivity and efficiency. We believe that through our information systems which are currently in place, we are able to manage our operations efficiently, market effectively to our target customers, and effectively monitor and control risks.

We believe that this system has improved customer service by reducing transaction time and has allowed us to manage loan collection efforts better and to comply with regulatory record-keeping and reporting requirements. All our branches are computerised. A need was felt for a centralised IT platform for our continued aggressive growth along with risk management. Accordingly, we are in the process of introducing new software to improve the operational efficiency.

Security threats and measures taken to mitigate them

The principal security risks to our operations are robbery and employee theft or fraud. We have extensive security and surveillance systems and dedicated security personnel to counter external security threats. To mitigate internal threats, we undertake careful pre-employment screening, including obtaining references before appointment. We also started installing surveillance cameras across our branches. To protect against robbery, all branch employees work behind wooden, glass and steel counters, and the back office, strong room/safe and computer areas are locked and closed to customers. We also keep the pledged gold in joint custody. While we provide around the clock armed security guards for risk prone branches, the majority of our branches do not require security guards as the gold jewellery are stored securely in strong rooms. Since we handle high volumes of cash and gold jewellery at our locations, daily monitoring, spot audits and immediate responses to irregularities are critical to our operations. We have an internal auditing program that includes unannounced branch audits and cash counts at randomly selected branches.

Competition

We face competition from banks, NBFCs and other unregulated/unorganised money lenders. Our Board believes that we can achieve economies of scale and increased operating efficiencies by increasing the number of branches under operation and proven operating methods. We believe that the primary elements of competition are the quality of customer service and relationship management, branch location and the ability to lend competitive amounts at competitive rates. In addition, we believe the ability to compete effectively will be based increasingly on strong management, regional market focus, automated management information systems and access to capital.

2. This Statement, which is the responsibility of the company's management and approved by the Company's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid in the Indian Accounting Standard 34 "Interim Financial Reporting" (IND AS 34), prescribed under section 133 of the Company's Act, 2013 read with the relevant rules issued thereunder and other accounting principles generally accepted in India. 4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying unaudited standalone interim financial information does not give a true and fair view of the state of affairs of the entity as at September 30, 2020, and of its results of operations and its cash flows for the six months period then ended in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with the Companies (Accounts)Rules, 2014, the Companies (Indian Accounting Standards) Amendment Rules, 2020.

For all periods up to and including the year ended 31 March 2019, the Company prepared its financial statements in accordance with accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP or previous GAAP). The financial statements for the year ended 31 March 2020 are the first financial statement of the Company prepared in accordance with Ind AS. Refer to note No. 42 on First time adoption to Ind AS for information on adoption of Ind AS by the Company.

2.2 Basis of measurement

The financial statements have been prepared on a historical cost basis, except for following assets and liabilities which have been measured at fair value:

i) Fair value through other comprehensive income (FVOCI) instruments,
ii) Other financial assets held for trading,
iii) Financial assets and liabilities designated at fair value through profit or loss (FVTPL)

2.3 Functional and presentation currency

The financial statements are presented in Indian Rupees (INR) which is also its functional currency.

3. Significant accounting policies

3.1 Recognition of interest income

The Company recognises interest income by applying the effective interest rate (EIR) to the gross carrying amount of a financial asset except for purchased or originated credit-impaired financial assets and other credit-impaired financial assets.

For purchased or originated credit-impaired financial assets, the Company applies the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition.

For other credit-impaired financial assets, the Company applies effective interest rate to the amortised cost of the financial asset in subsequent reporting periods.

The effective interest rate on a financial asset is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of a financial asset .While estimating future cash receipts, factors like expected behaviour and life cycle of the financial asset, probable fluctuation in collateral value etc. are considered which has an impact on the EIR.

While calculating the effective interest rate, the Company includes all fees and points paid or received to and from the borrowers that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

3.2 Recognition of revenue from sale of goods or services

Revenue (other than for Financial instruments within the scope of Ind AS 109) is measured at an amount that reflects the considerations, to which an entity expects to be entitled in exchange for transferring goods or services to customer, excluding amounts collected on behalf of third parties.

The Company recognises revenue from contracts with customers based on a five-step model as set out in Ind AS 115:

Step 1: Identify contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

| Kottayam | Bangalore | Trivandrum | Ettumanoor | Kochi | Kannur | Chennai |
http://www.vrc.co.in

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Company allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

Step 5: Recognise revenue when (or as) the Company satisfies a performance obligation

Revenue from contract with customer for rendering services is recognised at a point in time when performance obligation is satisfied.

3.3 Financial instruments

A. Financial Assets

3.3.1 Initial recognition and measurement

All financial assets are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition

3.3.2 Subsequent measurement

The Company classifies its financial assets into various measurement categories. The classification depends on the contractual terms of the financial assets' cash flows and the Company's business model for managing financial assets.

a. Financial assets measured at amortised cost

A financial asset is measured at Amortised Cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b Financial assets measured at fair value through other comprehensive income (FVOCI)

A financial asset is measured at FVOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and contractual terms of financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

c. Financial assets measured at fair value through profit or loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

B. Financial liabilities

3.3.3 Initial recognition and measurement

All financial liabilities are recognized initially at fair value and, in the case of borrowings and payables, net of directly attributable transaction costs. The company's financial liabilities include trade and other payables, non-convertible debentures, loans and borrowings including bank overdrafts.

3.3.4 Subsequent Measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method.

http://www.vrc.co.in

3.4 Derecognition of financial assets and liabilities

3.4.1 Financial Asset

The Company derecognizes a financial asset when the contractual cash flows from the asset expire or it transfers its rights to receive contractual cash flows from the financial asset in a transaction in which substantially all the risks and rewards of ownership are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

3.4.2 Financial Liability

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as de-recognition of the original liability and the recognition of a new liability with the difference charged to profit or loss.

3.5 Offsetting

Financial assets and financial liabilities are generally reported gross in the balance sheet. Financial assets and liabilities are offset and the net amount is presented in the balance sheet when the Company has a legal right to offset the amounts and intends to settle on a net basis or to realise the asset and settle the liability simultaneously in all the following circumstances:

a. The normal course of business
b. The event of default
c. The event of insolvency or bankruptcy of the Company and/or its counterparties

3.6 Impairment of financial assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' model (ECL), for evaluating impairment of financial assets other than those measured at Fair value through profit and loss.

Further, in accordance with RBI circular no. RBI/2019-20/170 dated March 13, 2020, the impairment allowances as per ECL shall be compared with the required provisioning under IRACP. If the impairment allowance under Ind AS 109 is lower than the provisioning required under IRACP the difference is appropriated from net profit after tax to 'Impairment Reserve'.

3.6.1 Overview of the Expected Credit Loss (ECL) model

Expected Credit Loss, at each reporting date, is measured through a loss allowance for a financial asset:

- At an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition.
- At an amount equal to 12-month expected credit losses, if the credit risk on a financial instrument has not increased significantly since initial recognition.

Lifetime expected credit losses means expected credit losses that result from all possible default events over the expected life of a financial asset.

12-month expected credit losses means the portion of Lifetime ECL that represent the ECLs that result from default events on financial assets that are possible within the 12 months after the reporting date.

The Company performs an assessment, at the end of each reporting period, of whether a financial asset's credit risk has increased significantly since initial recognition. When making the assessment, the change in the risk of a default occurring over the expected life of the financial instrument is used instead of the change in the amount of expected credit losses.

