Bonds/ Government securities which are fixed return securities, run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The level of interest rates is determined by the rates at which government raises new money through RBI, the price levels at which the market is already dealing in existing securities, rate of inflation etc. The extent of fall or rise in the prices is a function of the prevailing coupon rate, number of days to maturity of a security and the increase or decrease in the level of interest rates. The prices of Bonds/ Government securities are also influenced by the liquidity in the financial system and/or the open market operations (OMO) by RBI. Pressure on exchange rate of the rupee may also affect security prices. Such rise and fall in price of bonds/ government securities may influence valuations as and when such changes occur.

c) Changes or discontinuance of the Underlying:

Changes in the Underlying and factors which either affect or may affect the value of the Underlying, may affect the return on an investment in the Debentures. In case of the regulators or the authorized bodies discontinuing or restricting the use of the benchmark/underlying, the Issuer will be bound to take necessary action as may be prescribed by the regulators or the authorized body or as may be required by the law or as may be required to accommodate the situation.

d) Returns on Debentures are subject to Model Risk:

Returns on the Debentures are based on complex mathematical models involving multiple derivative exposures which may or may not be hedged and the actual behavior of the Underlying/ Reference Index selected for hedging may significantly differ from returns predicted by the mathematical models.

e) Increasing competition from banks, financial institutions and NBFCs

The successful implementation of Issuers growth plans depends on its ability to face the competition. The main competitors of the Issuer are NBFCs, financial institutions and banks. The Issuer does not have access to large quantities of low cost deposits because of which it may become less competitive. Many of its competitors have significantly greater financial, technical, marketing and other resources. Many of them also offer a wider range of services and financial products than the Issuer does and have greater brand recognition and a larger client base. As the Issuer ventures into offering newer products, it is likely to face additional competition from those who may be better capitalised, have longer operating history and better management. If the Issuer is unable to manage its business and compete effectively with current or future competitors it might impede its competitive position and profitability.

f) Downgrading in Credit Rating

For long term borrowings through NCDs the following Rating has been assigned –

CARE - CARE PP-MLD AA-; Stable [(pronounced as “CARE PP-MLD Double A Minus Outlook: Stable)]

The Issuer cannot guarantee that this rating will not be downgraded. In the event of deterioration in the financial health of the Issuer, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. Such

a downgrade in the credit rating may lower the value of the Debentures and may also result in the Issuer having to withdraw this borrowing programme.

g) Security may be insufficient to redeem debentures

In the event that the company is unable to meet its payment and other obligations towards investors under the terms of the debentures, the Debenture Trustee may enforce the security as per the terms of security documents, and other related documents. The Debenture Holder(s)' recovery in relation to the debentures will be subject to (a) the market value of such secured property, (b) finding willing buyer for the security at a price sufficient to repay debenture holder(s)' amounts outstanding under the debentures. The value realized from the enforcement of the security may be insufficient to redeem the debentures.

h) Repayment is subject to the credit risk of issuer

Potential investors should be aware that receipt of the principal amount, (i.e. the redemption amount) and any other amounts that maybe due in respect of the debentures is subject to the credit risk of the Issuer. Potential investors acknowledge the risk that the issuer may not be able to satisfy their obligations under the debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the issuer, the payment of sums due on the debentures may not be made or may be substantially reduced or delayed.

EXTERNAL RISK FACTORS

a) The Debentures may be illiquid

The Company intends to list the Debentures on the WDM segment of the BSE. The Company cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange(s) and that there would be any market for the Debenture(s). It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

b) A slowdown in economic growth in India

A slowdown in the Indian economy / GDP may adversely affect Company's business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general down trend in the economy. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact the Company's ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available.

c) Conditions in the Indian Debt market may affect the coupon on the Debentures.

Even though the Government securities market is more liquid compared to other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through. The Central and State Governments are the issuers of the local currency debt. The Government raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since these securities carry minimal risks, they may command lower yields.

The performance may be affected by changes in Government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies.

d) Conditions in the Indian Equity market may affect the coupon on the Debentures.

Applicable to Index Linked product:

The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected, thereby affecting the indices.

Potential Conflicts of Interest

The Company has appointed Edelcap Securities Limited, its subsidiary as its calculation agent for the purposes of calculating amounts payable or deliverable to holders under these Debentures. Under certain circumstances, the agent as subsidiary and its responsibilities as calculation agent for the Debentures could give rise to conflicts of interest. However, because the Company may control the subsidiary, potential conflicts of interest could arise. The Issuer may enter into an arrangement with a subsidiary to hedge market risks associated with its obligations under the Debentures.
