Senior citizens, who are 60 or more years of age at any time during the financial year, enjoy the special privilege to submit a self-declaration in the prescribed Form 15H for non deduction of tax at source in accordance with the provisions of Section 197A(1C) of the I.T. Act even if the aggregate income credited or paid or likely to be credited or paid exceeds the maximum amount not chargeable to tax, provided that the tax due on total income of the person is NIL.
 - iii. In all other situations, tax would be deducted at source as per prevailing provisions of the I.T. Act. Form No.15G with PAN / Form No.15H with PAN / Certificate issued u/s 197(1) has to be filed with the Company before the prescribed date of closure of books for payment of debenture interest without any tax withholding.

provisions of the I.T. Act. Further, where the debentures are sold by the Debenture Holder(s) before maturity, the gains arising therefrom are generally treated as capital gains or business income, as the case may be. However, there is an exposure that the Indian Revenue Authorities (especially at lower level) may seek to challenge the said characterisation (especially considering the provisions explained in Para V below) and hold such gains/income as interest income in the hands of such Debenture Holder(s). Further, cumulative or regular returns on debentures held till maturity would generally be taxable as interest income taxable under the head Income from other sources where debentures are held as investments or business income where debentures are held as trading asset / stock in trade.

6. As per Section 74 of the I.T. Act, short-term capital loss on debentures suffered during the year is allowed to be set-off against short-term as well as long-term capital gains of the said year.  - c) As per Section 115G of the I.T. Act, it shall not be necessary for a non-resident Indian to file a return of income under Section 139(1) of the I.T. 3. Under Section 195 of the I.T. Act, the applicable rate of tax deduction at source is. 20% on investment income and 10% on any long-term capital gains as per Section 115E, and at the normal rates for Short Term Capital Gains if the payee Debenture Holder is a Non Resident Indian.

² For complete rating scale and definitions, please refer to ICRA's website www.icra.in or other ICRA Rating Publications

Rationale

The assigned rating factors in the company's long standing track record and its leadership position in the niche gold loan segment, its established franchise with a pan-India branch network, and its efficient internal controls and audit systems. The rating also takes into account the company's ability to raise funds from diverse sources resulting in an adequate liquidity profile, its comfortable capitalisation, and good profitability indicators.

The rating is however constrained by the company's portfolio concentration in the gold loan business, its geographical concentration with a major portion of the portfolio in South India, and the vulnerability of operations to adverse gold price fluctuations. The rating also factors in the company's marginal borrower profile and limited earnings diversity. ICRA takes note of the increase in company's delinquency levels during the current fiscal and it is critical to ensure collections from overdue portfolio in the near term and maintain good asset quality going forward.

Outlook: Stable

ICRA believes that MFL will continue to benefit from its long standing presence and good knowledge of the gold loan segment. The outlook may be revised to 'Positive' with a steady improvement in portfolio diversity on a consolidated basis along with revival in the gold loan segment's growth and asset quality. The outlook may be revised to 'Negative' in case of a significant deterioration in the company's asset quality, profitability and capitalisation profile.

Key rating drivers

Credit strengths

Established franchise and market leadership in the niche gold loan segment – MFL has around two decades of track record in the gold loan business and is India's largest gold loan focused NBFC with a total portfolio of Rs. 27,608 crore (of which 99.7% is gold loan) as on September 30, 2017. The company operates through an extensive pan-India branch network of 4,287 as on September 30, 2017 and has 62% of its branches in South India, where it enjoys a good franchise. The strong brand value of 'Muthoot', the company's experienced promoters and senior management team and its efficient internal controls and audit systems are expected to support its overall business growth going forward.

Credit risk profile supported by stable regulatory environment and tighter interest collections – The various regulatory changes over the past few years, especially the capping of LTV ratio at 75% have added stability to the gold loan business. While the pace of growth in this segment had moderated pursuant to these regulations, the regulations have led to more stable and sustainable business volumes. MFL's portfolio grew at a CAGR of 7.7% during FY2015 to FY2017 vis-à-vis 52.5% during FY2011 to FY2013. The portfolio grew by modest 2.4% (annualised) during H1FY2018 (11.9% during FY2017) and the company targets a growth of 10% p.a. going forward.

Since early FY2017, the company has been encouraging its customers to pay interests on a regular basis vis-à-vis bullet payments in the past by closely following-up with customers and offering incentives for regular interest payments. Regular interest collections offset the risks on account of gold price volatility to an extent and improve MFL's overall credit risk profile. They also support the company's liquidity profile and result in better business yields.

The company's 90+ dpd increased from 2.5% as on March 31, 2017 to 7.0% as on September 30, 2017, partly on account of relaxed overdue collections in the six month loan product (which was introduced during FY2017 and accounted for 29% of the company's total portfolio as on September 30, 2017), the residual impact of demonetisation, which is resulting in some delay in scheduled redemptions and overall subdued business environment for small businesses to have some impact on the near term asset quality. While the auctioning as a % of opening portfolio reduced from 14.2% in FY2016 to 3.7% in FY2017, it again increased to 4.2% during H1FY2018. Going forward, timely auctioning and a stable gold price therefore would be crucial for keeping the credit costs under control.