Based on the above process, the Company categorises its loans into three stages as described below:

3rd Floor, CSI Commercial Centre, Baker Jn., P. B. No. 227, Kottayam - 686 001
|Tel: 0481 2301999, 2581999 |Mob: 8547224272 | Email: kottayam@vrc.co.in|

| Kottayam | Bangalore | Trivandrum | Ernamanoor | Kochi | Kannur | Chennai |
http://www.vrc.co.in

For non-impaired financial assets

- Stage 1 is comprised of all non-impaired financial assets which have not experienced a significant increase in credit risk (SICR) since initial recognition. A 12-month ECL provision is made for stage 1 financial assets. In assessing whether credit risk has increased significantly, the Company compares the risk of a default occurring on the financial asset as at the reporting date with the risk of a default occurring on the financial asset as at the date of initial recognition. Interest revenue is calculated on the gross carrying amount of the asset.
- Stage 2 is comprised of all non-impaired financial assets which have experienced a significant increase in credit risk since initial recognition. The Company recognises lifetime ECL for stage 2 financial assets. In subsequent reporting periods, if the credit risk of the financial instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then entities shall revert to recognizing 12 months ECL provision. Interest revenue is calculated on the gross carrying amount of the asset.

For impaired financial assets:

Financial assets are classified as stage 3 when there is objective evidence of impairment at the reporting date.

The Company recognises lifetime ECL for impaired financial assets and interest revenue is calculated on the net carrying amount of the asset.

3.6.2 Estimation of Expected Credit Loss

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

Probability of Default (PD) - The Probability of Default is an estimate of the likelihood of default over a given time horizon.

The Company uses historical information where available to determine PD. Considering the different products and schemes, the Company has bifurcated its loan portfolio into various pools.

Exposure at Default (EAD) - The Exposure at Default is an estimate of the exposure at a future default date, considering expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected draw downs on committed facilities, and accrued interest from missed payments.

Loss Given Default (LGD) – The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral.

Forward looking information

While estimating the expected credit losses, the Company reviews macro-economic developments occurring in the economy and market it operates in. On a periodic basis, the Company analyses if there is any relationship between key economic trends like GDP, unemployment rates, benchmark rates set by the Reserve Bank of India, inflation etc. with the estimate of PD, LGD determined by the Company based on its internal data. While the internal estimates of PD, LGD rates by the Company may not be always reflective of such relationships, temporary overlays, if any, are embedded in the methodology to reflect such macro-economic trends reasonably

To mitigate its credit risks on financial assets, the Company seeks to use collateral, where possible. The collateral comes in various forms, such as Land, Building, securities etc. However, the fair value of collateral affects the calculation of ECL. To the extent possible, the Company uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral is valued based on data provided by third parties or management judgments. In its normal course of business whenever default occurs, the Company may take possession of properties or other assets in its retail portfolio and generally disposes such assets through auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, assets under legal repossession processes are not recorded on the balance sheet. Loans are written off (either partially or in full) when there is no realistic prospect of recovery. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subjected to write-offs.

Any subsequent recoveries against such loans are credited to the statement of profit and loss.

3.7 Determination of fair value of Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

i. In the principal market for the asset or liability, or

ii. In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows.

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability ,either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. No such instances of transfers between levels of the fair value hierarchy were recorded during the reporting period.

3.8 Cash and cash equivalents

Cash and cash equivalents comprise of cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

3.9 Bank balances other than cash and cash equivalents

Bank balances other than cash and cash equivalents include earmarked balances with banks and balances which are held as margin money or security against borrowings, guarantees and other commitments.

3.10 Other receivables

Other receivables mean receivables emanating from items that are classified as 'others' under 'Revenue from Operations'.

3.11 Property, plant and equipment

Property, plant and equipment (PPE) are measured at cost less accumulated depreciation and accumulated impairment, if any. Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly

attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

Advances paid towards the acquisition of fixed assets, outstanding at each reporting date are shown under other non-financial assets. The cost of property, plant and equipment not ready for its intended use at each reporting date are disclosed as capital work-in-progress. Subsequent expenditure related to the asset are added to its carrying amount or recognised as a separate asset only if it increases the future benefits of the existing asset, beyond its previously assessed standards of performance and cost can be measured reliably. Other repairs and maintenance costs are expensed off as and when incurred.

3.11.1 Depreciation

Depreciation on property, plant and equipment is calculated using written down value method (WDV) to write down the cost of property and equipment to their residual values over their estimated useful lives which is in line with the estimated useful life as specified in Schedule II of the Companies Act, 2013.

The estimated useful lives are as follows:	
Particulars	*Useful Life*
Building	*60 Years*
Building - Compound Wall and Well	*5 Years*
Furniture and Fixtures	*10 Years*
Electrical Fittings	*10 Years*
Computer	*3 Years*
Vehicles	*8 Years*
Plant and Machinery	*22 Years*

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate. Changes in the expected useful life are accounted for by changing the amortisation period or methodology, as appropriate, and treated as changes in accounting estimates.

Property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in other income / expense in the statement of profit and loss in the year the asset is derecognised. The date of disposal of an item of property, plant and equipment is the date the recipient obtains control of that item in accordance with the requirements for determining when a performance obligation is satisfied in Ind AS 115.

3.12 Intangible assets

An intangible asset is recognised only when its cost can be measured reliably and it is probable that the expected future economic benefits that are attributable to it will flow to the Company.

Intangible assets acquired separately are measured on initial recognition at cost. The cost of an intangible asset comprises its purchase price including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses

Subsequent expenditure related to the asset is added to its carrying amount or recognised as a separate asset only if it increases the future benefits of the existing asset, beyond its previously assessed standards of performance and cost can be measured reliably.

Intangible assets comprising of software is amortised on straight line basis over a period of 10 years, unless it has a shorter useful life.

Gains or losses from derecognition of intangible assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit or Loss when the asset is derecognised.

3.13 Impairment of non-financial assets: Property, Plant and Equipment and Intangible Assets

The Company assesses, at each reporting date, whether there is any indication that any property, plant and equipment and intangible assets or group of assets called Cash Generating Units (CGU) may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount to determine the extent of impairment, if any.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.
An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

3.14 Finance costs

Finance costs represents interest expense recognised by applying the Effective Interest Rate (EIR) to the gross carrying amount of financial liabilities other than financial liabilities classified as FVTPL.
The EIR in case of a financial liability is computed
a. As the rate that exactly discounts estimated future cash payments through the expected life of the financial liability to the gross carrying amount of the amortised cost of a financial liability.
b. By considering all the contractual terms of the financial instrument in estimating the cash flows.
c. Including all fees paid between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. Any subsequent changes in the estimation of the future cash flows are recognised in interest income with the corresponding adjustment to the carrying amount of the assets

3.15 Employee Benefits Expenses

3.15.1 Short Term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. These benefits include benefits such as salaries, wages, short term compensated absence etc. The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

A. Defined contribution schemes

All eligible employees of the company are entitled to receive benefits under the provident fund, a defined contribution plan in which both the employee and the company contribute monthly at a stipulated percentage of the covered employee's salary. Contributions are made to Employees Provident Fund Organization in respect of Provident Fund at the prescribed rates and are charged to Statement of Profit & Loss at actuals. The company has no liability for future provident fund benefits other than its annual contribution.

B. Defined Benefit schemes

Gratuity

The Company provides for gratuity covering eligible employees under which a lumpsum payment is paid to vested employees at retirement, death, incapacitation or termination of employment, of an amount reckoned on the respective employee's salary and his tenure of employment with the Company. The Company accounts for its liability for future gratuity benefits based on actuarial valuation determined at each Balance Sheet date by an independent Actuary using Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows. The discount rates used for determining the present value of the obligation under defined benefit plan are based on the market yields on Government Securities as at the Balance Sheet date.

An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, attrition rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, these liabilities are highly sensitive to changes in these assumptions. All assumptions are reviewed annually.

Re-measurement, comprising of actuarial gains and losses (excluding amounts included in net interest on the net defined benefit liability), are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through Other Comprehensive Income in the period in which they occur. Re-measurements are not reclassified to profit and loss in subsequent periods

3.16 Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

When the effect of the time value of money is material, the company determines the level of provision by discounting the expected cash flows at a pre-tax rate reflecting the current rates specific to the liability. The expense relating to any provision is presented in the statement of profit and loss net of any reimbursement.

