#### **SECTION - II**

#### **RISK FACTORS**

The following are the risks envisaged by the management of the Company relating to the Company, the Debentures and the market in general. Potential investors should carefully consider all the risk factors in this DD for evaluating the Company and its business and the Debentures before making any investment decision relating to the Debentures. The Company believes that the factors described below represent the principal risks inherent in investing in the Debentures, but does not represent that the statements below regarding the risks of holding the Debentures are exhaustive. The order of the risk factors is intended to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another. Investors should also read the detailed information set out elsewhere in this DD and reach their own views prior to making any investment decision.

If any one of the following stated risks actually occurs, the Company's business, financial conditions and results of operations could suffer and, therefore, the value of the Company's Debentures could decline and/or the Company's ability to meet its obligations in respect of the Debentures could be affected. More than one risk factor may have simultaneous effect with regard to the Debentures such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No prediction can be made as to the effect that any combination of risk factors may have on the value of the Debentures and/or the Company's ability to meet its obligations in respect of the Debentures.

These risks and uncertainties are not the only issues that the Company faces. Additional risks and uncertainties not presently known to the Company or that the Company currently believes to be immaterial may also have a material adverse effect on its financial condition or business. Unless specified or quantified in the relevant risk factors, the Company is not in a position to quantify the financial or other implications of any risk mentioned herein below.

#### A. INTERNAL RISK FACTORS

#### 1. Increasing competition from banks, financial institutions and NBFCs

The successful implementation of Company's growth plans depends on its ability to face the competition. The main competitors of the Company are NBFCs, financial institutions and banks. The Company, being a non-deposit taking NBFC, does not have access to low cost deposits because of which it may become less competitive. Many of its competitors have significantly greater financial, technical, marketing and other resources. Many of them also offer a wider range of services and financial products than the Company does and have greater brand recognition and a larger client base. As the Company ventures into offering newer products, it is likely to face additional competition from those who may be better capitalised, have longer operating history and better management. If the Company is unable to manage its business and compete effectively with current or future competitors it might impede its competitive position and profitability.

#### 2. Credit Risk

Any lending and investment activity by the Company is exposed to credit risk arising from interest / repayment default by borrowers and other counterparties. Being an NBFC, the Company has lent money for various maturities and with varying security to a number of institutional and non-institutional clients. The gross loan portfolio stood at Rs. 5,814.00 Crore as on June 30, 2017 and Rs. 5,182.82 Crore as on March 31, 2017. The Company is exposed to the risk of such third parties which owe money, securities or other assets not performing their obligations due to various reasons.

The Company will institutionalise a systematic credit evaluation process monitoring the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluate the changes and developments in sectors in which it has substantial exposure. The Company will also endeavour to undertake a periodic review of its entire asset portfolio with a view to determine the portfolio valuation, identify potential areas of action and devise appropriate strategies thereon. Despite these efforts, there can be no assurance that repayment default will not occur and/or there will be no adverse effect on the Company's financial results and/or operations as a result thereof.

In performing its credit assessment, the Company relies largely on information furnished by or on behalf of its borrowers, including financial information, based on which the Company performs its credit assessment. The Company may also depend on certain representations and undertakings as to the accuracy, correctness and completeness of information, and the verification of the same by agencies to which such functions are outsourced. Any such information if materially misleading may increase the risk of default and could adversely impact the financial condition, financial results and/or operations of the Company.

A substantial portion of the Company's gross loan portfolio (excluding inter-corporate deposits) is secured by assets, moveable and immoveable. The value of the security/collateral granted in favour of the Company, as the case may be, may decline due to adverse market and economic conditions (both global and domestic), delays in insolvency, winding up and foreclosure proceedings, defects in title, difficulty in locating moveable assets, inadequate documentation in respect of assets secured and the necessity of obtaining regulatory approvals for the enforcement of the Company's security over the assets comprising its security and the Company may not be able to recover the estimated value of the assets, thus exposing it to potential losses.

Any delay in enforcing the collateral due to delays in enforcement proceedings before Indian courts or otherwise could also expose the Company to potential losses. Although the Company regularly reviews its credit exposures, defaults may arise from events or circumstances that are difficult to detect or foresee.

#### 3. Repayment of principal is subject to the credit risk of the Company

Potential investors should be aware that receipt of principal amount and any other amounts that may be due in respect of the Debentures is subject to the credit risk of the Company. Potential investors assume the risk that the Company will not be able to satisfy its obligations under the Debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Company, the payment of sums due on the Debentures may be substantially reduced or delayed.

#### 4. Non-Performing Assets ("NPA")

If the level of NPAs in the Company's portfolio were to increase, its business would suffer. The Company had no net NPAs as on September 30, 2017 and June 30, 2017 and its provisioning norms comply with the RBI guidelines / directives. The Company believes that its overall financial profile, capitalization levels and risk management systems, provide significant risk mitigation. However, the occurrence of NPAs or an increase in the level of NPAs will adversely affect the Company's business, financial results and/or operations.

#### 5. Interest Rate Risk

The Company's interest income from lending and gains from trading in debt securities are dependent upon interest rates and their movement. Interest rates are highly sensitive to many factors beyond the control of the Company, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation and other factors. Due to these factors, interest rates in India have historically experienced a relatively high degree of volatility. Consequently, there can be no assurance that significant interest rate movements will not have an adverse effect on the Company's financial results and/or operations.