Capitalisation to remain comfortable over the medium term, notwithstanding the investments required for its subsidiaries – MFL has a comfortable capitalisation with a standalone gearing of 3.1 times as on September 30, 2017 (consolidated gearing at 3.2 times) aided by good internal capital generation. MFL is expected to be comfortably placed to meet the medium term capital requirements of its subsidiaries without adversely impacting its own capital structure.

Healthy profitability indicators– The company on account of regular interest collections has been able to improve its business yields, as the extent of interest reversals were lower than in the past. This along with the moderation in the cost of funds has improved the net interest margins from 11.6% in FY2017 (9.5% in FY2016) to 12.6% in H1FY2018. MFL's operating efficiency (operating expenses / average assets) improved from 4.3% in FY2017 (4.2% in FY2016) to 3.9% in H1FY2018. The credit provisions however increased to 1.0% during FY2017 (0.6% during FY2016) with the creation of a gold price fluctuation provision during the year, which stood at 0.9% of the total standard portfolio as on September 30, 2017; credit provisioning stood at 0.8% for H1FY2018. MFL's return on average assets was healthy at 4.1% for FY2017 (3.0% for FY2016) and 5.1% in H1FY2018. The company's ability to keep asset quality and credit cost under control would be crucial for incremental profitability.

Comfortable liquidity with a diversified funding profile – MFL has a fairly diversified funding profile, with bank loans constituting 46% of its total borrowings as on September 30, 2017, followed by debentures (29%), commercial papers (15%) and subordinated debt (7%). The diverse funding sources have supported the company's growth, while maintaining a comfortable liquidity position. The company also maintains sizeable unutilised bank lines (~Rs.3,100 crore as on September 30, 2017) which further support its liquidity position.

Credit challenges

Vulnerability to adverse gold price movement – Notwithstanding the company's efforts to reduce the impact of gold price fluctuations, MFL's credit profile remains susceptible to adverse and sharp movements in gold prices. Any steep decline in gold prices is expected to adversely impact the company's asset quality and business profile.

Limited product and revenue diversification – MFL's standalone portfolio almost entirely consists of gold loans and its consolidated portfolio is also concentrated with gold loans comprising 93% of the loan book as on September 30, 2017. MFL's revenue diversification is also modest with non-interest income / average total assets at 0.2-0.3% during the past three fiscals. ICRA takes note of the growth targets for MFL's subsidiaries over the next two fiscals, which are expected to reduce the share of gold loans to 85% by March 2019. The company's ability to grow its non-gold business at an optimal pace while maintaining good asset quality and profitability profile would be crucial.

Among MFL's four subsidiaries, Muthoot Homefin (India) Limited (wholly owned subsidiary; rated [ICRA]AA-(stable) / [ICRA]A1+) provides affordable housing finance and Belstar Investment and Finance Private Limited (64.6% subsidiary; rated [ICRA]A(stable) / [ICRA]A1) is an NBFC-MFI; both having steep portfolio growth targets for the next 2-3 years. The other two subsidiaries of MFL are Muthoot Insurance Brokers Private Limited (wholly owned subsidiary) which distributes insurance products and Asia Asset Finance PLC (60% subsidiary based in Sri Lanka) which is engaged in leasing and other loans.

Operations concentrated in South India – MFL's operations are largely concentrated in South India, which constituted 62% of its total branch network and 50% of its total loan portfolio as on September 30, 2017. ICRA however notes that the share of portfolio in South India has reduced from 69% in March 2012.

Analytical approach: For arriving at the ratings, ICRA has applied its rating methodologies as indicated below.

Detailed Rationale

CRISIL has reaffirmed its ratings on the debt instruments of Muthoot Finance Limited (MFL) at 'CRISIL AA/Stable/CRISIL A1+' and **withdrawn** its rating on Rs.76.89 crore and Rs.91.02 crore Non-Convertible Debenture as the same has been redeemed.

The ratings reflect MFL's promoter's strong track record of over seven decades in the business, with a strong reputation and brand in South India, particularly in Kerala and Tamil Nadu. Capitalisation is adequate, with a networth of Rs.7,324 crore and adjusted gearing of 3.1 times as on September 30, 2017. Profitability is expected to remain healthy, with return of assets (RoA) higher than 3.5% over the medium term. However, MFL has high product and geographic concentration in revenue and faces challenges associated with the non-gold product segments.

Analytical Approach

For arriving at the ratings, CRISIL has combined the business and financial risk profiles of MFL and its subsidiaries.