3.17 Taxes

Income tax expense for the year comprises of current tax and deferred tax.

3.17.1 Current Tax

Current tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from, or paid to, the taxation authorities.

http://www.vrc.co.in

The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the end of reporting date in India where the Company operates and generates taxable income. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss i.e., either in other comprehensive income or in equity.

Current tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.17.2 Deferred tax

Deferred tax is provided on temporary differences at the reporting date between the tax bases of assets and liabilities used in the computation of taxable profit and their carrying amounts in the financial statements for financial reporting purposes.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss i.e., either in other comprehensive income or in equity. Deferred tax items are recognised in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

3.17.3 Goods and services tax /value added taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the goods and services tax/value added taxes paid, except:
i. When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
ii. When receivables and payables are stated with the amount of tax included, the net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

3.18 Other Income and expenses

All other income and expense are recognized in the period they occur.

3.19 Contingent Liabilities and Assets

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot

be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent assets are neither recognized nor disclosed in the financial statements.

3.20 Earnings Per Share

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic EPS is calculated by dividing the net profit or loss for the year attributable to equity shareholders (after deducting preference dividend and attributable taxes) by the weighted average number of equity shares outstanding during the year.
The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date. In computing the dilutive earnings per share, only potential equity shares that are dilutive and that either reduces the earnings per share or increases loss per share are included.

3.21 Foreign currency transactions

Transactions in foreign currencies are translated into the functional currency of the Company at the exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date and the resultant exchange differences are recognised in the Statement of Profit and Loss. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.

3.22 Cash-flow statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, investing and financing activities of the Company are segregated.

3.23 Leases

The Company has adopted Ind AS 116-Leases effective from 1st April, 2019, using the modified retrospective method. The Company has applied the standard to its leases with the cumulative impact recognised on the date of initial application.

The Company's lease asset classes primarily consist of leases for buildings. The Company assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:
(i) the contract involves the use of an identified asset

3rd Floor, CSI Commercial Centre, Baker Jn., P. B. No. 227, Kottayam - 686 001
|Tel: 0481 2301999, 2581999 |Mob: 8547224272 |Email: kottayam@vrc.co.in|

| Kottayam | Bangalore | Trivandrum | Ettumanoor | Kochi | Kannur | Chennai |
http://www.vrc.co.in

(ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and
(iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognises a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term
leases) and leases of low value assets. For these short-term and leases of low value assets, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease.

The right-of-use assets are initially recognised at cost, which comprises the initial amount of the lease liability adjusted for
any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. They are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The lease liability is initially measured at the present value of the future lease payments. The lease payments are discounted using the interest rate implicit in the lease or, if not readily determinable, using the incremental borrowing rates. The lease liability is subsequently re measured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made.

A lease liability is re measured upon the occurrence of certain events such as a change in the lease term or a change in an index or rate used to determine lease payments. The re measurement normally also adjusts the leased assets. Lease liability and ROU asset have been separately presented in the Balance Sheet and lease payments have been classified as financing cash flows.

4 Significant accounting judgments, estimates and assumptions

The preparation of financial statements in conformity with the Ind AS requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the accompanying disclosure and the disclosure of contingent liabilities, at the end of the reporting period. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

4.1 Business Model Assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Company monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial

http://www.vrc.co.in

assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets

4.2 Effective Interest Rate (EIR) method

The Company's EIR methodology recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected behavioural life of loans given and recognises the effect of potentially different interest rates at various stages and other characteristics of the product life cycle (including prepayments and penalty interest and charges).

This estimation, by nature, requires an element of judgment regarding the expected behaviour and life-cycle of the instruments, probable fluctuations in collateral value as well as expected changes to India's base rate and other fee income/expense that are integral parts of the instrument

4.3 Impairment of loans portfolio

The measurement of impairment losses across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

It has been the Company's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

4.4 Contingent liabilities and provisions other than impairment on loan portfolio

The Company operates in a regulatory and legal environment that, by nature, has a heightened element of litigation risk inherent to its operations. As a result, it is involved in various litigation and arbitration in the ordinary course of business. When the Company can reliably measure the outflow of economic benefits in relation to a specific case and considers such outflows to be probable, the Company records a provision against the case. Where the probability of outflow is considered to be remote, or probable, but a reliable estimate cannot be made, a contingent liability is disclosed. Given the subjectivity and uncertainty of determining the probability and amount of losses, the Company takes into account a number of factors including legal advice, the stage of the matter and historical evidence from similar incidents. Significant judgment is required to conclude on these estimates

4.5 Defined employee benefit assets and liabilities

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed annually.

4.6 Fair value measurement:

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

The Company has prepared these Financial Statements to comply in all material respects with Accounting Standards notified under The Companies (Accounting Standards) Rules, 2006 (as amended) and the relevant provisions of the Companies Act, 2013 and the guidelines issued by the Reserve bank of India as applicable to a Systemically Important Non-Deposit Accepting NBFC. The Financial Statements have been prepared on an accrual basis and under the historical cost convention except for interest on non-performing assets which are recognized on realization basis. The Accounting Policies adopted in the preparation of Financial Statements are consistent with those of previous year.

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions,

uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.
During the year ended March 31, 2019, the Company has complied with the requirements of Schedule III of Companies Act 2013 for the preparation and presentation of its financial statement. The Company has also reclassified the previous year figures in accordance with the requirements applicable in the current year

2.2 Depreciation & Property, Plant and Equipment

Tangible Assets are stated at cost less accumulated depreciation. The cost includes purchase consideration, financing costs till commencement of commercial production and other directly attributable costs incurred to bring an Asset to its working condition for its intended use. Subsidy towards specific assets is reduced from the cost of tangible assets. Tangible assets taken on Finance Lease are capitalized. The costs of Assets not ready for use as at the Balance Sheet date are disclosed under Capital Work-In-Progress.
Depreciation on Tangible Assets is provided based on the useful life of the asset in the manner prescribed in Schedule II to the Companies Act, 2013. The Company has used the following useful life to provide depreciation on its tangible assets.

Asset	Useful Life
Building	60 Years
Building-Compound Wall and Well	5 Years
Furniture & Fittings	10 Years
Electrical Fittings	10 Years
Computer	3 Years
Vehicles	8 Years
Plant & Machinery	22 Years

Pursuant to the enactment of Companies Act, 2013, the Company has applied the estimated useful lives as specified in schedule II. Accordingly the unamortized carrying value is being depreciated, amortized over the revised/remaining useful lives.

2.3 Intangible Asset

Intangible Assets are recorded at the consideration paid for acquisition less accumulated amortization and accumulated impairment, if any. Intangible assets are amortized over their estimated useful life subject to a maximum period of 10 years on straight line basis, commencing from the date the asset is available to the Company for its use
Expenditure for acquisition and implementation of software system is recognized as part of the intangible asset and amortized on straight line basis over a period of 10 years being the maximum period available for writing off of intangible asset.

2.4. Borrowing Costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognized in the Statement of Profit and Loss in the period in which they are incurred.

2.5 Impairment

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) net selling price and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining net selling price, recent market transactions are taken in to account, if available. If no such transactions can be identified, an appropriation valuation model is used. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

2.6 Leases
Leases where the lessor effectively retains substantially all risks and benefits of ownership of the leased term are classified as operating leases. Operating lease payments in respect of non-cancellable leases are recognized as an expense in the profit and loss account on a straight-line basis over the lease term.

2.7 Investments
Investments that are readily realizable and are intended to be held for not more than one year from the date, on which such investments are made, are classified as current investment. All other investments are classified as long term investments. Current investments are carried at cost or fair value, whichever is lower. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize decline other than temporary in the value of the investments.