#### 6. Access to Capital Markets and Commercial Borrowings

With the growth of its business, the Company will increasingly rely on funding from the debt capital markets and commercial borrowings. The Company's growth will depend on its continued ability to access funds at competitive rates which in turn will depend on various factors including its ability to maintain its credit ratings. If the Company is unable to access funds at an effective cost that is comparable to or lower than its competitors, the Company may not be able to offer competitive interest rates for its loans or have adequate funds for its investment activities. This may adversely impact its business results and its future financial performance.

#### 7. Asset Liability Mismatch

The Company is a "systemically important non deposit taking non-banking financial company" (NBFC - ND - SI) and does not have access to public deposits. A major portion of the Company's funding requirements is currently met through short term funding sources such as commercial paper and short term loans from banks. However, some portion of the assets has medium term maturities thereby exposing the Company to liquidity risk. Potential funding mismatches can be created if short term funding sources are not available to the Company. This could have a negative impact on the business and future financial performance of the Company.

#### 8. Portfolio Concentration

A large part of the Company's lending portfolio comprises lending for real estate activities and capital market activities such as margin financing, IPO financing, loans against shares etc. Both these sectors are subject to volatility and cyclicality. Company's performance may be adversely impacted if the real estate sector and capital market withstand a downtrend.

#### 9. Limited track record in fixed income trading and wholesale lending

The Company trades in corporate debt and provides promoter financing and corporate lending. These relatively new businesses entail a higher level of risk, given the exposure to relatively risky segments, such as acquisition financing and commercial real estate. Loans to these segments also have a relatively bigger ticket size vis-à-vis regular securities based lending. The Company's ability to manage healthy asset quality and profitability in these businesses, especially in case of an economic downturn, is yet to be fully demonstrated.

#### **10. Operational and System Risk**

The Company is faced with operational and system risks, which may arise as a result of various factors, viz., improper authorizations, failure of employees to adhere to approved procedures, inappropriate documentation, failure in maintenance of proper security policies, frauds, inadequate training and employee errors. Further, there can also be a security risk in terms of handling information technology related products such as system failures, information system disruptions, communication systems failure which involves certain risks like data loss, breach of confidentiality and adverse effect on business continuity and network security.

If any of the systems do not operate properly or are disabled or if other shortcomings or failures in internal processes or systems are to arise, this could affect the Company's operations and/or result in financial loss, disruption of Company's businesses, regulatory intervention and/or damage to its reputation. In addition, the Company's ability to conduct business may be adversely impacted by a disruption (i) in the infrastructure that supports its businesses and (ii) in the localities in which it is located.

#### 11. The Company's operations are integrated with JM Financial group entities

The Company leverages on the strengths of being part of the JM Financial group and its operations are integrated with various JM Financial group entities. Should there be any event which affects the group in a materially negative way it will have an adverse impact on the business of the Company.

### 12. Any inability of the Company to attract or retain talented professionals may impact its business operations

The business in which the Company operates is very competitive and ability to attract and retain quality talent impacts the successful implementation of growth plans.

The Company may lose many business opportunities and business would suffer if such required manpower is not available on time. The inability of the Company to replace manpower in a satisfactory and timely manner may adversely affect its business and future financial performance.

#### **13. Employee Misconduct**

Any kind of employee misconduct may impair the Company's ability to service clients. It is not always possible to deter employee misconduct and the precautions the Company takes to detect and prevent this activity may not be effective in all cases.

#### 14. Downgrading in credit rating

ICRA Limited has assigned "[ICRA] AA/Stable" rating for long term borrowings upto Rs. 2,500 Crore through NCDs and PP-MLD [ICRA]AA/Stable rating to the Rs. 500 Crore for long term borrowings through Principal Protected Equity Linked Debenture. Further, the Company may avail ratings from SEBI registered Rating Agencies, as and when required. The Company cannot guarantee that this rating will not be downgraded. In the event of deterioration in the financial health of the Company, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. In such cases, potential investors may have to take losses on re-valuation of their investment or make provisions towards sub-standard/ non-performing investment as per their usual norms. Such a downgrade in the credit rating may lower the value of the Debentures and/or the Company's ability to meet its obligations in respect of the Debentures could be affected.

#### 15. No guarantee

JM Financial Limited, the Company's holding company, has not provided any guarantee in any manner with respect to the Debentures and no Investor shall have any recourse against JM Financial Limited or any of its promoters or group companies, except the Company, with respect to the performance of the terms and conditions of the Issue.

### 16. Decisions may be made on behalf of all Debenture Holders that may be adverse to the interest of individual Debenture Holders

The terms of the Debentures contain provisions for calling meetings of Debenture Holders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all Debenture Holders including Debenture Holders who did not attend and vote at the relevant meeting and Debenture Holders who voted in a manner contrary to the majority.

#### **17. No Debenture Redemption Reserve**

As per the provisions of sub-rule 7 of Rule 18 of the Companies (Share Capital and Debentures) Rules, 2014, NBFCs are exempt from the requirement of creation of debenture redemption reserve in respect of privately placed debentures. Pursuant to this rule, the Company does not intend to create any such reserve funds for the redemption of the Debentures.