Key Rating Drivers & Detailed Description Strengths

* Established track record in financing against gold jewellery

MFL's leadership position in the business of providing finance against gold jewellery is backed by the promoter family's established track record, extending to over seven decades. The rich experience gained over this period has helped design an appropriate assessment and underwriting methodology; the company constantly refines this methodology. Assessing the purity of gold without causing any damage to the jewellery, fixing an appropriate value that can be lent against a gram of gold, and determining appropriate loan-to-value (LTV) ratios are critical aspects in the assessment process. Extensive business experience has helped develop a robust model that has helped it maintain strong asset quality, scale up business

significantly, and facilitate easy replication over various geographic areas.

*** Adequate capitalisation**

Capitalisation is adequate, with a networth of Rs.7,324 crore and gearing of 3.1 times as on September 30, 2017. Large accretion to networth and moderation in growth in the past three years resulted in a healthy capital adequacy ratio of 26.5% as on September 30, 2017. Lower asset-side risk (security of gold, which is liquid and is in the company's possession) also supports capitalisation. Assets under management (AUM) in the gold loan segment is not expected to grow sharply over the medium term. Also, other segments (affordable housing finance, and microfinance finance) have a relatively small scale. Even after factoring in investments in the subsidiaries housing finance company, Muthoot Homefin (India) Ltd, and Belstar Investment and Finance Pvt Ltd, a microfinance company, CRISIL believes the consolidated gearing will remain below 5.5 times over the medium term.

*** Healthy profitability**

Profitability has improved with RoA at 4.1% for fiscal 2017 from 3.0% in fiscal 2016 mainly on account of recovery efforts and partly due to favourable movement in gold prices. Though MFL charges relatively low interest rates than its peers, operating efficiency helps maintain healthy profitability. With increased focus on regular interest collection, along with revision in interest rates on different schemes, has resulted in higher yields and profitability during fiscal 2017. Though gross NPA has increased to 4.6% as on September 2017 from 2.1% as on March 2017 due to slowdown in auctions, the credit cost is not expected to increase materially and remain at below 1% over the medium term. In addition, the company is diversifying into microfinance and housing finance where its ability to maintain low credit cost will remain a key rating monitorable.

Weakness

*** Geographical and product concentration in revenue**

MFL has high geographic concentration in South India, which currently accounts for 52% of its total loans. While the level of concentration has been declining and is much lower than that of peers, the significant regional exposure makes the company vulnerable to economic, social, and political situation in the region. In addition, operations remain confined to financing against gold ornaments; this segment constitutes over 92% of the company's total advances. To diversify its product segment, MFL has entered into housing finance and microfinance by acquiring separate subsidiaries. It has also taken majority stake in a Sri Lanka-based diversified non-banking financial company (NBFC). Though the company is diversifying into other product segments the proportion of AUM and revenue of non-gold loan segment will remain at 15% over the medium term and hence, will remain susceptible to risks of revenue concentration in a single asset class.

Furthermore, implementation of the Kerala Money Lenders Act, 1958, for NBFCs (which depends on the decision of the Supreme Court) could affect MFL's lending rates and operational expenditure as the compliance requirements under the act would be rigorous and cumbersome. This will remain a key rating monitorable.

*** Challenges associated with non-gold segments**

The Muthoot group diversified into non-gold loan segments post 2012. Primarily, affordable housing and microfinance are the focus areas. Although the affordable housing segment is a secured business, the key challenge is the low credit profile of borrowers and limited track record of MFL. The microfinance sector has seen significant decline in collection efficiency post demonetisation and socio political issues in a few states such as Maharashtra, Uttar Pradesh, and Karnataka. The non-gold loan portfolio will remain at 15-20% of the overall portfolio in the medium term; however, performance of asset quality and profitability and scaling up operations of non-gold segments will remain key monitorables.

Outlook: Stable

CRISIL believes MFL will maintain its strong capitalisation and above-average profitability over the medium term. The outlook may be revised to 'Positive' if competitive positioning improves significantly, while asset quality and profitability remain stable. Conversely, the outlook may be revised to 'Negative' in case of decline in asset quality, profitability, or capitalisation.

About the Company

MFL, an NBFC, was originally set up as a private limited company in 1997; this was reconstituted as a public limited company in November 2008. It provides finance against used household gold jewellery; the promoters' family has been in this business for over seven decades. MFL is the flagship company of the Muthoot group (promoters of MFL), which is also in the hospitality, healthcare, media, education, information technology, foreign exchange, insurance distribution, and money transfer businesses. The company had a nationwide network of 4287 branches as on September 30, 2017. It had an advances book of Rs.27,608 crore, and a networth of Rs.7,324 crore as on September 30, 2017.

For fiscal 2017, MFL's standalone profit after tax (PAT) and total income grew to Rs.1180 crore and Rs.5658 crore, from Rs.810 crore and Rs.4875 crore, respectively, the previous fiscal. Standalone PAT for the first half of fiscal 2018 increased to Rs.805 crore from Rs.567 crore during the first half of previous fiscal.

For fiscal 2017, on a consolidated basis, PAT (before adjustment for minority interest) was Rs.1207 crore on total income of Rs.5938 crore, against a PAT (before adjustment for minority interest) of Rs.818 crore on total income of Rs.4941 crore for fiscal 2016.