2.8 Revenue Recognition
Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. In a situation where management believes that the recovery of interest is uncertain due to change in the price of the gold or otherwise, the Company recognizes income on such loans only to the extent it is confident of recovering interest from its customers through sale of underlying security or otherwise.
Interest income on loans given is recognized under the internal rate of return method. Such interests, where instalments are overdue in respect of non-performing asset are recognized on realization basis. Any such income recognized and remaining unrealized after the instalments become overdue with respect to non-performing asset is reversed. Revenue from fee-based activities is recognized as and when services are rendered. Interest on deposit is recognized on a time proportion basis taking in to account the amount outstanding and the rate applicable.

2.9 Employee Benefits

Short term Employee Benefits

All employee benefits payable wholly within twelve months of rendering the service are classified as Short term employee benefits. These benefits include benefits like salaries, wages, short term compensated absence such as paid annual leave and sickness leave. 2.10 Foreign currency transaction
On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

As at the reporting date, non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. All non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

All monetary assets and liabilities in foreign currency are restated at the end of accounting period. A monetary asset or liability is termed as a long-term foreign currency monetary item, if the asset or liability is expressed in a foreign currency and has a term of 12 months or more at the date of origination of the asset or liability.

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the income-tax Act, 1961 enacted in India.

Deferred tax charge or credit reflects the tax effects of timing difference between accounting income and taxable income for the period. The deferred tax charge of credit and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in future; however, where there is unabsorbed depreciation or carry forward losses, deferred tax assets are recognized, only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed at each Balance Sheet date and are written-down or written-up to reflect the amount that is reasonably/ virtually certain (as the case may be) to be realized.

Deferred Tax Assets and deferred tax liabilities are offset when there is a legally enforceable right to set off assets against liabilities representing current tax and where the deferred tax assets and the deferred tax liabilities relate to taxes on income levied by the same governing taxation laws.

Summary of significant difference among Indian GAAP and IND AS:

Topic	Indian GAAP	IND AS
Presentation of Financial Statements.	Other Comprehensive Income: There is no concept of 'Other Comprehensive Income' under Indian GAAP.	Other Comprehensive Income: Under Ind AS 1 there is a concept of Other Comprehensive Income ("OCI"). Other comprehensive income comprises items of income and expenses (including reclassification adjustments) that are not recognized in profit or loss as required or permitted by other Ind AS. Such recognition of income and expenses in OCI is primarily governed by the income recognition norms and classification of financial instruments and Assets as "Fair Value through OCI".
	Extraordinary items: Under Indian GAAP, extraordinary items are disclosed separately in the statement of profit and loss and are included in the determination of net profit or loss for the period. Items of income or expense to be disclosed as extraordinary should be distinct from the ordinary activities and are determined by the nature of the event or transaction in relation to the business ordinarily carried out by an entity.	Extraordinary items: Under Ind AS, presentation of any items of income or expense as extraordinary is prohibited.
	Change in Accounting Policies: Indian GAAP requires changes in accounting policies to be presented in the financial statements on a prospective basis (unless transitional provisions, if	Change in Accounting Policies: Ind AS requires retrospective application of changes in accounting policies by adjusting the opening balance of each affected component of equity for the earliest prior period

	any, of an accounting standard require otherwise) together with a disclosure of the impact of the same, if material. If a change in the accounting policy has no material effect on the financial statements for the current period, but is expected to have a material effect in the later periods, the same should be appropriately disclosed.	presented and the other comparative amounts for each period presented as if the new accounting policy had always been applied, unless transitional provisions of an accounting standard require otherwise.
Deferred Taxes	Under Indian GAAP, the Company determines deferred tax to be recognized in the financial statements with reference to the income statement approach i.e. with reference to the timing differences between profit offered for income taxes and profit as per the financial statements.	As per Ind AS 12 Income Taxes, deferred tax is determined with reference to the balance sheet approach i.e. based on the differences between carrying value of the assets/liabilities and their respective tax base. Using the balance sheet approach, there could be additional deferred tax charge/income on account of all Ind AS opening balance sheet adjustments.
Property, plant and equipment– reviewing, depreciation and residual value	Under Indian GAAP, the Company currently provides depreciation over the useful lives of the assets estimated by the Management.	Ind AS 16 mandates reviewing the method of depreciation, estimated useful life and estimated residual value of an asset at least once in a year. The effect of any change in the estimated useful and residual value shall be taken prospectively. Ind AS 101 allows current carrying value under Indian GAAP for items of property, plant and equipment to be carried forward as the cost under Ind AS.
Accounting for Employee benefits	Currently, under Indian GAAP the Company recognizes all short term and long term employee benefits in the profit and loss account as the services are received. For long term employee benefit, the Company uses actuarial valuation to determine the liability.	Under Ind AS 19, the change in liability is split into changes arising out of service, interest cost and re-measurements and the change in asset is split between interest income and re-measurements. Changes due to service cost and net interest cost/ income need to be recognized in the income statement and the changes arising out of re-measurements comprising of actuarial gains and losses representing changes in the present value of the defined benefit

Topic	Indian GAAP	IND AS
		obligation resulting from experience adjustment and effects of changes in actuarial assumptions are to be recognized directly in OCI and not reclassified to profit and loss in the subsequent period.
Provisions, contingent liabilities and contingent assets	Under Indian GAAP, provisions are recognized only under a legal obligation. Also, discounting of provisions to present value is not permitted.	Under Ind AS, provisions are recognized for legal as well as constructive obligations. Ind AS requires discounting the provisions to present value, if the effect of time value of money is material.
Presentation and classification of Financial Instruments and subsequent measurement	Currently, under Indian GAAP, the financial assets and financial liabilities are recognized at the transaction value. The Company classifies all its financial assets and liabilities as short term or long term. Long term investments are carried at cost less any diminution other than temporary in the value of such investments determined on a specific identification basis. Current investments are carried at lower of cost and fair value. Financial liabilities are carried at their transaction values. Disclosures under Indian GAAP are limited. Currently under Indian GAAP, loan processing fees and/or fees of similar nature are recognized upfront in the Statement of Profit and Loss.	Ind AS 109 requires all financial assets and financial liabilities to be recognized on initial recognition at fair value. Financial assets have to be either classified as measured at amortized cost or measured at fair value. Where assets are measured at fair value, gains and losses are either recognized entirely in profit or loss(FVTPL) or recognized in other comprehensive income (FVOCI). Financial assets include equity and debts investments, interest free deposits, loans, trade receivables etc. Assets classified at amortized cost and FVOCI and the related revenue (including processing fees and fees of similar nature) net of related costs have to be measured using the Effective Interest Rate (EIR) method. Financial liabilities classified at amortized cost and the related costs have been measured using the Effective Interest Rate (EIR) method. Loan processing fees and/or fees of similar nature would be measured and recognized using the Effective Interest Rate (EIR) method over the period of loan. There are two measurement categories for financial liabilities – FVTPL and amortized cost. Fair value adjustment on transition shall be adjusted against opening retained earnings on the date of transition. Disclosures under Ind AS are extensive.

Topic	Indian GAAP	IND AS
Financial Instruments – Impairment	Under Indian GAAP, the Company assesses the provision for doubtful debts at each reporting period, which in practice, is based on relevant information like past experience, financial position of the debtor, cash flows of the debtor, guidelines issued by the regulator etc.	The impairment model in Ind AS is based on expected credit losses and it applies equally to debt instruments measured at amortized cost or FVOCI, financing receivables, lease receivables, trade receivables and certain written loan commitments and financial guarantee contracts. The expected credit loss provision is applied based on the staging of the assets i.e. Stage 1 Assets, Stage 2 Assets and Stage 3 Assets; as detailed in "Our provisioning policy"
Financial Instruments - Disclosure	Currently there are no detailed disclosure requirements for financial instruments. However, the ICAI has issued an Announcement in December 2005 requiring the following disclosures to be made in respect of derivative instruments in the financial statements: • Category-wise quantitative data about derivative instruments that are outstanding at the balance sheet date; • The purpose, viz., hedging or speculation, for which such derivative instruments have been acquired; and The foreign currency exposures that are not hedged by a derivative instrument or otherwise.	Requires disclosure of information about the nature and extent of risks arising from financial instruments: • Qualitative disclosures about exposures to each type of risk and how those risks are managed; and • Quantitative disclosures about exposures to each type of risk, separately for credit risk, liquidity risk and market risk (including sensitivity analysis). In addition, disclosures required on fair valuation of all financial assets and liabilities categorized by levels 1 to 3 based on the fair valuation hierarchy. Explanatory notes on valuation techniques, inputs, sensitivity of fair value to the unobservable inputs, etc. are also required.