#### 18. Security may be insufficient to redeem the Debentures

In the event that the Company is unable to meet its payment and other obligations towards Investors under the terms of the Debentures, the Debenture Trustee may enforce the Security as per the terms of the Debenture Trustee Deed and other related documents. The Investors recovery in relation to the Debentures will be subject to (i) the market value of the property offered as security, and (ii) finding a willing buyer for such security at a price sufficient to repay the potential investors' amounts outstanding under the Debentures. Further, the security in relation to the Debentures is proposed to be created subsequently and within a maximum period of 3 months from the date of closure of the first issue under this Shelf DD and therefore, the Debentures will be unsecured till such time.

#### **19.** Tax and other Considerations

Special tax, accounting and legal considerations may apply to certain types of potential investors. Potential investors are urged to consult with their own financial, legal, tax and other professional advisors to determine any financial, legal, tax and other implications of an investment into the Debentures.

## 20. Company's indebtedness and covenants imposed by its financing arrangements may restrict its ability to conduct its business or operations

Company's financing arrangements require it to maintain certain security cover for some of its borrowings. Should there be any breach of financial or other covenants of any financing arrangements and such breach continues beyond the stipulated cure period, the Company may be subjected to various consequences as a result of such default including forced repayment of such borrowings. Further, under some of the financing arrangements, the Company is required to inform / obtain prior approval of the lenders / debentures holders / debenture trustee for various actions. This may restrict / delay some of the actions / initiatives of the Company from time to time.

#### **B.** EXTERNAL RISK FACTORS

#### 1. The Debentures may be illiquid

The Company intends to list the Debentures on the WDM segment of the BSE. The Company cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange and that there would be any market for the Debentures. The current trading of the Company's existing listed non-convertible debentures may not reflect the liquidity of the NCDs being offered through the Issue. It is not possible to predict if and to what extent a secondary market may develop for the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity than if they were not so listed or quoted or admitted to trading.

The Company may, but is not obliged to, at any time purchase the Debentures at any price in the market or by tender or private agreement. Any Debentures so purchased may be resold or surrendered for cancellation. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

Further, the Company may not be able to issue any further Debentures, in case of any disruptions in the securities market.

#### 2. Future legal and regulatory obstructions

Future government policies and changes in laws and regulations in India (including their interpretation and application to the operations of the Company) and comments, statements or policy changes by any regulator, including but not limited to SEBI or RBI, may adversely affect the Debentures, and restrict the Company's ability to do business in its target markets. The timing and content of any new law or regulation is not within the Company's control and such new law, regulation, comment, statement or policy change could have an adverse effect on its business, financial results and/or operations.

Further, SEBI, the relevant Stock Exchange(s) or other regulatory authorities may require clarifications on this DD, which may cause a delay in the issuance of Debentures or may result in the Debentures being materially affected or even rejected.

#### 3. Material changes in regulations to which the Company is subject

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently NBFCs not accepting public deposits are exempt from many provisions. In addition, the Company is generally subject to changes in Indian law, as well as to changes in regulations and policies and accounting principles. The RBI also requires the Company to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including risk weights on assets and/or provisioning norms for NPAs and/or capital adequacy requirements could adversely affect the profitability of the Company or its future financial performance by requiring a restructuring of its activities, increasing costs or otherwise. The Company is classified as a NBFC-ND-SI as defined in the RBI guidelines, which is subject to certain statutory, regulatory, exposure and prudential norms and this may limit the flexibility of the Company's loans, investments and other products.

#### 4. A slowdown in economic growth in India

The Company's performance and the quality and growth of its assets are necessarily dependent on the health of the overall Indian economy. A slowdown in the Indian economy or a fall in India's GDP may adversely affect its business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general downtrend in the economy. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact the Company's ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available.

### 5. Political instability or changes in the government could delay further liberalization of the Indian economy and adversely affect economic conditions in India generally

If there was to be any slowdown in the economic liberalization, or a reversal of steps already taken, it could have an adverse effect on the Company's business. Financial difficulties and other problems in certain financial institutions in India could cause the Company's business to suffer. The Company is exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties, trends and other problems faced by certain Indian financial institutions. The problems faced by such Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create an adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect the Company's business, its future financial performance and its shareholders' funds.

### 6. Acts of God, terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and the Company's business

Acts of God, terrorist attacks and other acts of violence or war may negatively affect the Indian markets and may also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence. In addition, adverse social, economic and political events in India could have a negative impact on the Company. Such incidents could also create a perception that investment in Indian companies involves a higher degree of risk which could have an adverse impact on the Company's business.

## 7. The Company's business may be adversely impacted by natural calamities or unfavourable climatic changes.

India has experienced natural calamities such as earthquakes, floods, droughts and a tsunami in recent years. India has also experienced pandemics, including the outbreak of avian flu and swine flu. The extent and severity of these natural disasters and pandemics determine their impact on the economy and in turn their effect on the financial services sector of which the Company is a part cannot be ascertained or predicted but could adversely affect the Company. Prolonged spells of abnormal rainfall and other natural calamities could have an adverse impact on the economy which in turn could adversely affect the financial results and/or operations of the Company.

