19. MANAGEMENT'S PERCEPTION OF RISK FACTORS

Potential investors should consider carefully all the risk factors in this Disclosure Document for evaluating the Issuer and its business and the Debentures before making any investment decision relating to the Debentures. Unless the context requires otherwise, the risk factors described below apply to the Issuer only. If any one of the following stated risks actually occurs, the Issuer's business, financial conditions and results of operations could suffer and, therefore, the value of the Issuer's Debentures could decline.

Unless specified or quantified in the relevant risk factors, the Issuer is not in a position to quantify the financial or other implications of any risk mentioned herein below:

- 1. Early Termination for Extraordinary Reasons, Illegality and Force Majeure If the Issuer determines that, for reasons beyond its control, the performance of its obligations under the Debentures has become illegal or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Debentures for any reason, the Issuer may at its discretion and without obligation terminate early the Debentures. If the Issuer terminates early the Debentures, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Debenture an amount determined by the Calculation Agent/Issuer.
- 2. Interest Rate Risk (Company specific): Since ECLF is engaged in lending and financing activities, its business and income will largely be dependent on interest income from its operations. Interest rates are highly sensitive to many factors, including the monetary policies of RBI, deregulation of the financial sector in India, domestic and International economic and political conditions, inflation and other factors beyond the control of ECLF. Due to these factors, interest rates in India have

historically experienced a relatively high degree of volatility. There can be no assurance that significant interest rate movements will not have an effect on the results of its operations.

4. Credit Risk: Any lending and investment activity by the Issuer is exposed to credit risk arising from repayment default by borrowers and other counterparties. The Issuer has a systematic credit evaluation process to monitor the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluate the changes and developments in sectors in which it has substantial exposure and to take timely appropriate remedial actions. The Issuer also undertakes periodic reviews of its entire asset portfolio with a view to determine the portfolio valuation identify potential areas of action and devise appropriate strategies thereon. Despite these efforts, there can be no assurance that repayment default will not occur and in such circumstances may have an effect on its results of operations. The principal amount is subject to the credit risk of the Issuer whereby the investor may or may not recover all or part of the funds in case of default by the Issuer.

6. Increasing competition from banks, financial institutions and NBFCs

The successful implementation of Issuers growth plans depends on its ability to face the competition. The main competitors of the Issuer are NBFCs, financial institutions and banks. The Issuer, being an NBFC, does not have access to large quantities of low cost deposits because of which it may become less competitive. Many of its competitors have significantly greater financial, technical, marketing and other resources. Many of them also offer a wider range of services and financial products than the Issuer does and have greater brand recognition and a larger client base. As the Issuer ventures into offering newer products, it is likely to face additional competition from those who may be better capitalised, have longer operating history and better management. If the Issuer is unable to manage its business and compete effectively with current or future competitors it might impede its competitive position and profitability.

7. Downgrading in Credit Rating

CRISIL Limited has assigned CRISIL AA/Stable

CARE has assigned CARE AA/Stable (pronounced CARE double AA rating with stable outlook)

for long term borrowings through NCDs. The Issuer cannot guarantee that this rating will not be downgraded. In the event of deterioration in the financial health of the Issuer, there is a possibility that the Rating Agency may downgrade the rating of the Debentures. Such a downgrade in the credit rating may lower the value of the Debentures and may also result in the Issuer having to withdraw this borrowing programme.

EXTERNAL RISK FACTORS

1. The Debentures may be illiquid

The Company intends to list the Debentures on the WDM segment of the BSE. The Company cannot provide any guarantee that the Debentures will be frequently traded on the Stock Exchange(s) and that there would be any market for the Debenture(s). It is not possible to predict if and to what extent a secondary market may develop in the Debentures or at what price the Debentures will trade in the secondary market or whether such market will be liquid or illiquid. The fact that the Debentures may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity. The more limited the secondary market is, the more difficult it may be for holders of the Debentures to realise value for the Debentures prior to settlement of the Debentures.

2. A slowdown in economic growth in India

A slowdown in the Indian economy / GDP may adversely affect Company's business, including its ability to enhance its asset portfolio and the quality of its assets, and its ability to implement certain measures could be adversely affected by a movement in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or a general down trend in the economy. Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact the Company's ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available.

3. Material changes in regulations to which the Company is subject

NBFCs in India are subject to detailed supervision and regulation by the RBI, though currently NBFCs not accepting public deposits are exempt from many provisions. In addition, the Company is generally subject to changes in Indian law, as well as to changes in regulations and policies and accounting principles. The RBI also requires the Company to make provisions in respect of NPAs. Any changes in the regulatory framework affecting NBFCs including the provisioning for NPAs or capital adequacy requirements could adversely affect the profitability of the Company or its future financial performance by requiring a restructuring of its activities, increasing costs or otherwise. The Company is subject to certain statutory, regulatory, exposure and prudential norms and this may limit the flexibility of the Company's loans, investments and other products.