BASIS OF ALLOTMENT

Basis of Allotment for NCDs

The Registrar will aggregate the Applications, based on the applications received through an electronic book from the Stock Exchange and determine the valid Application for the purpose of drawing the basis of allocation.

Allocation Ratio

The registrar will aggregate the applications based on the applications received through an electronic book from the stock exchanges and determine the valid applications for the purpose of drawing the basis of allocation. Grouping of the application received will be then done in the following manner:

Grouping of Applications and Allocation Ratio: Applications received from various applicants shall be grouped together on the following basis:

a. *Applications received from Category I applicants:* Applications received from Category I, shall be grouped together, ("**Institutional Portion**");

b. *Applications received from Category II applicants*: Applications received from Category II, shall be grouped together, ("**Non-Institutional Portion**");

c. *Applications received from Category III applicants:* Applications received from Category III, shall be grouped together, ("**High Net Worth Individual Portion**")

d. *Applications received from Category IV applicants:* Applications received from Category IV, shall be grouped together, ("**Retail Individual Investor Portion**")

For removal of doubt, "***Institutional Portion***", "***Non-Institutional Portion***", "***High Net Worth Individual***

Portion" and "***Retail Individual Portion***" are individually referred to as "***Portion*****"** and collectively referred to as **"*Portions*"**

For the purposes of determining the number of NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of NCDs to be allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹17,500 lakhs. The aggregate value of NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription in the Issue), and/or the aggregate value of NCDs up to the Base Issue Size shall be collectively termed as the **"*Overall Issue Size*".**

Basis of Allotment for NCDs

Allotments in the first instance:

(i) Applicants belonging to the Category I, in the first instance, will be allocated NCDs up to 10% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each application duly acknowledged by the Lead Managers and their respective Affiliates/SCSB (Designated Branch or online acknowledgement);

(ii) Applicants belonging to the Category II, in the first instance, will be allocated NCDs up to 10% of Overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));

Allotments, in consultation with the Designated Stock Exchange, shall be made on date priority basis i.e. a first-come first-serve basis, based on the date of upload of each Application in to the Electronic Book with Stock Exchange, in each Portion subject to the Allocation Ratio. (ii) High Networth Individual Portion
(iii) Non-Institutional Portion
(iv) Institutional Portion
(v) on a first come first serve basis

Within each Portion, priority in Allotments will be given on a first-come-first-serve basis, based on the date of upload of each Application into the electronic system of the Stock Exchange.

For each Portion, all Applications uploaded in to the Electronic Book with the Stock Exchange would be treated at par with each other. Allotment would be on proportionate basis, where Applications uploaded into the Platform of the Stock Exchange on a particular date exceeds NCDs to be allotted for each Portion respectively.

Minimum allotment of 1 (one) NCD and in multiples of 1 (one) NCD thereafter would be made in case of each valid Application.

(b) Allotments in case of oversubscription:

Applications received for the NCDs after the date of oversubscription will not be considered for allotment.

(a) Proportionate Allotments: For each Portion, on the date of oversubscription:

(ii) If the process of rounding off to the nearest integer results in the actual allocation of NCDs being higher than the Issue size, not all applicants will be allotted the number of NCDs arrived at after such rounding off. Rather, each applicant whose allotment size, prior to rounding off, had the highest decimal point would be given preference;
(iii) In the event, there are more than one applicant whose entitlement remain equal after the manner of distribution referred to above, our Company will ensure that the basis of allotment is finalised by draw of lots in a fair and equitable manner.

(b) Applicant applying for more than one Options of NCDs:

If an applicant has applied for more than one Options of NCDs, and in case such applicant is entitled to allocation of only a part of the aggregate number of NCDs applied for due to such applications received on the date of oversubscription, the option-wise allocation of NCDs to such applicants shall be in proportion to the number of NCDs with respect to each option, applied for by such applicant, subject to rounding off to the nearest integer, as appropriate in consultation with Lead Managers and Designated Stock Exchange.

Tax Litigations

Direct Tax

1. The Commissioner of Income Tax (Central), Kochi ("**CITK**") filed a writ petition (c) bearing no. 23856/2013 dated August 28, 2013 ("**Writ Petition**"), before the High Court of Kerala against the order dated March 25, 2013 ("**Order**") passed by the Income Tax Settlement Commission, Chennai ("**Commission**") for the assessment years 2004-05 to 2010-11, granting immunity to our Company from penalty and prosecution. Aggrieved by the Order, the Writ Petition was filed by CITK *inter-alia* on the ground that the Commission has no authority to grant immunity to our Company from penalty and prosecution unless our Company makes full and true disclosure of its income, manner in which it was derived and cooperates with the Commission in the proceedings. The CITK further alleged that the income admitted by our Company was less than the income quantified by the Commission and hence full and true disclosure wasn't made and thus the Order passed by the Commission was against law. Further, the CITK has prayed for the issuance of writ of certiorari or any other appropriate order quashing the Order to the extent that it granted immunity to our Company from prosecution and penalty. The matter is currently pending.

2. The Assistant Commissioner of Income Tax, Kottayam ("**ACIT**") passed an order dated December 31, 2016, directing our Company to pay an amount of ₹11.64 lakhs as income tax for the Assessment Year 2014-2015. ("**Order**"). The amount was calculated on the basis of depreciation allegedly claimed at higher rates by our

Company, an alleged mismatch between sales turnover reported in the audit report and income tax return, and an alleged mismatch between the income/receipt credited to the profit and loss account considered under other heads of income and income from heads of income other than business/profession. Against this Order, our Company filed an application dated January 16, 2017 before the ACIT for rectification of mistake ("**Application**") stating that no tax demand should have been raised because the returned income had been accepted by the ACIT. The Application further stated that the errors had occurred due to the fact that the ACIT had calculated interest under Section 234A of the Income Tax Act, 1961 without taking into account the fact that the date for filing the income tax return for the Assessment Year 2014-2015 had been extended to November 30, 2014 as per an order issued by the Ministry of Finance, Government of India. Further, the ACIT had also not considered the fact that the due date for the payment of advance tax for the third quarter had been extended to December 17, 2013, and had calculated interest under Section 234B and 234C of the Income Tax Act, 1961 without considering the amount of ₹175 lakhs that had been paid as advance tax by our Company on December 17, 2013. Subsequently, our Company received a demand notice from the ACIT demanding ₹3.91 lakhs after rejecting the application for rectification submitted by our Company pursuant to which our Company filed an appeal dated August 10, 2018 against the demand notice dated July 31, 2018. The said matter was again taken into consideration and *vide* order date December 31, 2019, ₹4.19 lakhs was shown as refund. The matter is currently pending.