#### C. GENERAL RISK FACTORS

Investment in debt and debt related securities involve a degree of risk and investors should not invest any funds in the debt instruments, unless they can afford to take the risks attached to such investments. Investors are advised to read the risk factors carefully before taking an investment decision in this Issue. For taking an investment decision, the investors must rely on their own examination of the Company, this Shelf Disclosure Document and any Supplemental DDs issued in pursuance hereof and the Issue including the risks involved. The Issue has not been recommended or approved by SEBI or RBI nor does SEBI or RBI guarantee the accuracy or adequacy of this DD.

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

#### Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with

generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

#### Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

# JM FINANCIAL PRODUCTS LIMITED Notes to the standalone financial statements

#### Note 1

Significant Accounting Policies

#### Basis of preparation of financial statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013 ("the Act") read with relevant rules issued thereunder. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

#### Use of Estimates

The preparation of financial statements requires the management to make estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) as of the date of the financial statements and the reported amount of income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Difference between the actual and estimates are recognised in the period in which the results are known / materialised.

#### Fixed Assets

Fixed Assets are recorded at cost of acquisitions or construction. They are stated at historical cost less accumulated depreciation/ amortization and impairment loss, if any.

#### Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act. 2013.

Leasehold improvements are depreciated over the period of lease or useful life of the asset whichever is lower. Assets acquired under finance lease are depreciated over the period of lease.

Assets costing Rs.5,000/- or less are depreciated at 100%.

#### Intangible Assets

Intangible assets are stated at cost less accumulated amortization and impairment loss, if any. Softwares are amortized over a period of five years on a straight line basis.

#### Impairment loss

Impairment loss is provided to the extent the carrying amount(s) of assets exceed their recoverable amount(s). Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash-flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

#### Investments

Current investments are carried at lower of cost (Scrip wise) and fair value. Long term investments are carried at cost. Provision is made to recognize a decline, other than temporary, in the carrying amount of long term investments.

#### Stock in Trade

Stock in trade is carried at lower of cost and fair value. Cost is determined on First in First Out basis.

#### Foreign Currency Transactions

Transactions in foreign currency are recorded at rates of exchange in force at the time the transactions are effected. At the year-end, monetary items denominated in foreign currency are reported using the closing rates of exchange. Exchange differences arising thereon and on realisation/ payment of foreign exchange are accounted in the relevant year as income or expense.

#### **Revenue Recognition**

Interest income is recognised on accrual basis except in case of non-performing assets where interest is accounted on realization. In other cases, income is recognised when there is no significant uncertainty as to determination or realization exists.

# JM FINANCIAL PRODUCTS LIMITED Notes to the standalone financial statements

# Provision for Non Performing Assets (NPA) and Standard Assets (SA)

All loans and other credit exposures, where the installments are overdue for a period of four months or more are classified as NPA. Provision is made in respect of NPA and SA in accordance with the stipulations of Prudential Norms prescribed in the Master Direction -"Non-Banking Financial Company- Non-Systemically Important Non-Deposit taking Company (Reserve Bank) Directions, 2016 and Master Direction- Non-Banking Financial Company- Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016"

#### **Employee Retirement Benefits**

# (a) Post Employment Benefits and Other Long Term Benefits:

# **Defined Contribution Plan:**

The Company contributes towards Provident Fund and Family Pension Fund. Liability in respect thereof is determined on the basis of contribution as required under the Statue/ Rules.

#### Defined Benefit Plans:

In respect of gratuity, provision is made based upon the actuarial valuation done at the end of every financial year using "Projected unit Credit Method". Major drivers in actuarial assumption, typically, are years of services and employees compensation. Gains and losses on changes in actuarial assumption are charged to the statement of profit and loss.

#### (b) Short term employee benefits:

Short term employee benefits are recognized as expense at the undiscounted amount in the statement of profit and loss of the year in which the related services are rendered.

#### Borrowing costs

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are capitalized as a part of costs of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

#### Taxes on Income

Tax expense comprises both current and deferred tax at the applicable enacted/ substantively enacted rates. Current tax represents the amount of income tax payable/ recoverable in respect of the taxable income/ loss for the reporting period. Deferred tax represents effect of timing differences between taxable income and accounting income for the reporting period that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In case of existence of carry forward unabsorbed depreciation and tax losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that deferred tax assets can be realised against future taxable profits.

#### **Provisions and contingencies**

A provision is recognized when the Company has a legal and constructive obligation as a result of a past event, for which it is probable that cash outflow will be required and a reliable estimate can be made of the amount of the obligation. A contingent liability is disclosed when the Company has a possible or present obligation where it is not probable that an outflow of resources will be required to settle it. Contingent assets are neither recognized nor disclosed.

# Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable

assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### Note 1

#### Significant Accounting Policies

#### Basis of preparation of financial statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") / Companies Act, 1956 ("the 1956 Act"), as applicable. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

#### Use of Estimates

The preparation of financial statements requires the management to make estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) as of the date of the financial statements and the reported amount of income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Difference between the actual and estimates are recognised in the period in which the results are known / materialised.

#### **Fixed Assets**

Fixed Assets are recorded at cost of acquisitions or construction. They are stated at historical cost less accumulated depreciation/ amortization and impairment loss, if any.

#### Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

Leasehold improvements are depreciated over the period of lease or useful life of the asset whichever is lower. Assets acquired under finance lease are depreciated over the period of lease. Assets costing Rs.5,000/- or less are depreciated at 100%.

#### Intangible Assets

Intangible assets are stated at cost less accumulated amortization and impairment loss, if any. Softwares are amortized over a period of five years on a straight line basis.

#### Impairment loss

Impairment loss is provided to the extent the carrying amount(s) of assets exceed their recoverable amount(s). Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash-flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

#### Investments

Current investments are carried at lower of cost (Scrip wise) and fair value. Long term investments are carried at cost. Provision is made to recognize a decline, other than temporary, in the carrying amount of long term investments.

#### Stock in Trade

Stock in trade is carried at lower of cost and fair value. Cost is determined on First in First Out basis.

#### Foreign Currency Transactions

Transactions in foreign currency are recorded at rates of exchange in force at the time the transactions are effected. At the year-end, monetary items denominated in foreign currency are reported using the closing rates of exchange. Exchange differences arising thereon and on realisation/ payment of foreign exchange are accounted in the relevant year as income or expense.

#### Revenue Recognition

Interest income is recognised on accrual basis except in case of non-performing assets where interest is accounted on realization. In other cases, income is recognised when there is no significant uncertainty as to determination or realization exists.

#### Provision for Non Performing Assets (NPA) and Standard Assets (SA)

All loans and other credit exposures, where the installments are overdue for a period of six months or more are classified as NPA. Provision is made in respect of NPA and SA in accordance with the stipulations of Prudential Norms prescribed in the "Systemically Important Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2015" by the Reserve Bank of India (RBI). Additional provisions (over and above the provisioning requirements under the Directions as specified by RBI) are also made as per guidelines prescribed by the Board of Directors.

#### Employee Retirement Benefits

#### (a) Post Employment Benefits and Other Long Term Benefits:

#### Defined Contribution Plan:

The Company contributes towards Provident Fund and Family Pension Fund. Liability in respect thereof is determined on the basis of contribution as required under the Statue/ Rules.

#### Defined Benefit Plans:

In respect of gratuity, provision is made based upon the actuarial valuation done at the end of every financial year using "Projected unit Credit Method". Major drivers in actuarial assumption, typically, are years of services and employees compensation. Gains and losses on changes in actuarial assumption are charged to the statement of profit and loss.

#### (b) Short term employee benefits:

Short term employee benefits are recognized as expense at the undiscounted amount in the statement of profit and loss of the year in which the related services are rendered.

#### Borrowing costs

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are capitalized as a part of costs of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

#### Taxes on income

Tax expense comprises both current and deferred tax at the applicable enacted/ substantively enacted rates. Current tax represents the amount of income tax payable/ recoverable in respect of the taxable income/ loss for the reporting period. Deferred tax represents effect of timing differences between taxable income and accounting income for the reporting period that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In case of existence of carry forward unabsorbed depreciation and tax losses, deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that deferred tax assets can be realised against future taxable profits.

#### **Provisions and contingencies**

A provision is recognized when the Company has a legal and constructive obligation as a result of a past event, for which it is probable that cash outflow will be required and a reliable estimate can be made of the amount of the obligation. A contingent liability is disclosed when the Company has a possible or present obligation where it is not probable that an outflow of resources will be required to settle it. Contingent assets are neither recognized nor disclosed.

#### Note 1

#### Significant Accounting Policies

#### Basis of preparation of financial statements

The financial statements of the Company have been prepared in accordance with the Generally Accepted Accounting Principles in India (Indian GAAP) to comply with the Accounting Standards specified under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014 and the relevant provisions of the Companies Act, 2013 ("the 2013 Act") / Companies Act, 1956 ("the 1956 Act"), as applicable. The financial statements have been prepared on accrual basis under the historical cost convention. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

#### Use of Estimates

The preparation of financial statements requires the management to make estimates and assumptions considered in the reported amount of assets and liabilities (including contingent liabilities) as of the date of the financial statements and the reported amount of income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Difference between the actual and estimates are recognised in the period in which the results are known / materialised.

#### Fixed Assets

Fixed Assets are recorded at cost of acquisitions or construction. They are stated at historical cost less accumulated depreciation/ amortization and impairment loss, if any.

#### Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value. Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 (also refer note 10.3). Leasehold improvements are depreciated over the period of lease or useful life of the asset whichever is lower.

Assets acquired under finance lease are depreciated over the period of lease. Assets costing Rs.5,000/- or less are depreciated at 100%.

#### Intangible Assets

Intangible assets are stated at cost less accumulated amortization and impairment loss, if any. 5oftwares are amortized over a period of five years on a straight line basis.

#### Impairment loss

Impairment loss is provided to the extent the carrying amount(s) of assets exceed their recoverable amount(s). Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash-flows expected to arise from the continuing use of the asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from sale of the asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

#### Investments

Current investments are carried at lower of cost (Scrip wise) and fair value. Non-current investments are carried at cost. Provision is made to recognize a decline, other than temporary, in the carrying amount of non-current investments.

#### Stock in Trade

Stock in trade is carried at lower of cost and fair value. Cost is determined on First in First Out basis.

#### Foreign Currency Transactions

Transactions in foreign currency are recorded at rates of exchange in force at the time the transactions are effected. At the year-end, monetary items denominated in foreign currency are reported using the closing rates of exchange. Exchange differences arising thereon and on realisation/ payment of foreign exchange are accounted in the relevant year as income or expense.