3. The Commissioner of Income Tax (Central), Kochi ("**CIT**") passed an order dated November 30, 2016 under Section 263 of the Income Tax Act, 1961 ("**IT Act**") directing the Assistant Commissioner of Income Tax, Central Circle, Kottayam ("**AO**") to verify a deduction amounting to ₹123.07 lakhs claimed by the Company towards discount allowed to debenture holders during the AY 2012-13. The Assistant Commissioner of Income Tax, Central Circle, Kottayam ("**AO**") passed an assessment order dated August 31, 2017 under Section 263 of the IT Act ("**Order**") giving effect to the direction of the CIT in relation to deduction amounting to ₹123.07 lakhs claimed by the Company towards discount allowed to debenture holders during the AY 2012-13. In the Order, the AO disallowed the deduction on the grounds that certain debenture holders (out of the list of entire debenture holders) had not confirmed the debenture subscription in a prescribed proforma sent to them, as notices under Section 133(6) of the IT Act and in certain cases, as summons under Section 131 of the IT Act and some debenture holders who were served notices and summons did not respond at all. Further the Order also states that there was an instance of a cash deposit of ₹20.00 lakhs on November 26, 2011, in the Company's bank account with Kilimanoor branch which has been accounted by the Company towards subscription of debentures. The subscription amount relating to all these debenture holders aggregating to ₹3,366.40 lakhs was added to the income of the Company under Section 68 of the IT Act, and consequently, a demand of ₹1,895.72 lakhs was raised on the Company. The Company has filed an appeal dated September 28, 2017 before the Commissioner of Income Tax (Appeals) ("**CIT – A**") challenging the Order on *inter-alia* grounds that the assessment order is violative of principles of natural justice, additions made under Section 68 were beyond jurisdiction of the AO as well as grounds on merits justifying the claim of deduction of expenditure. The demand raised by the AO under section 153A of the IT Act was already covered by the erstwhile Income-tax officer under the regular assessment and had concluded the assessment vide his order dated 31 August, 2017. Since, there is no fresh addition vide the order of AO dated December 29, 2019, the appeal already filed against the order dated 31 August, 2017 with the CIT - A on 28 September, 2017 shall stand. 1. The Office of the Commissioner of Central Excise and Customs, Cochin ("**Authority**") has issued a show cause notice bearing no. V/ST/15/154/2015 ST Adj dated April 21, 2015 ("**SCN**") to our Company calling upon our Company to show cause as to why a sum of ₹4,384.86 lakhs should not be included in the value of the taxable service rendered by our Company for a period from April 1, 2013 to March 31, 2014, the differential service tax amounting to ₹5.26 lakhs, education cess amounting to ₹10.52 lakhs and higher education cess of ₹5.26 lakhs should not be demanded and recovered from our Company, under Section 73(1) of the Finance Act, 1994 ("**Act**"). Also, our Company was asked to show cause as to why applicable interest under Section 75 of the Act and penalty under Section 76, 77(2) and 78 should not be imposed on our

Company. In the SCN the Authority contended that our Company undertook rail and bus ticket bookings and had charged amounts as token and postage charges, further our Company also received commission for doing agency business for insurance companies in addition to receiving commission from M/s Wall Street Finance Limited for acting as their sub-representatives for the purpose of offering money transfer services. Our Company vide a letter dated July 1, 2015 replied to the SCN wherein we have justified that no service tax is payable on the risk interest/token charges/postage charges and on commission received on insurance and money transfer services. The Authority vide an order dated March 15, 2016 ("**Order**") confirmed the demand of ₹5,26,18,392 as service tax, ₹10.52 lakhs as education cess and ₹5.26 lakhs as higher education cess thereby aggregating our total tax liability to ₹5,41,96,943 along with a penalty of ₹5,42,06,943 being imposed on our Company. The SCN was heard and the issue was adjudicated by the Authority vide its Order which confirmed the proposal contained in the SCN, resulting in the demand of service tax of ₹41.04 lakhs along with interest and penalties. The Appeal was filed, *inter-alia*, on the grounds that the disputed taxable amount is only interest received on Gold Loan which is eligible for exemption from payment of service tax. Also, the money transfer services rendered by our Company represent export of service on which levy of service tax is not legally sustainable. Our Company has prayed that the Order be set aside. The matter was decided against our Company by the Office of the Commissioner of Central Excise, Customs and Service Tax (Appeals-I), vide an order dated September 9, 2016, wherein the penalty passed by the Authority was upheld ("**Order-II**") Our Company preferred an appeal dated December 19, 2016 before the Customs, Excise and Service Tax Appellate Tribunal, Bangalore ("**CET-AT**"), wherein our Company in its prayer has requested the CET-AT to set aside Order-II and the penalties imposed under the Order. The regulations summarised below are not exhaustive and are only intended to provide general information to Investors and are neither designed nor intended to be a substitute for any professional legal advice. Taxation statutes such as the IT Act, GST laws (including CGST, SGST and IGST) and applicable local sales tax statutes, labour regulations such as the Employees State Insurance Act, 1948 and the Employees Provident Fund and Miscellaneous Provisions Act, 1952, and other miscellaneous regulations such as the Trade Marks Act, 1999 and applicable Shops and Establishments statutes apply to us as they do to any other Indian company and therefore have not been detailed below.

The following description is a summary of certain sector specific laws and regulations in India, which are applicable to our Company. The information detailed in this chapter has been obtained from publications available in the public domain. The regulations set out below may not be exhaustive, and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice. The statements below are based on the current provisions of the Indian law, and the judicial and administrative interpretations thereof, which are subject to change or modification by subsequent legislative, regulatory, administrative or judicial decisions.

The major regulations governing our Company are detailed below:

We are a non-deposit taking (which does not accept public deposits), systemically important, NBFC. As such, our business activities are regulated by RBI Regulations applicable to non-public deposit accepting NBFCs ("***NBFC-ND***").

As of November 22, 2019, the RBI has issued an updated *Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016, dated September 1, 2016 as amended*, ("**Master Directions**") applicable to all NBFC-NDSI's.

Regulations governing NBFCs

As per the RBI Act, a financial institution has been defined as a company which includes a non-banking institution carrying on as its business or part of its business the financing activities, whether by way of making loans or advances or otherwise, of any activity, other than its own and it is engaged in the activities of loans and advances, acquisition of shares/stock/bonds/debentures/securities issued by the Government of India or other local authorities or other marketable securities of like nature, leasing, hire-purchase, insurance business, chit business but does not include any institution whose principal business is that of carrying out any agricultural or industrial activities or the sale/purchase/construction of immovable property.

As per prescribed law any company that carries on the business of a non-banking financial institution as its 'principal business' is to be treated as an NBFC. The term 'principal businesses has not been defined in any statute, however, RBI has clarified through a press release (Ref. No. 1998-99/1269) issued on April 08, 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide a company's principal business. The company will be treated as an NBFC if its financial assets are more than 50 percent of its total assets (netted off by intangible assets) and income from financial assets should be more than 50 percent of the gross income. Both these tests are required to be satisfied in order to determine the principal business of a company.

Every NBFC is required to submit to the RBI a certificate, from its statutory auditor within one month from the date of finalisation of the balance sheet and in any case, not later than December 30 of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a certificate of registration.

NBFCs are primarily governed by the RBI Act, the Master Direction – Non-Banking Financial Company – Non-Systematically Important Non-Deposit taking Company (Reserve Bank) Directions, 2016, Peer to Peer Lending Platform (Reserve Bank) Directions, 2017 ("Peer to Peer Regulations"), Reserve Bank Commercial Paper Directions, 2017 ("Commercial Papers Directions") and the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 2016. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time.

Although by definition, NBFCs are permitted to operate in similar sphere of activities as banks, there are a few important and key differences. The most important distinctions are:

- An NBFC cannot accept deposits repayable on demand – in other words, NBFCs can only accept fixed term deposits. Thus, NBFCs are not permitted to issue negotiable instruments, such as cheques which are payable on demand; and

- NBFCs are not allowed to deal in foreign exchange, even if they specifically apply to the RBI for approval in this regard.

Section 45-IA of the RBI Act makes it mandatory for every NBFC to get itself registered with the Reserve Bank in order to be able to commence any of the aforementioned activities.

Further, an NBFC may be registered as a deposit accepting NBFC ("***NBFC-D***") or as a non-deposit accepting NBFC ("***NBFC-ND***"). The RBI has recently harmonised the categories of NBFCs into: (i) investment and credit companies (which erstwhile consisted of asset finance companies, investment companies, and loan companies); (ii) infrastructure finance companies; (iii) infrastructure debt funds; (iv) NBFC – micro finance institutions; and (v) NBFC – factors.