#### **Revenue Recognition**

Interest income is recognised on accrual basis except in case of non-performing assets where interest is accounted on realization. In other cases, income is recognised when there is no significant uncertainty as to determination or realization exists.

#### Provision for Non Performing Assets (NPA) and Standard Assets (SA)

All loans and other credit exposures, where the installments are overdue for a period of six months or more are classified as NPA. Provision is made in respect of NPA and SA in accordance with the stipulations of Prudential Norms prescribed in the "Systemically Important Non-Banking Financial (Non-Deposit Accepting or Holding) Companies Prudential Norms (Reserve Bank) Directions, 2015" by the Reserve Bank of India (RBI). Additional provisions (over and above the provisioning requirements under the Directions as specified by RBI) are also made as per guidelines prescribed by the Board of Directors.

#### Employee Retirement Benefits

#### (a) Post Employment Benefits and Other Long Term Benefits:

### **Defined Contribution Plan:**

The Company contributes towards Provident Fund and Family Pension Fund. Liability in respect thereof is determined on the basis of contribution as required under the Statue/ Rules.

#### **Defined Benefit Plans:**

In respect of gratuity, provision is made based upon the actuarial valuation done at the end of every financial year using "Projected unit Credit Method<sup>u</sup>. Major drivers in actuarial assumption, typically, are years of services and employees compensation. Gains and losses on changes in actuarial assumption are charged to the statement of profit and loss.

#### (b) Short term employee benefits:

Short term employee benefits are recognized as expense at the undiscounted amount in the statement of profit and loss of the year in which the related services are rendered.

#### Borrowing costs

Borrowing costs that are attributable to the acquisition, construction or production of qualifying assets are capitalized as a part of costs of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are charged to revenue.

#### Taxes on income

Tax expense comprises both current and deferred tax at the applicable enacted/ substantively enacted rates. Current tax represents the amount of income tax payable/ recoverable in respect of the taxable income/ loss for the reporting period. Deferred tax represents effect of timing differences between taxable income and accounting income for the reporting period that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax assets are recognized only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In case of existence of carry forward unabsorbed depreciation and tax losses, deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that deferred tax assets can be realised against future taxable profits.

#### Provisions and contingencies

A provision is recognized when the Company has a legal and constructive obligation as a result of a past event, for which it is probable that cash outflow will be required and a reliable estimate can be made of the amount of the obligation. A contingent liability is disclosed when the Company has a possible or present obligation where it is not probable that an outflow of resources will be required to settle it. Contingent assets are neither recognized nor disclosed.

(c) An Extraordinary Dividend;

(d) A call by the Stock Issuer in respect of Stocks that are not fully paid;

(e) A repurchase by the Stock Issuer or any of its subsidiaries of its Stocks whether out of profits or capital and whether the consideration for such repurchase is cash, securities or otherwise; or

## 2.2 Adjustment

On or at any time after the occurrence of an Adjustment Event,

(a) upon determination by the Company that a Merger Event/Tender Offer has occurred, then, on or after the relevant Merger Date/Tender Offer Date, the Company shall make such adjustment to the relevant terms of the Debentures which is appropriate to account for the economic effect on the Debentures of such Merger Event/Tender offer (provided that no adjustments will be made to account solely for changes in volatility, expected dividends, stock loan rate or liquidity relevant to the Stock), which may, but need not, be determined by reference to the adjustment(s) made in respect of such Merger Event/Tender offer by any exchange on which options on the Stock traded and determine the effective date of that adjustment.

(b) if the Adjustment Event is a Potential Adjustment Event, then following the declaration by any Stock Issuer of an event which is a Potential Adjustment Event or following any adjustment to the settlement terms of listed contracts of the relevant Stock, the Company shall determine whether such Potential Adjustment Event has a diluting or concentrative effect on the theoretical value of the relevant Stock and, if so, a. will make the corresponding adjustment, if any, to the calculation of the Coupon Amount and/or the Final Redemption Amount and/or the Contingent Early Redemption Amount and/or any other relevant terms of the Debentures as the Company, in its sole and absolute discretion (which discretion is not subject to any challenge or dispute), appropriate to account for that diluting or concentrative effect or, b. determine the effective date(s) of the adjustment(s); provided that no adjustment shall be made to the date of maturity of the Debentures. Such adjustments shall be deemed to be so made from such effective date(s).

(c) if the Adjustment Event is a Realisation Disruption Event, on or before any Valuation Date, the Company may, in good faith and in a commercially reasonable manner, make such consequential adjustments to any of the terms of the Debentures (including any payment obligations) as it determines appropriate in order to reflect the particular Realisation Disruption Event. Such adjustments may include (but are not limited to) (1) deduction of the applicable charge, tax or deduction from the Redemption Amount or Early Redemption Amount, as the case may be, and/or (2) non-payment of the Redemption Amount or Early Redemption Amount and the retention of such amount, as the case may be, until the relevant restrictions are lifted. Any such adjustments will be effective as of the date determined by the Company. The Company may (but need not) in its absolute discretion determine the appropriate adjustments by reference to the adjustment(s) in respect of such Adjustment Event made by any Exchange to listed contracts of the relevant Stock traded on such Exchange.

If the Company is unable to make such adjustment, then it shall have the sole discretion to redeem the Debentures in the manner provided below, describing the process for Early Redemption.

The Issuer shall, as soon as reasonably practicable, provide notice to the Debenture-Holder and Trustee of any consequential adjustments to be made to the terms of the Debentures as determined appropriate by it which notice shall be irrevocable, provided that any failure to give, or non receipt of such notice will not affect the validity of the Adjustment Event.

# **3. EARLY REDEMPTION FOR EXTRAORDINARY REASON, ILLEGALITY AND FORCE MAJEURE**

If, for reasons beyond the control of the Issuer, the performance of the Issuer's obligation(s) under the Debentures is prevented by reason of *force majeure* including but not limited to an act of state or situations beyond the reasonable control of the Issuer, occurring after such obligation(s) is entered into, or has become illegal or impossible in whole or in part or in the exercising of its rights, the Issuer may at its discretion and without obligation redeem all but not some of the Debentures, by giving notice of not less than five (5) Business Days to the Debenture Holders which notice shall be irrevocable and shall specify the date upon which the Debentures shall be redeemed (such date on which the Debentures become immediately due and payable, the **"Early Redemption Date"**). **Insolvency Event shall have occurred** If at any time, by reason of the voluntary or involuntary liquidation, winding-up, dissolution, bankruptcy or insolvency or analogous proceeding affecting the Stock Issuer (i) all the Stocks of the Stock Issuer are required to be transferred to any trustee, liquidator or other similar official or (ii) holders of the Stocks of such Stock Issuer become legally prohibited from transferring them, **Insolvency Filing Event shall have occurred if** an Insolvency Filing shall have occurred.

"Insolvency Filing" means, in respect of the Stock, that the Stock Issuer has instituted, or has had instituted against it by a regulator, supervisor or any similar official with primary insolvency, rehabilitative or regulatory jurisdiction over it in the jurisdiction of its incorporation or organisation or the jurisdiction of its head or home office, or it consents to, a proceeding seeking a judgment of insolvency or bankruptcy or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights, or a petition is presented for its winding-up or liquidation by it or such regulator, supervisor or similar official or its consents to such a petition, provided that proceedings instituted or petitions presented by creditors and not consented to by the relevant Stock Issuer shall not be deemed an insolvency filing. Such notice shall be irrevocable and shall specify the date of such redemption.

### **5. CORRECTION OF STOCK PRICES**

In the event that any price or level published on the Exchange or Related Exchange and which is utilised for any calculation or determination made in respect of the Debentures is subsequently corrected and the correction is published by the Exchange or Related Exchange within two Business Days after the original publication (and at least two Business Days prior to the Maturity Date), the Issuer will determine the amount that is payable or deliverable as a result of the correction and, to the extent necessary, adjust the terms of the Debentures to account for such correction.

### PART 2 – UPDATED INFORMATION

(Material changes taken place after filing of Shelf Disclosure Document dated November 14, 2017)

## In Section II:

#### DISCLAIMER ON VALUATION (FOR TRANCHE BL – OPTION III NCDS ONLY):

The Valuation reflects the independent views of the Valuation Agent. It is **expressly stated that the valuation is not the view of the Issuer** or its affiliates. The Issuer has not reviewed the Valuation and is not responsible for the accuracy of the Valuations. The Valuations provided by the Valuation Agent, and made available on the website of the Issuer and the Valuation Agent do not represent the actual price that may be received upon sale or redemption of the Debentures. They merely represent the Valuation Agent's computation of the valuation which may in turn be based on several assumptions. The Valuations provided by the Valuation Agent may include the use of models by the Valuation Agent (that may be different from the proprietary models used by the Issuer and/or the calculation agent) and consequently, valuations provided by other parties (including the Issuer and/or the calculation agent) may be significantly different.

# DISCLAIMER BY THE VALUATION AGENT (FOR TRANCHE BL – OPTION III NCDS ONLY):

Market Linked Debenture Valuation provided by the Valuation Agent reflects the Valuation Agent's opinion on the value of the Market Linked Debenture on the valuation date and does not constitute an audit of the Issuer by the Valuation Agent. The Valuation is based on the information sought from and provided by the Issuer or obtained by the Valuation Agent from sources it considers reliable. The Valuation Agent does not guarantee the completeness or accuracy of the information on which the Valuation is based. The Valuation Agent specifically states that the Valuation is an indicative value of the Debenture on the valuation date and can be different from the actual realizable value of the Debenture. The Valuation does not comment on the market price of the Market Linked Debentures or suitability for a particular investor. In the event of early redemption/buy back/ any other premature exit, investors may choose to contact the Issuer directly or through their intermediaries (through whom investments in the Specified MLDs were made) or, in the alternative, follow the procedure as set out in the relevant offer Document.

### DISCLAIMER OF THE ARRANGER (FOR TRANCHE BL – OPTION III NCDS ONLY):

It is advised that the Issuer Company has exercised self due-diligence to ensure complete compliance of prescribed disclosure norms in this Shelf Disclosure Document. The role of the Arranger in the assignment is confined to marketing and placement of the Debentures on the basis of this Shelf Disclosure Document as prepared by the Issuer Company. The Arranger has neither scrutinized/ vetted nor has it done any due-diligence for verification of the contents of this Shelf Disclosure Document. The Arranger shall use this document for the purpose of soliciting subscription to eligible investors in the Debentures to be issued by the Issuer Company on private placement basis. It is to be distinctly understood that the aforesaid use of this document by the Arranger should not in any way be deemed or construed that the document has been prepared, cleared, approved or vetted by the Arranger; nor does it in any manner warrant, certify or endorse the financial or other soundness of the Issuer, its promoters, its management or any scheme or project of the Issuer Company. The Arranger or any of its directors, employees, affiliates or representatives does not accept any responsibility and/or liability for any loss or damage arising of whatever nature and extent in connection with the use of any of the information contained in this document.