Our Company has been classified as an NBFC-ND-SI.

Power generation regulations

The Ministry of New and Renewable Energy ("MNRE") regulations

The MNRE is the Central Government ministry with the mandate for formulating schemes and policies for the research, development, commercialisation and deployment of renewable energy systems/devices for various applications in rural, urban, industrial and commercial sector. The MNRE has issued a number of guidelines and schemes on power generation through renewable sources, including a 'Special Programme on Small Wind Energy and Hybrid Systems'. In order to ensure quality of wind farm projects and equipments, the MNRE introduced the "Revised Guidelines for wind power projects" ("**MNRE Guidelines**") on June 13, 1996 for the benefit of state electricity boards, manufacturers, developers and end-users of energy to ensure proper and orderly growth of the wind power sector. The MNRE Guidelines are periodically updated and issued. The MNRE Guidelines among other things makes provision for proper planning, siting, selection of quality equipment, implementation and performance monitoring of wind power projects. The MNRE Guidelines lay down guidelines for the planned development and implementation of wind power projects.

The MNRE Guidelines set out the conditions that are required to be met for establishing wind farms and manufacturing and supplying equipment for wind power projects. These conditions include submission of detailed project reports, approval of sites for wind power installations, type certification by independent testing and certification agencies (either the Centre of Wind Energy Technology, Chennai or the International certification agency). Further, all installations are to be carried out only on sites that are approved for wind power projects by the MNRE. The MNRE Guidelines stipulate that a no objection certificate will be issued only after analysing the wind data to ensure adequate availability of wind at the specific site. Also, no approval will be granted for a wind

power project which involves the installation of used wind turbines imported into India.

The Indian Renewable Energy Development Agency Limited ("IREDA")

The IREDA is a public limited government company under the administrative control of the MNRE and in engaged in encouraging the production of energy through renewable sources. In this respect, the IREDA offers financial support to specific projects and schemes for generating electricity, and promotes the energy conservation through by improving the efficiency of systems, processes and resources engaged in energy production and distribution. In particular, the IREDA offers scheme and incentives for the promotion of wind based energy production.

Electricity Act, 2003

Under the Electricity Act, 2003, which repealed all the earlier enactments pertaining to this sector, the activity of generation of wind power does not require any license or permission. Persons engaged in the generation of electricity from wind power are required to register the project being undertaken with State Nodal Agency and obtain permission for inter-grid connectivity from the utility. The government has also announced National Electricity Policy in 2005 to guide the development of the electricity sector in India.

The electricity generated from the wind power project can be used for captive consumption, sale to utility or for transaction under open access as per the prevailing state policy as well as regulatory orders, if any. Various states have announced administrative policies relating to wheeling, banking and buy-back of power.

Further, the Electricity Act, 2003 also mandates that all regulatory commissions should procure certain percentage of power generation from renewable energy sources by all distribution companies. As far as the tariff and wheeling charges are concerned, it is stipulated that they should be decided by respective regulatory commissions as provided under the Electricity Regulatory Commissions Act, 1998.

Electricity Regulatory Commissions

Electricity Act retains the two-level regulatory system for the power sector. At the central level, the Central Electricity Regulatory Commission ("**CERC**") is responsible for regulating tariff of generating stations owned by the central government, or those involved in generating or supplying in more than one states, and regulating inter-state transmission of electricity. The State Electricity Regulatory Commissions ("**SERCs**") on the other hand regulate intra-state transmission and supply of electricity within the jurisdiction of each state. CERC and the SERCs are guided by the National Electricity Policy, 2005, Tariff Policy, 2006 and the National Electricity Plan while discharging their functions under Electricity Act. The Electricity Regulatory Commissions are also guided by any direction given by the central government for CERC or the state government for the SERC pertaining to any policy involving public interest. The decision of the government is final and non-challengeable with respect to the question that whether directions pertain to policy involving public interest or not. The commissions have been entrusted with a variety of functions including determining tariff, granting licensees, settling disputes between the generating companies and the licensees. The Electricity Regulatory Commissions are a quasi-judicial authority with powers of a civil court and an appeal against the orders of the Commissions lie to the Appellate Tribunal.

The CERC has notified the CERC (Terms and Conditions for Recognition and Issuance of Renewable Energy Certificate for Renewable Energy Generation) Regulations on January 14, 2010 to the promotion of power generation through renewable sources of energy. In this respect, these regulations contemplate two categories of certificates, solar and non-solar certificate. The CERC has designated the National Load Dispatch Center to issue registration certificates and undertakes to provide for the floor price (minimum) and forbearance price (maximum) for non-solar certificates.

Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 ("SARFAESI")

The SARFAESI Act regulates the securitization and reconstruction of financial assets of banks and financial institutions. The SARFAESI Act provides for measures in relation to enforcement of security interests and rights of the secured creditor in case of default.

The RBI has issued guidelines to banks and financial institutions on the process to be followed for sales of financial assets to asset reconstruction companies. These guidelines provide that a bank or a financial institution or an NBFC

may sell financial assets to an asset reconstruction company provided the asset is an NPA. A bank or financial institution or NBFC may sell a financial asset only if the borrower has a consortium or multiple banking arrangements and at least 75% by value of the total loans to the borrower are classified as an NPA and at least 75% by the value of the banks and financial institutions in the consortium or multiple banking arrangement agree to the sale. In addition to the above, a financial asset may be sold by any bank or financial institution where the asset is reported, by the bank financial institution to Central Repository for Information on Large Credit, as an NPA wherein the principal or interest payment is overdue between 61-90 days.

As per the SARFAESI Amendment Act of 2004, the constitutional validity of which was upheld in a recent Supreme Court ruling, non-performing assets have been defined as an asset or account of a borrower, which has been classified by a bank or financial institution as sub-standard, doubtful or loss asset in accordance with directions or guidelines issued by the RBI. In case the bank or financial institution is regulated by a statutory body/authority, NPAs must be classified by such bank in accordance with guidelines issues by such regulatory authority. The RBI has issued guidelines on classification of assets as NPAs. Further, these assets are to be sold on a "without recourse" basis only.

The SARFAESI Act provides for the acquisition of financial assets by Securitization Company or Reconstruction Company from any bank or financial institution on such terms and conditions as may be agreed upon between them. A securitization company or reconstruction company having regard to the guidelines framed by the RBI may, for the purposes of asset reconstruction, provide for measures such as the proper management of the business of the borrower by change in or takeover of the management of the business of the borrower, the sale or lease of a part or whole of the business of the borrower and certain other measures such as rescheduling of payment of debts payable by the borrower; enforcement of security.

Additionally, under the provisions of the SARFAESI Act, any securitisation company or reconstruction company may act as an agent for any bank or financial institution for the purpose of recovering its dues from the borrower on payment of such fee or charges as may be mutually agreed between the parties.

Various provisions of the SARFAESI Act have been amended by the Enforcement of Security Interest and Recovery of Debt Laws and Miscellaneous Provisions (Amendment) Act, 2016 as also the Insolvency and Bankruptcy Code, 2016 (which amended S.13 of SARFAESI). As per this amendment, the Adjudicating Authority under the Insolvency and Bankruptcy Code, 2016 shall by order declare moratorium for prohibiting *inter alia* any action to foreclose, recover or enforce any security interest created by the corporate debtor in respect of its property including any action under the SARFAESI Act.

Insolvency and Bankruptcy Code

The Insolvency and Bankruptcy Code, 2016 ("**Code**") consolidates laws relating to insolvency, reorganisation and liquidation/ bankruptcy of all persons, including companies, individuals, partnership firms and Limited Liability Partnerships ("**LLPs**"). The Code has established an Insolvency and Bankruptcy Board of India to function as the regulator for all matters pertaining to insolvency and bankruptcy. The Code prescribes a timeline of 330 days for the insolvency resolution process, which begins from the date the application is admitted by the NCLT. During this period, the creditors and the debtor shall negotiate and finalise a resolution plan (accepted by 66% of the financial creditors) and in the event, they fail, the debtor is placed in liquidation and the moratorium lifted. The Code stipulates an interim-moratorium period which would commence after filing of the application for a fresh start process and shall cease to exist after elapse of a period of 180 days from the date of application. During such period, all legal proceedings against such debtor should be stayed and no fresh suits, proceedings, recovery or enforcement action may be initiated against such debtor. However, the Code has also imposed certain restrictions on the debtor during the moratorium period such as the debtor shall not be permitted to act as a director of any company or be involved in the promotion or management of a company during the moratorium period. In light of the COVID-19 pandemic, the Government of India, introduced economic reforms to contribute to the ease of doing business. One of the reforms introduced is the suspension of the Code for a period of one year. An ordinance detailing the changes pursuant to this reform is expected to be introduced by the government. Further, the GoI vide notification dated March 24, 2020 ("**Notification**") has amended section 4 of the Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, Government of India has increased the minimum amount of default under the insolvency matters from ₹1,00,000 to ₹1,00,00,000.

The Insolvency and Bankruptcy (Insolvency and Liquidation Proceedings of Financial Service Providers and Application to Adjudicating Authority) Rules 2019 ("IBC Rules, 2019")

The Code, which regulates the insolvency resolution process for "corporate persons" previously excluded financial service providers from its purview. With the notification of the IBC Rules, 2019, the provisions of the Code will apply to financial service providers as well, which are subject to modifications and additional conditions as set out in the IBC Rules, 2019. Financial service providers are defined to mean persons engaged in the business of providing financial services in terms of authorisation issued or registration granted by a financial sector regulator under the Code. "Financial services" is broadly defined in the Code, and includes, inter alia, services in the nature of acceptance of deposits, administration of assets, underwriting services, advisory services with respect to dealings in financial products, operation of an investment scheme, and maintenance of records of ownership of a

financial product. The IBC Rules, 2019, lays down the provisions for setting up an advisory committee, resolution plan and the liquidation process of Financial service providers.

**Details of NCDs and Bank loan facilitate are provided in annexures I & II

RATING ACTION / OUTLOOK

Brickwork Ratings (BWR) assigns BWR BBB+/Stable rating for Kosamattam Finance Ltd.'s (hereafter referred to as "KFL" or the Company) Fresh Non Convertible Debentures (NCDs) of Rs 350 Crs and Rs 1,000 Crs bank loan facilities and reaffirms BWR BBB+/Stable rating for the outstanding NCDs of Rs 350 Crs as tabulated above.

The rating assignment/reaffirmation factors in the vast experience of the promoters with established track record, comfortable capitalisation, stable asset quality on the back of adequate risk management and credit appraisal systems. The rating is however constrained by the inherent risks associated with gold loans and geographical concentration risk.

KEY RATING DRIVERS

Credit Strengths:

- **Experienced promoters with an established track record:** Kosamattam group was founded by Mr. Nasrani Varkey in 1927, with the main activity being chit fund business. In 1980, the group ventured into the gold loan business under Mr. Mathew Cherian (great grandson of Mr. Nasrani Varkey). Kosamattam group has over three decades of experience in providing loans against gold jewellery. Mr. Mathew K Cherian is the present Chairman and Managing Director of Kosamattam Group and is a fourth

generation entrepreneur in the family. He is well supported by an experienced board of directors and management. Under his leadership the company has expanded its network across south India and operates out of 950 branches as on 31 December, 2020. AUM has consistently grown in the last 5 years from Rs 1,708 Crs in FY16 to Rs 2,973 Crs in FY20 at CAGR of 11.72%. As on 31 December 2020, the company's AUM stood at Rs. 3,170 crores.

- **Stable Asset Quality:** KFL has put in place adequate risk management and credit-appraisal systems which has helped them to maintain stable asset quality over the years. The presence of adequate Information Technology and MIS ensures smooth functioning of operations and helps the senior management in exercising effective control of its operations. As on 31 Mar 2020, gross Non performing assets (NPA) and Net non performing assets (NNPA) stood at 1.59% and 1.07% respectively. Due to higher slippages in the mortgage loan portfolio, gross NPA and net NPA moderated to 1.75% & 1.16% in 9MFY21. During the first half of FY 21, the company had given loan moratorium to few of its customers. The collection efficiency of the company has improved from ~51% in May 2020 to ~88% in December 2020. Going forward, the company's ability to improve collection efficiency and maintain stable asset quality will be a key rating monitorable.

- **Comfortable capitalisation levels**: On the back of consistent capital infusion by the promoters, KFL has maintained comfortable capitalisation. Promoters have infused Rs 28 Crs in 9MFY21 through rights issue which has helped the company to increase its total Capital to risk weighted assets ratio (CRAR) to 18.81% and Tier I CRAR of 13.78% as on 31 December 2020 from 17.87% & 12.86% respectively as on 31 Mar 2020. As an internal policy the company plans to always maintain Tier I CRAR above 13%. As on 31 December 2020, the tangible networth stood at 492.34 Crs with a gearing of 6.15 times. Networth to Net NPA stood comfortably at 14.53 times as on 31 December 2020. Internal accruals to networth is low given the company's low profitability with ROA 1.64% for 9MFY21 and 1.52% for FY20. Going forward, the ability of the company to improve its profitability and gearing levels will be key rating monitorable over the medium term.

Credit Risks:

- **Inherent risks associated with gold loan:** Being a gold loan finance company, KFL is exposed to inherent risks such as price fluctuation of Gold, operational risks such as theft, burglary and intensive competition. Since the Company operates under a highly regulated environment, it is also exposed to policy changes. As a risk mitigation, the company has adequate Theft, Burglary, Fidelity and Fire insurance cover to protect against such operational risks.

- **Geographical and Product concentration risk:** KFLs loan portfolio is largely concentrated with ~97% of total loans to southern states of India and the fact that ~97% of the loans are gold loans, exposes the company to geographical and product

concentration risks. As a mitigation to the product concentration risk, KFL has diversified into other synergistic products like mortgage loans and microfinance loans. However, the share of non gold loans is negligible and the ability of the company to diversify geographically and increase the share of non gold loans will be key rating sensitivity.

ANALYTICAL APPROACH AND APPLICABLE RATING CRITERIA

For arriving at this rating, BWR has considered the standalone financial profile of KFL and applied its rating methodology as detailed in the Rating Criteria below (hyperlinks provided at the end of this rationale).

RATING SENSITIVITIES

Positive: Substantial increase in AUM, improvement in capital position and profitability with sustained asset quality will be key rating positives

Negative: Substantial deterioration in asset quality, increase in gearing levels and lower than expected profitability will be key rating monitorables.

LIQUIDITY POSITION: Adequate

ALM profile dated 31 December 2020 demonstrates adequate liquidity with no cumulative mismatches across various buckets. This is due to longer tenure of the borrowings as compared to that of loans disbursed which is of short term in nature. As on 31 January 2021, the company had Cash & Bank balances of Rs 249.17 Crs and unutilised bank lines of Rs 111.62 Crs against debt repayments Rs 444.85 Crs upto 31 December 2021. With the improving collections, sanctions in hand and the current liquidity position, BWR believes that the company will be able to meet its debt repayment obligations on time.

COMPANY PROFILE

Kosamattam Finance Ltd(KFL) headquartered in Kottayam, Kerala is a RBI registered systemically important, non-deposit taking NBFC primarily engaged in the Gold Loan business, lending money against the pledge of household Jewelry ("**Gold Loans**") in the state of Kerala, Tamil Nadu, Karnataka, Andhra Pradesh, Telangana, Delhi, Maharashtra, Gujarat and in the Union Territory of Pondicherry with 950 branches.