# The below internal risk factor pt. 21 (For Tranche BL – Option III NCDs only) be inserted after the internal risk factor on page no. 14 of the DD:

## 21. Potential Conflicts of Interest

Investors should ensure that they understand and accept the identities of the parties and the roles they play in relation to the Debentures, as disclosed in the DD and the Supplemental DD.

The Company may appoint itself or an affiliate as its Calculation Agent or other agent, for the purposes of calculating amounts payable or deliverable to holders of Debentures, or for any other purpose. Under certain circumstances, the agent's responsibilities as Calculation Agent or other agent for the Debentures could give rise to conflicts of interest. In particular, in their respective roles, the Issuer or the various named agents may retain various powers of discretion which may have a material impact on the value and performance of the Debentures (including the ability to declare an early redemption of the Debentures at market price as a result of certain conditions). Such discretions may create conflicts of interest due to the capacities in which the Issuer or the agents are acting and these discretions may be exercised (or not be exercised) in a way that could adversely affect the Debenture Holders. The Calculation Agent or other agent is required to carry out its duties in good faith and using its reasonable judgment. However, because the Company could be controlled by the affiliate, potential conflicts of interest could arise. The Company also may enter into an arrangement with an affiliate to hedge market risks associated with its obligations under the Debentures. Such affiliate expects to make a profit in connection with this arrangement. The Company will not seek competitive bids for this arrangement from unaffiliated parties.

The Company and its affiliates have no obligation to disclose such information or activities; provided that the Issuer will make every good faith effort not to take advantage of any price sensitive information. By purchasing or holding any Debentures, the Debenture Holder acknowledges that the Issuer, its affiliates and their respective officers and respective directors may engage in any such activities without regard to the Shelf Disclosure Document and the relevant Pricing Supplement or the effect that such activities may directly or indirectly have on the Debentures and the Debenture Holder irrevocably waives any claim that it may have in respect thereof. In particular the following situations may arise:

a) Transactions involving the underlying

The Issuer and its affiliates may from time to time engage in transactions involving the underlying for their proprietary accounts and for accounts under their management. Such transactions may have a positive or negative effect on the value of the underlying and consequently upon the value of the Debentures.

b) Issuing of other debentures in respect of the underlying

The Issuer and its affiliates may issue other debentures in respect of the underlying and the introduction of such competing products into the market place may affect the value of the Debentures.

c) Market-Making for the underlying

The affiliates of the Issuer may, in certain cases, act as a market-maker for the underlying, which might in particular be the case when any of such affiliates has also issued the underlying. By such marketmaking, such affiliate will, to a large extent, determine the price of the underlying, and consequently influence the value of the Debentures itself.

d) Acting as underwriter or otherwise for the issuer of underlying

The affiliates of the Issuer may also act as underwriter in connection with future offerings of the underlying or may act as financial adviser to the issuer of an underlying. Such activities could present certain conflicts of interest and may affect the value of the Debentures.

e) Obtaining of Non-public Information

The Issuer and/or its affiliates may acquire non-public information with respect to the underlying, and neither the Issuer nor any of its affiliates undertakes to disclose any such information to any Debenture Holder.

# ADDITIONAL RISK FACTORS THAT ARE SPECIFIC TO ISSUE OF MARKET LINKED DEBENTURES (FOR TRANCHE BL – OPTION III NCDS ONLY):

- 1. The NCDs proposed to be issued are subject to model risk, i.e., the securities are created on the basis of complex mathematical models involving multiple derivative exposures which may or may not be hedged and the actual behaviour of the securities selected for hedging may significantly differ from the returns predicted by the mathematical models.
- 2. The NCDs proposed to be issued being principal/capital protected, the principal amount is subject to the credit risk of the issuer whereby the investor may or may not recover all or part of the funds in case of default by the issuer. Thus the investments in such NCDs may also result in a loss.
- 3. The valuations as may be provided by the Valuation Agency, on the website of the Issuer and the Valuation Agency or otherwise, do not represent the actual price of the Debentures that may be received upon sale or redemption of Debentures. They merely represent the Valuation Agency's computation of the valuation which may in turn be based on several assumptions. A Debenture Holder understands and is aware that the valuation is not in any manner reflective of the actual returns that can be obtained by such Investor on the Debentures.
- 4. The return on an investment in the Debentures (which are linked with shares) may differ from the return an investor might earn on a direct investment in the shares over a similar period.
- 5. The terms of the instrument specify that the payments to investors will not be fixed, and will be linked to an external variable i.e. government security price of IGB 7.17 01/08/28 Corp. This could result in variability in payments because of adverse movement in value of the external variable. The risk of such adverse movement in price / value is not addressed by any rating.
- 6. Investors considering borrowing capital to leverage their investment in the Debentures should obtain further detailed information as to the applicable risks from their lender. Any statement on the potential risks and return on the Debentures does not take into account the effect of any leveraging.
